No. 117

QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS OR
SUPERINTENDENT REGISTRARS' DISTRICTS, AND
REGISTRARS' DISTRICTS IN IRELAND;

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's
District; Persons Vaccinated, &c., &c., &c.*

Published by Authority of the Registrar-General.

DUBLIN: PRINTED FOR HER MAJESTY'S STATIONERY OFFICE,
BY ALEX. THOM & CO. (LIMITED).

And to be purchased, either directly or through any Bookseller, from
HODGES, FIGGIS, & CO. (LIMITED), 104, GRAFTON-STREET, DUBLIN; or
EYRE AND SPOTTISWOODE, EAST HARDING-STREET, FLEET-STREET, E.C.; or
JOHN MENZIES & Co., 12, HANOVER-ST., EDINBURGH, AND 90, WEST NILE-STREET, GLASGOW.

Price One Shilling.

Marriages:—OCT., NOV., DEC., 1892. **Births & Deaths:**—JAN., FEB., MAR., 1893.

*General Register Office, Charlemont House,
Dublin, 27th May, 1893.*

During the quarter ended 31st March last, there were registered in the 799 Registrars' Districts in Ireland 27,172 births—a number equal to an annual birth-rate of 23·6 in every 1,000 of the estimated population—and 22,781 deaths, representing an annual rate of 19·8 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 9,581 persons emigrated. A decrease of 5,190 would, therefore, appear to have taken place in the population during the quarter. The population, estimated to the middle of this year is 4,606,527.*

In England last quarter, the birth-rate represented was 31·5 in every 1,000 of the estimated population, and the death-rate 19·7 per 1,000.

The birth-rate in Ireland for the quarter is 0·5 under the average rate for the corresponding quarter of the last ten years, but 0·4 over the rate for the first quarter of 1892. The deaths are below those registered in the corresponding quarter of 1892 to the extent of 7,879; the death-rate is 6·6 below the rate for that quarter, and 2·5 below the average for the first quarter of the ten years 1883–92.

Compared with those for the corresponding quarter of 1892, the returns of pauperism, furnished by the Local Government Board, show a decrease of 384 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 3,674 or 5·8 per cent. in the average number of persons on out-door relief.

* See page 15.

Compared with the averages for the first quarter of the ten years 1883-92 the number of Workhouse inmates shows a decrease of 4,887 and the number of persons on out-door relief a decrease of 4,380.

The marriage-rate (4·1) for the fourth quarter of 1892 is 0·2 over the average rate for the corresponding quarter of the ten years, 1882-91.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the quarter ended 31st December, 1892, and by the **Births** and **Deaths** registered in the Quarter ended 31st March, 1893.

MARRIAGES.

The marriages (4,746) registered in Ireland during the fourth quarter of 1892 are equivalent to an annual rate of 4·1 per 1,000 of the estimated population, being 0·2 over the rate for the corresponding quarter of the previous year. The total number of marriages registered during the year was 21,342, or 4·60 per 1,000 of the population; 14,817 marriages were registered under the provisions of the 26 & 27 Vic., cap. 90, and 6,525 under the 7 & 8 Vic., cap. 81; the former number being equal to 4·24 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·72 per 1,000 of the members of all other religious persuasions. Compared with the averages for the previous ten years, the rate for Roman Catholic marriages shows an increase of 0·30, that for all other marriages an increase of 0·01. Of the 21,342 marriages registered last year, 7,209 were registered in the first quarter, 4,657 in the second, 4,730 in the third, and 4,746 in the fourth.

* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891.

TABLE II.—Showing by **Quarterly Periods**, the number of **Marriages** registered in Ireland in the ten years 1882–91, and the average number for that period, distinguishing the number of Roman Catholic marriages registered under the 26 & 27 Vic., cap. 90, and of Protestant and other marriages under the 7 & 8 Vic., cap. 81; also the number registered during each quarter of the year 1892:—

BIRTHS.

The number of births registered during the quarter ended 31st March last was 27,172—13,925 boys and 13,247 girls—being equal to an annual ratio of 1 in every 42.4, or 23.6 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1883–92 was 29,122, equivalent to an annual rate of 24.1 per 1,000 of the estimated mean population of those years. Thus the birth-rate was 0.5 under the average.

The respective birth-rates for the four provinces last quarter are—Leinster, 22.7 per 1,000 of the population, according to the Census of 1891; Munster, 22.8; Ulster, 23.6; and Connaught, 23.2.

The highest county birth-rate* is 28.6 for Antrim, and the lowest 17.6 for Carlow. Of the intermediate rates the highest five are—Dublin, 27.6; Down, 26.9; Mayo, 25.9; Kerry, 23.9; and Leitrim, 23.7; and the lowest five are—Tyrone, 17.9; Monaghan, 18.0; Cavan, 18.4; Queen's, 18.7; and Meath, 19.1.

DEATHS.

The deaths registered in Ireland during the quarter ended 31st March last amounted to 22,781—11,171 males and 11,610 females—affording an annual ratio of 1 in every 50.6, or 19.8 per 1,000 of the estimated population, being 2.5 under the average rate for the corresponding quarter of the ten years 1883–92.

The death-rate in Leinster was 21.4 per 1,000 of the population according to the Census of 1891; in Munster, 17.7; in Ulster, 20.7; and in Connaught, 15.8.

* See note on foregoing page.

The county death-rates* range from 13·6 in Clare, to 26·5 in Dublin. Between these rates the lowest five are—Sligo, 14·5; Leitrim, 14·9; Kerry, 15·5; Roscommon, 15·6; and Mayo, 15·8; and the highest five are—Antrim, 23·8; Armagh, 22·8; Down, 22·2; Monaghan 21·4; and Kilkenny, 21·2.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1883–92, and the average number for that period; also the number registered during the first quarter of the year 1893:—

| 1893, | 23·6 | — | — | — | — | 19·8 | — | — | — | — |

Agcs.—Of the 22,781 deaths registered last quarter, 2,660, or 11·7 per cent., were of children under 1 year old; and 9,907, or 43·5 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 97·9 per 1,000 of the births registered. In the Province of Leinster the number of deaths of children under 1 year old equalled 12·5 per cent. of the total deaths registered therein; in Munster, 11·6 per cent.; in Ulster, 11·3 per cent.; and in Connaught, 11·0 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 40·5 per cent.; in Munster to 44·9 per cent.; in Ulster to 42·9 per cent.; and in Connaught to 49·2 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

The mortality returns for last quarter compare favourably with those for the March quarter in recent years. The general death-rate is 25 per cent. under the rate for the first quarter of last year; 11 per cent. below the average rate for the March quarter of the last ten years; and lower than the rate for any of these periods, except the first quarter of 1884, which it very slightly exceeds. The rate represented by the deaths from the principal zymotic diseases† also is below the average for the March quarter, and except as regards a few localities the returns show a gratifying decline in the mortality from diseases of this class.

* See note on page 2.

† See note (f) on page 7.

Diseases.—The total number of deaths from the principal zymotic diseases* is 1,083, a number equal to an annual rate of 0·9 per 1,000 living, being equal to the rate for the fourth quarter of 1892, 0·4 or 30 per cent. under the average rate for the first quarter of the last ten years, and lower than the rate for any of these periods.

Smallpox.—No deaths from smallpox have been registered in Ireland since the last quarter of the year 1891, when one death from this cause was recorded. There was an outbreak of the disease in Lisburn District during last quarter, but the Registrar reports “No death has occurred as far as I am aware, and the greater number of the cases have been of a mild type.”

Measles.—The number of deaths from measles registered during last quarter is 147, being 22 over the low number for the preceding three months, but 172 under the average for the first quarter of the last five years. In Leinster there were 40 deaths from the disease; in Munster, 25; in Ulster, 77; and in Connaught, 5 only. Six of the 159 Unions or Superintendent Registrar's Districts contribute 76, or more than one-half of the total number of deaths from measles, there having been 10 deaths in Belfast Union; 11 in Dunfanaghy; 13 in Enniscorthy; 10 in Londonderry; 18 in Lurgan; and 14 in Tralee. Eleven of the 18 deaths in Lurgan Union occurred in Portadown District where, during the preceding quarter, there had been 30 fatal cases of the disease; and 8 of the 11 deaths in Dunfanaghy Union were in Tory Island District, the total population of which, in 1891, was 348 only.

Scarlatina.—There were but 93 deaths from scarlatina registered, against 105 for the preceding three months, and an average of 134 for the March quarter of the last five years. Fourteen of the 93 deaths were in Leinster; 3, only, in Munster; 49 in Ulster; and 27 in Connaught. There are only four Unions in which 5 or more deaths from the disease were registered; they are:—Belfast, in which there were 10 deaths; Castlebar, 7 deaths (all in Castlebar No. 2 District, being equal to an annual rate of 4·2 per 1,000 of the population); Glennamaddy, 5; and Mountmellick, 6.

Typhus caused 84 deaths, being 35 in excess of the number for the corresponding quarter of last year, but 5 under the number for the quarter ended 31st December last, and 2 under the average for the first quarter of the five years 1888–92. In Leinster there were 14 deaths from typhus; in Munster, 39; in Ulster, 19; and in Connaught, 12. The highest number of deaths from the disease in any one Union is 5, and there are five Unions in which that number occurred, viz.:—Belfast, Castletown, Cork, Dublin South, and Tulla.

Whooping Cough.—The number of deaths from whooping-cough registered is 267, being 130 in excess of the very low number for the preceding quarter, but about 30 per cent. below the average for the March quarter of last year. The disease was prevalent in several localities, notably in Glenarm District, Larne Union, where it caused 13 deaths, being equivalent to an annual rate of 10·5 per 1,000 of the population of all ages; the Urban Sanitary District of Parsonstown, where there were 11 deaths, representing an annual rate of 10·2 per 1,000 persons; Waterford Union with 27 deaths (including 17 in Waterford City, and 8 in Ullid District), and Strabane Union 11 deaths, including 6 in Newtown Stewart District. There were also 30

* See note (†) on page 7.

deaths from the disease in the Dublin Registration District, 10 in the City of Cork, and 24 in the City of Belfast. The total number for the province of Leinster is 83; for Munster 81; for Ulster 81; and for Connaught 22.

Diphtheria proved fatal in 92 cases, being 25 in excess of the number of deaths from this disease in the corresponding quarter of last year, but 5 under the average for the first quarter of the five years 1888-92. One half of the mortality from this cause occurred in the following five Unions:—Ballymena, 7 deaths; Belfast, 15; Cork, 5; Dublin South, 12 (including 8 in Donnybrook District), and Larne 6, all of which were in Carrickfergus District. The distribution of the deaths through the four provinces was as follows:—Leinster, 22; Munster, 11; Ulster, 53; and Connaught, 6.

Simple continued and ill defined Fever.—There were only 33 deaths returned under this heading, being 15 under the number for the preceding three months, and 32 or 49 per cent. below the average for the March quarter of the last five years; 8 occurred in Leinster, 9 in Munster, 10 in Ulster, (including 7 in Belfast Union), and 6 in Connaught, of which number 4 were in Galway Union.

Enteric Fever caused 193 deaths against 161 for the corresponding quarter of last year, and an average of 181 for the first quarter of the five years 1888-92. Fifty per cent. of the deaths from enteric fever during last quarter occurred in the Dublin Registration District and the City of Belfast, there having been 72 fatal cases of the disease in the former, and 24 in the latter area. The only Unions or Superintendent Registrars' Districts in other parts of the country in which 5 or more deaths from this disease were registered are Cork and Larne, in each of which there were 5. The total number for the province of Leinster is 96; for Munster 24; for Ulster 61; and for Connaught 12.

Diarrhoea.—The mortality from diarrhoea was much below the average for the March quarter, the number of deaths being 173 against an average of 243 for the first quarter of the last five years. In Leinster there were 32 deaths from this cause; in Munster 33; in Ulster 92, and in Connaught 16.

Simple Cholera.—One death was ascribed to this disease; it occurred in Ulster.

Hydrophobia.—One death from hydrophobia was registered: it occurred in Ulster.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in one district, Chicken-pox in 2 districts, measles in 50, scarlatina in 32, whooping-cough in 42, diphtheria in 12, fever in 41 (typhus 13, enteric 21, and simple continued fever 7), and influenza in 76.

Inquests.—There were 505 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 45 of the total deaths registered.

In Leinster there was 1 inquest to every 34 deaths registered, in Munster 1 to 65, in Ulster 1 to 45, and in Connaught 1 to 52.

Deaths in Public Institutions.—Of the 22,781 deaths registered during the quarter, 3,489, or 15·3 per cent. occurred in public institutions. In Leinster the percentage was 22·0, in Munster 19·5, in Ulster 9·5, and in Connaught 9·9.

The following table (TABLE IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1893, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population :—

| PERIOD. | Total Deaths registered. | Deaths from Principal Zymotic Diseases. | | | | | | | | | | | Percentage of Total Deaths. | Number in every 100,000 of the Population. |

URBAN SANITARY DISTRICTS.

Separate statistics for the Urban Sanitary Districts are given in Table V.

The death-rate for last quarter in these districts, which comprise a population of nearly one-fourth of the total of the country, was 25.7, and the birth-rate 30.0 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 17.4 and the birth-rate 21.0 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Sanitary Districts during the quarter was 1.8 per 1,000 of the population, according to the Census of 1891: in the remainder of the country the rate was 0.7 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1893, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—"The Dublin Registration District," which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumecondra, Clonliffe and Glasnevin, Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the fifteen Urban Sanitary Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the thirteen weeks ending Saturday, 1st April, 1893.

† See note (†) on preceding page.

‡ The rates for Belfast have been calculated on the population estimated in the middle of the year 1893.

VACCINATION.

According to the Returns of Vaccination received for the first quarter of the year 1893, there were 15,634 persons successfully vaccinated; in 3,612 cases the operation was postponed, and 20 children were reported as insusceptible of vaccination. The deaths of 1,625 unvaccinated children under 3 months old were registered during the quarter, making a total of 20,891 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st March last, was 9,581 (4,861 males and 4,720 females), being 3,253 more than in the corresponding quarter of 1892, and 707 over the average number for the first quarter of the ten years 1883-92.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March, in 1892 and 1893:—

| MONTHS. | NUMBER OF EMIGRANTS. | | | | | | | | |
|-----------------|----------------------|-------|------------|----------|-------|------------|--------|-------|------------|
| | Males. | | | Females. | | | Total. | | |
| | 1892. | 1893. | In-crease. | 1892. | 1893. | In-crease. | 1892. | 1893. | In-crease. |
| January, . . . | 535 | 535 | — | 219 | 403 | 84 | 854 | 938 | 84 |
| February, . . . | 837 | 1,563 | 726 | 593 | 1,703 | 1,110 | 1,430 | 3,266 | 1,836 |
| March, . . . | 2,450 | 2,763 | 313 | 1,594 | 2,614 | 1,020 | 4,044 | 5,377 | 1,333 |
| Total, . . . | 3,822 | 4,861 | 1,039 | 2,506 | 4,720 | 2,214 | 6,328 | 9,581 | 3,253 |

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of 1892 the average price was 6½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 15*s.* per cwt., against 15*s.* 5*d.* for the corresponding quarter of 1892. In the first quarter of 1883 the average price was 17*s.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2*s.* 5*d.* to 2*s.* 10*d.* In the first quarter of 1892 the average prices were 2*s.* 3*d.* to 2*s.* 9*d.*, and in the corresponding quarter of 1883 they were 4*s.* 2*d.* to 5*s.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 42*s.* to 52*s.* 6*d.* per cwt. In the corresponding quarter of 1892 the average prices were from 50*s.* to 63*s.*, and in the first quarter of 1883 they were from 67*s.* to 78*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 17*s.* 6*d.* to 18*s.* per ton.

The highest price of 2¼ per cent. Consols at the Dublin Stock Exchange for the quarter was £99¼, and the lowest £97¾. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland, remained during the quarter at 4 per cent. to which it had been raised on the 20th October last.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1893 was 44,192, or 384 under the average for the corresponding period in 1892.

The average weekly number of persons receiving out-door relief during the quarter was 59,626, being 3,674 under the average for the first quarter of 1892.

Of the persons receiving in-door relief during the first quarter of 1893, an average number of 1,140 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1892 the average weekly number was 1,130.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1893, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

(c) Messrs. Manders and Co.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the *Dublin Gazette*; and the average prices of Potatoes and Beef have been compiled from the *Dublin Journals*. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park,

* Latitude 53° 21' 44.65" north; longitude 6° 21' 6.35" west. Height above the sea 162.2 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

Dublin, during the first quarter of the years 1888-93, respectively, furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 14):—

The mean height of the barometer during the first quarter of 1893 was 29·923 inches, against an average of 29·999 inches for the corresponding quarter of the five years 1888-92; the highest reading (30·554 inches) was on the 21st January, at 9 A.M., wind W.; and the lowest (28·862 inches) on the 14th February, at 9 A.M., wind W.

The mean temperature of the air during the quarter was 42·1°, against an average of 40·0° for the first quarter of the five years 1888-92. The maximum temperature was 63·5°, and the minimum 13·6°. The maximum heat in sun was 111·7°, and the minimum on the grass 3·0°.

Rain or snow fell on 59 days during the quarter. The rain-fall measured 5·725 inches, against an average of 4·844 inches for the first quarter of the five years 1888-92. The greatest monthly rain-fall was in February, when 2·845 inches were registered.

The wind blew on 37 days from W., on 11 days each from E., S.E. and S.W., on 6 days each from S. and N.W., on 3 days each from N. and N.E., and the air was calm on 2 days at 9 A.M.

January.—The mean height of the barometer during this month was 30·061 inches; the highest reading (30·554 inches) was on the 21st, at 9 A.M., wind W.; and the lowest (29·198 inches) on the 28th, at 9 P.M., wind S.S.E. The mean temperature of the air was 39·4°, the maximum registered was 55·2°, and the minimum 13·6°. The 30th was the warmest day, and the 3rd the coldest night. The mean of the dry bulb was 39·1°, and of the wet bulb 37·6°. The maximum heat in sun was 94·0°, and the minimum on the grass 3·0°. The minimum on the grass was below 32° on 15 nights. The total amount of sunshine recorded was 49·4 hours, the greatest daily amount being 6·3 hours on the 31st. The maximum ozone was 1·0, the minimum ·1, and the mean ·7. Rain or snow fell on 23 days. The rain-fall measured 2·420 inches; the greatest amount in 24 hours was ·570 inch on the 31st.

February.—The mean height of the barometer during this month was 29·611 inches; the highest reading (30·209 inches) was on the 5th, at 9 A.M., wind S.; and the lowest (28·862 inches) on the 14th, at 9 A.M., wind W. The mean temperature of the air was 41·3°, the maximum registered was 55·9°, and the minimum 21·7°. The 18th was the warmest day, and the 25th the coldest night. The mean of the dry bulb was 40·9°, and of the wet bulb 39·0°. The maximum heat in sun was 102·5°, and the minimum on the grass 15·2°. The minimum on the grass was below 32° on 17 nights. The total amount of sunshine recorded was 73·9 hours, the greatest daily amount being 8·5 hours on the 28th. The maximum ozone was ·9, the minimum ·2, and the mean ·6. Rain or snow fell on 22 days. The rain-fall measured 2·845 inches; the greatest amount in 24 hours was ·520 inch on the 9th.

March.—The mean height of the barometer during this month was 30·096 inches; the highest reading (30·423 inches) was on the 8th, at 9 A.M., wind N.W.; and the lowest (29·276 inches) on the 1st, at 9 A.M., wind S.W. The mean temperature of the air was 45·5°, the maximum registered was 63·5°, and the minimum 28·8°. The 24th was the warmest day, and the 22nd the coldest night. The mean of the dry bulb was 45·4°, and of the wet bulb 42·9°. The maximum heat in sun was 111·7°, and the minimum on the grass 19·9°. The minimum on the grass was below 32° on 19 nights. The total amount of sunshine recorded was 158·2 hours, the greatest daily amount being 11·4 hours on the 21st. The maximum ozone was ·9, the minimum ·1, and the mean ·5. Rain or snow fell on 14 days. The rain-fall measured ·460 inch; the greatest amount in 24 hours was ·110 inch on the 2nd.

At this Station Greenwich mean time is kept, but at the other Stations Local time is observed.

corrected for instrumental error, and reduced to 32° Fahr. as before, but not reduced to mean sea level, and then to the normal, the approximate corrections for the purpose (varying within slight limits with the pressure and City), +.058, *Markree Castle*, +.141; *Armagh*, +.224; *Brookeborough*, +.283; *Londonderry*, +.090.

| | | | | | | | | 1893 | 4,606,527 | 2,275,099 | 2,331,428 |

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-92.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years. The births, deaths, and emigration for the second quarter of 1893 have been estimated.

MARRIAGES Registered during the Quarter ending 31st December, 1892, in the PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st March, 1893; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHŒA, and CHOLERA; also VIOLENT DEATHS,* INQUEST CASES, and DEATHS in PUBLIC INSTITUTIONS, Registered during the Quarter ending 31st March, 1893, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

| Provinces and Counties. | Area, in Statute Acres. | Popu-lation in 1891. | Marriages. | | Births. | | Deaths. | | The Deaths registered during the Quarters stated by the Registrars to include | | | | | | | | | | | | | Vaccination Return for the Quarter ending 31st March, 1893. | | | | | Total of the foregoing. | |
|-------------------------|-------------------------|----------------------|--|---|--|---|-------------------------------|-------------------------------------|---|----------|-------------|---------|-----------------|-------------|---|----------------|---------------------------------|----------------|--|---|--|---|-----------|----------|------------|-------|-------------------------|--------|
| | | | Averages in the Quarters ending 31st Dec., 1892. | Registered in the Quarter ending 31st Dec., 1892. | Averages in the Quarters ending 31st Mar., 1893. | Registered in the Quarter ending 31st Mar., 1893. | Deaths of | | Deaths from | | | | | | | | Deaths in Public Insti-tutions. | Inquest Cases. | Number of successful primary Vaccinations. | Number of Cases in which Vaccination was postponed. | Number of Persons insusceptible of Vac-cination. | Number of Unvacci-nated Children under 3 months old, whose deaths were registered during the Quarter. | | | | | | |
| | | | | | | | Children under 1 year of age. | Persons aged 60 years and up-wards. | Small-pox. | Measles. | Scarlatina. | Typhus. | Whooping-cough. | Diphtheria. | Simple continued and ill-defined Fever. | Enteric Fever. | | | | | | | Diarrhœa. | Cholera. | Violence.* | | | |

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrar's Districts in italics. The letter W denotes that the Union Workhouse is situated in the District or portion of District in the County.

I. PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Kiltegan, part of*.—Remarkable contrast in public health to corresponding quarter last year. One case of influenza, one case enteric fever.

CARLOW; *Bagenalstown*.—Of Seven deaths registered, aged 60 years and upwards, three were 80, 83, and 93 respectively.

CARLOW; *Carlow, part of, W*.—Influenza and diarrhoea (infantile principally) prevailed during the quarter.

CARLOW; *Leighlinbridge*.—A few scattered cases of influenza of a mild type.

ENNISCORTHY; *Newtownbarry, part of*.—During the month of March several cases of influenza have been attended. So far the type has been mild, and no death due to this disease has been registered.

Dublin County.

BALROTHERY; *Lush*.—Vaccination postponed in consequence of an outbreak of a severe type of measles in Rush, which is now declining. There were five fatal cases amongst the children of the poor, owing to want of care during the convalescent stage.

BALROTHERY; *Swords*.—Health of district has been satisfactory, with exception of some cases of measles and five cases of scarlatina; all made good recoveries. During March and to date a harsh, penetrating easterly wind sickened many, causing a form of painful myelitis and great loss of appetite, and general catarrh to several.

DUBLIN, NORTH; *Blanchardstown and Castleknock*.—In consequence of a widespread epidemic of whooping-cough and measles vaccination is very backward, very few children escaping one or other of the diseases.

DUBLIN NORTH; *Coolock and Drumcondra No. 2*.—Measles very prevalent during the quarter.

DUBLIN, SOUTH; *Rathfarnham*.—Vaccination postponed in consequence of epidemic of whooping-cough.

RATHDOWN; *Dundrum and Glencullen, No. 1*.—Whooping-cough prevalent.

Kildare County.

ATHY; *Monasterevin*.—A case of scarlatina occurred, which was one in a boy who came into this district from another part of the county and died two or three days afterwards. All possible precautions to prevent its spreading were taken with success.

BALTINGLASS; *Baltinglass, part of*.—One case of typhoid fever during the quarter.

Kilkenny County.

CASTLECOMER; *Ballyragget*.—A number of patients have been treated for symptoms resembling a mild form of influenza.

KILKENNY; *Gowran*.—The sanitary condition of Gowran main drainage is deplorable. The back yards and sewers connecting them are also in a bad way, but cannot be interfered with till the main sewer is cleansed, ventilated and trapped. I have had a severe epidemic of influenza and pneumonia this quarter, but with the exception of one case of scarlatina, no other fever.

KILKENNY; *Kilkenny, No. 1, W*.—Two vaccinations only during the quarter, owing to the cold weather.

KILKENNY; *Tullaroan*.—Typhus is still prevalent in the Ballycallan Electoral Division of this district, where it has continued more or less since September, 1892. Vaccination has not been performed owing to the absence of a resident medical officer.

NEW ROSS; *Dysartmoon*.—Whooping-cough has prevented vaccination.

THOMASTOWN; Knocktopher.—With the exception of influenza the district was free from infectious disease.

WATERFORD; Kilmakevoge.—No vaccination performed, owing to whooping-cough, which is still prevalent.

King's County.

ENDERRY; Rhode.—Several cases of influenza. One case of diphtheria.

MOUNTMELICK; Clongowan, part of.—Several cases of scarlatina, none to this date fatal. The disease at present is of a mild form. Whooping-cough prevalent in some divisions.

Longford County.

GRANARD; Street, part of.—Vaccination postponed in a good many cases, owing to the prevalence of bronchial affections.

LONGFORD; Killashee.—There are a few cases of typhus fever.

LONGFORD; Longford, W.—The vaccination is not in proportion to births, owing, in my opinion, to there having been (a) three different medical officers successively during the last period of twelve months, (b) and because of the housing of the poor, which is most wretched, and hence the children of that class of people are very unhealthy; the sanitary authorities are using their best endeavours to remedy the evil; and (c) a recent outbreak of measles in one portion of the district.

Louth County.

DROGHEDA; St. Mary's, part of.—Influenza of a different character is prevalent, principally affecting the nervous system, and causing great prostration, with tendency to lung complications.

DROGHEDA; Termonfeckin.—Vaccinations are not numerous, as owing to the usually inclement weather prevalent during the last quarter of the year children are not presented at the depots for vaccination.

DUNDALK; Barronstown, part of.—With the exception of whooping-cough amongst children, the district is free from infectious disease. Owing to its prevalence I have been obliged to delay numerous cases of vaccination.

DUNDALK; Dundalk, W.—The epidemic of whooping-cough has now almost passed over, but measles has been very prevalent for the past six weeks.

DUNDALK; Louth, part of.—A death was registered of a boy aged 6 years from diphtheritic croup, not called on until the disease was far advanced. He was the only member of this family attacked. A second family presented this disease; all the members had it slightly except one, a boy of eleven years, who had it severely (throat and larynx

being much affected); he made a good recovery. Those families lived some miles from each other and were seized about the same time. Their dwellings were situated in marshy and swampy places, there was also a general want of cleanliness in and about their houses. I attribute the disease to the above causes. Sanitary matters have been remedied since. Influenza and ordinary sore throat were very prevalent, but not of a severe type. Several cases of diarrhoea with influenza presented themselves, but were not severe. One case of measles came under my notice in the town of Louth; it was very mild. Whooping-cough is at present prevalent in one end of the County Louth portion of the district.

Meath County.

DROGHEDA; St. Mary's, part of, W.—See note under head of Louth County.

ENDERRY; Ballyboggan.—A few children affected with eczema, consequently I had to postpone vaccination.

KELLS; Kilskeer.—Vaccination postponed in a number of cases in consequence of the prevalence of chest affections of a mild nature among children, and the occurrence of a few cases of measles.

NAVAN; Painestown.—A mild form of measles was prevalent during the last month.

Queen's County.

CARLOW; Carlow, part of.—See note under head of Carlow County.

MOUNTMELICK; Clongowan, part of.—See note under head of King's County.

MOUNTMELICK; Coolrain.—Vaccination had to be postponed in some cases owing to an outbreak of scarlet fever.

Westmeath County.

ATHLONE; Moate.—Many parents object to having their children vaccinated during the early months of year.

DELVIN; Delvin, W.—Measles has been prevalent, and scarlatina has made its appearance again within the last week.

GRANARD; Street, part of.—See note under head of Longford County.

MULLINGAR; Castletown Geoghegan.—I made inquiries about the woman aged 101 years, whose death was registered. The neighbours say that she was at least 100.

MULLINGAR; Killycan.—Four cases of measles appeared in the district in the same house early in March. No cases since.

MULLINGAR; Milltown.—There were six cases of measles; all got well.

MULLINGAR; Multyfarnham.—Of eight deaths registered, seven averaged over 80 years each.

Wexford County.

ENNISCORTHY; Clonroche.—Vaccination results small, in consequence of an epidemic of measles.

ENNISCORTHY; Enniscorthy, No. 2, W.—Almost every child in the district, under 7 years of age, has had measles during the last quarter: as a result, there have been no vaccinations. The mortality from measles has not been high.

ENNISCORTHY; Ferns.—I did not vaccinate in consequence of a wide-spread epidemic of measles.

ENNISCORTHY; Newtownbarry, part of.—See note under head of Carlow County.

NEW ROSS; Carrickbyrne.—Measles very prevalent.

NEW ROSS; Fethard, No. 1.—Children were not presented for vaccination, probably because of unsuitable time of year.

NEW ROSS; Fethard, No. 2.—Owing to the prevalence of bronchial affections and whooping-cough in district, I did not vaccinate the young children, most of whom are only three months old. They shall be vaccinated now at once, as the above affections are disappearing rapidly.

WEXFORD; Bannow.—Whooping-cough is still in the district. There were two cases of diphtheria, one of which was fatal. There were a few cases of influenza.

WEXFORD; Taghmon and Glynn.—In consequence of the prevalence of whooping-cough, I have been obliged to postpone vaccination in many cases.

WEXFORD; Wexford, W.—Measles has been prevalent for the past few weeks; no deaths have been caused by this disease, it being of a mild type.

Wicklow County.

BALTINGLASS; Baltinglass, part of, W.—See note under head of Kildare County.

BALTINGLASS; Kiltegan, part of.—See note under head of Carlow County.

RATHDOWN; Delgany.—Nineteen cases of measles during quarter. The last case occurred on 7th February. Four cases of chicken-pox.

RATHDOWN; Powerscourt.—Three deaths registered at the ages 81, 85, and 86 years, respectively.

RATHDRUM; Dunganstown.—There were a few cases of influenza.

RATHDRUM; Newbridge.—There have been fewer cases of vaccination, in consequence of a slight outbreak of measles, not of a severe type.

RATHDRUM; Rathdrum, W.—Owing to prevalence of influenza, I have had to postpone a number of cases for vaccination. The influenza is in nearly every case complicated with pneumonia of a severe type.

II. PROVINCE OF MUNSTER.**Clare County.**

BALLYVAGHAN; Ballyvaghan, W.—The average of one-half of the deaths is 82 years.

CORROFIN; Corrofin, W.—Mild whooping-cough prevalent and also influenza of a mild type.

ENNIS; Ennis, No. 2.—Whooping-cough prevalent, and also influenza.

ENNISTIMON; Ennistimon, W.—Vaccination had to be postponed, owing to the prevalence of whooping-cough.

ENNISTIMON; Miltown Malbay.—Whooping-cough has not quite disappeared.

ENNISTIMON; Roadford.—Whooping-cough very prevalent.

KILRUSH; Craggaknock.—Mild cases of influenza are prevalent also cases of whooping-cough.

KILRUSH; Craggaknock.—There are a few cases of influenza of a mild type at present.

KILRUSH; Kilkee.—Whooping-cough very prevalent.

KILRUSH; Kilrush, W.—District during the quarter was remarkably healthy. Influenza has, however, first made its appearance in rather a severe form in a few cases.

TULLA; Tulla, W.—Typhus fever of a very serious type appeared in two houses in Tulla, and every inmate took the disease, and was admitted into hospital. Those houses were far apart, and I do not think there was any intercourse between the families. Want of space for the number of occupants, and defective ventilation appeared to me to be the exciting cause. In the fever hospital, three pauper attendants took the fever from the patients. The death of a man aged 105 years registered.

Cork County.

BANDON; Bandon, W.—Influenza was prevalent, but not of a virulent type.

BANDON; Kilbrittain.—Influenza very prevalent, but of a mild type.

BANTRY; Bantry, W.—Influenza very extensively prevails. Some very severe cases, but up to this no deaths have resulted directly from it. No cases of fever. Vaccination backward owing to the prevalence of influenza.

BANTRY; Durrus and Kilcrohane.—Chest affections very prevalent, especially amongst children.

BANTRY; Kealkill.—A few cases of whooping-cough.

CASTLETOWN; Kilcatherine.—Influenza very prevalent during the quarter; also some cases of fever of a mild type of typhus; this has interfered very much with vaccination.

CLONAKILTY; Clonakilty, W.—Several cases of influenza of a mild character; no fatal case reported.

CLONAKILTY; Timoleague.—All vaccinations have been postponed during current quarter, by order of the Medical Officer.

CORK; Ballincollig.—Several prosecutions have been instituted in sanitary cases, with an improving result.

CORK; Blarney.—Vaccination postponed, in consequence of the severity of the weather during the greater part of the quarter.

CORK; Carrigaline, No. 1.—Two deaths were due to the effects of influenza contracted last year. We have had an outbreak of this disease during the quarter. It was of a mild type; one death, however, is registered as due to it.

DUNMANWAY; Ballineen.—There has been sporadic pertussis (whooping-cough), hence so few children vaccinated. I have frequently drawn attention to the want of pure drinking water in Ballineen village.

DUNMANWAY; Coolmountain.—Vaccination had to be suspended during past quarter owing to prevalence of whooping-cough.

DUNMANWAY; Dunmanway, W.—District healthy with the exception of a few cases of influenza.

FERMOY; Rathcormack.—Measles prevalent in the beginning of the quarter, and a mild form of influenza prevails in this district at present.

KINSALE; Ballyfeard.—Some cases of congestion of lungs in children treated—one death. An epidemic of influenza prevailed during quarter, complicated in some cases with bronchial and pulmonary disease—no deaths. Having experienced the disease personally, I believe it to be due to malarial origin, modified by climate and circumstances. Quinine or quinine and steel I believe to be the sheet anchor in it.

MALLOW; Ballyclogh.—In the early part of the quarter there were three cases of typhoid fever in one family, with one death. The house has been disinfected. I have recently met with some cases of influenza, but of a very mild type.

MALLOW; Buttevant.—Whooping-cough and measles prevalent during quarter.

MALLOW; Doneraile.—Five cases of typhoid fever of a severe type occurred in the town of Doneraile; two have already succumbed to the disease. The water supply is in my opinion the cause. There were a few cases of mild scarlatina in the eastern part of the district.

MALLOW; Rahan.—There have been no infectious cases except of influenza.

MIDDLETON; Castlemartyr.—Influenza has appeared in a very mild form. Vaccination very backward, owing to simple carelessness on the part of parents and guardians of children. Deaths were registered at following ages respectively, 78, 82, 84, 86, 87, and 95 years.

MIDDLETON; Middleton, No. 2.—Cases of influenza have been frequent during the quarter of a rather severe type.

MITCHELSTOWN; Kildorrery.—It was difficult to get vaccinations performed during past quarter, the weather being harsh and cold most of the time, and a large number of children suffered from impetigo. It seemed to run round from one family to another. I expect a large number will be brought in for vaccination this month.

MITCHELSTOWN; Mitchelstown, part of, W.—There was one case of typhus fever during the quarter, which proved fatal. Successful steps were taken to prevent its spreading. There are three cases of measles in the town at present, and two of influenza.

SKIBBEREEN; Dromdaleague.—Vaccination was postponed owing to fever, which was very prevalent in the district.

SKIBBEREEN; Skibbereen, W.—One case of fever in Union hospital.

SKIBBEREEN; Tullagh.—Whooping-cough prevalent about Rath.

SKIBBEREEN; Unionhall.—The backwardness with regard to vaccination is more due to the unwillingness of parents to bring in their children, than to the condition of the weather, or any prevailing epidemic.

YOUGHAL; Templemichael, part of.—No vaccinations during the quarter. Weather too cold to bring young children long distances. Vaccinations will be commenced this month.

Kerry County.

CAHERSIVEEN; Emlagh.—There were a few cases of fever in the first and second months of the quarter, but no fresh cases since the 9th February.

CAHERSIVEEN; Glanbehy.—Fever is now appearing.

CAHERSIVEEN; Valencia.—Among twelve deaths registered are eight, aged respectively, 68, 70, 72, 78, 80, 85, 88, and 90 years.

DINGLE; Anascaul.—Pneumonia, of an epidemic form, was prevalent, causing two deaths. Two deaths were registered from puerperal fever. There were a few cases of typhoid fever scattered through the district. One death from typhus fever is registered.

DINGLE; Castlegregory.—I registered the death of a centenarian during the quarter.

DINGLE; *Dingle, W.*—Influenza is very prevalent at present; there have been a few cases with complications, otherwise the epidemic is of a milder type than that of the previous years.

DINGLE; *Ventry.*—Three deaths were registered from puerperal fever.

KENMARE; *Tuosist.*—The excessive rains of the first two months of the quarter interfered with the vaccinations, but I have no doubt that the current quarter will make amends for the deficiency.

KILLARNEY; *Coom.*—The sanitary state of the district has greatly improved. Pneumonia prevalent among children during March. Vaccination greatly in excess of the usual amount at this period of the year.

KILLARNEY; *Killarney, No. 1, W.*—Vaccination very backward in rural portion of district.

KILLARNEY; *Killorglin.*—There were some cases of influenza of a mild type in the month of March.

KILLARNEY; *Molahiffe.*—Influenza is very prevalent.

LISTOWEL; *Ballyhorgan.*—Of the persons whose deaths were recorded, four were aged respectively 95, 90, 84, and 81 years.

LISTOWEL; *Ballylongford.*—There are at present some few cases of influenza.

LISTOWEL; *Listowel, W.*—An epidemic of measles prevails at the present time in the Listowel urban district. Vaccination has accordingly been postponed for the present.

LISTOWEL; *Tarbert, No. 1, part of.*—Influenza was prevalent during last two months, but is now abating.

TRALEE; *Ardfert.*—The water supply in and around the village of Ardfert being very bad, steps should be at once taken to supply the place with good water.

TRALEE; *Castlemaine.*—Fever broke out in one townland, but it was confined to two families, with only one fatal case, that of an old woman of 70 years.

TRALEE; *Kilgobban.*—Cases of tonsillitis of an epidemic form were present in the district. One death at the age of 110 years was registered; from inquiries made, I believe it to be correct.

TRALEE; *Tralee, No. 1, W.*—Some cases of measles and whooping-cough. Distress among the poor not so severe during the past winter; illness not so prevalent.

Limerick County.

CROOM; *Croom, W.*—Whooping-cough being prevalent during summer months, vaccinations were postponed. One certified death from influenza.

KILMALLOCK; *Kilfinnane.*—Whooping-cough prevails here.

LISTOWEL; *Tarbert, No. 1, part of.*—See note under head of Kerry County.

MITCHELSTOWN; *Galbally.*—Sanitary arrangements in the villages of Galbally and Ballylanders not very satisfactory.

MITCHELSTOWN; *Mitchelstown, part of.*—See note under the head of Cork County.

RATHKEALE; *Rathkeale, No. 1, W.*—Whooping-cough generally prevalent, which accounts for the small number vaccinated.

TIPPERARY; *Cappagh, part of.*—Bronchitis is prevalent among children.

TIPPERARY; *Green, part of.*—One case of typhus which ended fatally. This death has not yet been registered.

Tipperary County.

BORRISOKANE; *Borrisokane, W.*—In consequence of the prevalence of influenza, the children were not brought in for vaccination.

BORRISOKANE; *Terryglass.*—The death of a man aged 113 years was registered. He was 18 years of age in the year of the rebellion, in which he took an active part, having fought in several engagements. His memory of that period was quite clear up to a short time before his death.

CASHEL; *Kilpatrick.*—I have treated 3 cases of fever, the cause of which was impure water. Notices have been posted up warning the public against the use of these waters. Steps have been taken by the guardians to procure a good water supply for the localities needing them.

CLOGHEEN; *Caher.*—A few cases of whooping-cough occurred. A mild type of influenza is, at present, prevalent, especially among children.

NENAGH; *Nenagh, W.*—Influenza has appeared again. No fatal cases as a result.

NENAGH; *Newport.*—The number of children vaccinated is below the average, owing to the prevalence of whooping-cough.

NENAGH; *Toomypara.*—An epidemic of influenza passed over the district, but no deaths occurred on its account.

PARSONSTOWN; *Riverstown.*—Whooping-cough almost gone out of the district. No death from it.

THURLES; *Thurles, W.*—Some cases of influenza of a mild type treated during latter part of quarter.

TIPPERARY; *Bansha.*—District healthy, with the exception of typhoid fever in one family (three in number), probably due to drinking water from a stream polluted by cattle; fresh uncontaminated water now obtained.

TIPPERARY; Cappagh, part of.—See note under head of Limerick County.

TIPPERARY; Emly.—Sickness less than usual. Several old people died; four over 80, and ten over 60 years of age.

TIPPERARY; Grean, part of.—See note under head of Limerick County.

Waterford County.

CLONMEL; Ballymacabry.—The deaths of three women were registered as follows—one 75, one 80, and one 95 years of age.

DUNGARVAN; Ringville.—There were some well marked cases of rütheln (German measles) among the children, but very mild.

KILMACTHOMAS; Kilmacthomas, W.—Eight or ten cases of typhus fever due to unsanitary surroundings, and occurring in cottages the property of the Guardians. Every sanitary precaution was adopted; patients removed to hospital; bedclothes burnt, houses thoroughly disinfected, &c., &c. Only one death in fever hospital as the result of the little outbreak. No fresh cases. Vaccinations postponed owing to the severity of the weather. It will be looked after now that weather is getting fine.

LISMORE; Ballyduff.—Few children were vaccinated owing to the prevalence of measles.

LISMORE; Lismore, W.—A few cases of measles of an exceptionally mild type.

LISMORE; Tallow.—Vaccination was suspended up to the middle of March, owing to an epidemic of measles.

WATERFORD; Waterford, No. 1, W.—Typhoid fever has been prevalent during the quarter, also whooping-cough of a very severe type and attended with a good deal of mortality.

YOUGHAL; Clashmore.—Influenza has come again with the spring. It has been generally of a mild form, when occurring in wholesome dwellings; but has in several cases assumed a distinctly typhoid character while running its course amidst unwholesome surroundings.

YOUGHAL; Templemichael, part of.—See note under head of Cork County.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Randalstown.—A good many mild cases of influenza occurred during the quarter, but only one death has been recorded from that disease.

ANTRIM; Templepatrick.—Diseases of the respiratory organs were pretty common among children in some parts of the district.

BALLYCASTLE; Cushendal.—The sanitary state of Cushendal town is very defective, and the Local Government Board has ordered an inquiry on the subject. Vaccination has been postponed owing to the extreme severity of weather during almost the entire quarter.

BALLYMENA; Ahoghill.—Sanitary arrangements fairly good, except water supply of the village of Ahoghill is not good.

BALLYMENA; Ballymena, W.—Four deaths from diphtheria were registered. At present the district is in a very healthy state.

BALLYMENA; Broughshane.—No epidemic, except scarlatina—cases mild, but no deaths.

BALLYMENA; Clough.—In first month of the quarter there were several cases of scarlatina, in some cases accompanied with diphtheria, from the latter of which there were two deaths. Both these diseases have disappeared for some time. In latter part of quarter there have been a few cases of typhoid fever, with one death.

BALLYMENA; Galgorm.—Deaths registered were chiefly from old age and chest complaints.

BALLYMENA; Toome.—With the exception of a few cases of influenza, the district continues to be in a very healthy state.

BALLYMONEY; Castlequarter.—Two cases of diphtheria, one of which died.

BALLYMONEY; Dervock.—Measles has been prevalent for the last month, but I have not heard of any fatal cases. A few cases of typhoid have occurred.

BALLYMONEY; Dirraw.—One old person registered as 102 years, no authentic reference, but believed to be true, as some of his children are about 80 years of age. Measles and gastric catarrh prevalent amongst children.

LARNE; Ballycarry.—Catarrhal affections prevalent.

LARNE; Ballynure.—Vaccinations postponed during the early portion of the quarter, owing to the severity of the weather and the prevalence throughout the district of measles and influenza.

LARNE; Carrickfergus.—In the months of January and February there were a number of cases of diphtheria, but the district is free from it at present. Ten deaths from phthisis have been registered during the quarter.

LARNE; Waterfoot.—Vaccination was postponed owing to extreme severity of weather during almost the entire quarter.

LISBURN; Lisburn, part of, W.—There has been an outbreak of small-pox. No death has occurred as far as I am aware and the greater number of the cases have been of a mild type. There have been several isolated cases of scarlatina, and two deaths have been registered as having been caused by it.

Armagh County.

ARMAGH; Armagh, W.—Four deaths are due to influenza, one in the urban and three in the rural districts.

ARMAGH; Blackwatertown—Influenza appeared during the past month. A large number of children affected but the type is mild.

ARMAGH; Keady.—There has been an unusual number of deaths of elderly persons. Pneumonia was prevalent during the quarter.

ARMAGH; Markethill.—The district has been visited with an epidemic of measles, but of a very mild kind. A great number of old persons died during the winter from chest affections.

ARMAGH; Richhill.—The number of births exceeds the number of any quarter for the last nine years.

DUNDALK; Barrinstown, part of.—See note under head of Louth county.

LURGAN; Lurgan, No. 2.—Influenza prevalent.

LURGAN; Portadown.—Vaccination under the average, owing to measles being prevalent during the quarter.

NEWRY; Forkill.—A good number of vaccinations postponed owing to the prevalence of whooping-cough in early part of quarter. One death was registered from this cause.

NEWRY; Mullaghglass.—The district has been visited during the quarter by an epidemic of measles and whooping-cough, the deaths from these diseases have been few considering the number of children affected and the severity of the weather. Vaccination is below the average, owing to the causes above mentioned.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—There have been some cases of influenza, complicated in some instances with bronchitis, &c. There was almost no vaccination performed as the early part of the quarter was rather severe for bringing out children.

BAILIEBOROUGH; Kingscourt.—Of the twelve deaths registered, nine were of persons aged 60 years and upwards, one aged 86, two 80, one 72, two 65, and three aged 60 years. There was a slight epidemic of a mild type of influenza during the beginning of March. No deaths were registered from that disease.

BAWNBOY; Ballyconnell, W.—A few mild cases of influenza occurred of a different type from that of last year. No deaths however from it.

CAVAN; Ballyhaiss.—Owing to the prevalence of influenza and chicken-pox, it was not possible to get children vaccinated, but as these diseases are now disappearing I expect to have all the children (unvaccinated) vaccinated in a few days.

CAVAN; Bellanagh.—Pneumonia and bronchitis have been very prevalent, within the past fortnight a great number of cases of influenza have appeared.

CAVAN; Belturbet.—No children were brought out for vaccination owing to the prevalence of chest affections amongst them.

CAVAN; Stradone.—Owing to the prevalence of measles and scarlatina and the severity of the weather in early part of quarter, the vaccination is decreased.

COOTEHILL; Drum, part of.—Measles still prevalent, but greatly diminished in number. Unfortunately an outbreak of diphtheria has taken place in this village (Drum); there were three genuine cases with one death, not as yet registered, and one doubtful case. There have been no fresh cases for the last fortnight; I cannot say how it originated.

ENNISKILLEN; Holywell, part of.—The sanitary arrangements of this district are not satisfactory. Typhoid fever and whooping cough exist in Glennevin.

OLDCASTLE; Virginia.—Scarlatina broke out in two houses, under same roof, two children died from it. The disease has not spread for so far.

Donegal County.

BALLYSHANNON; Ballintra—Water supply almost none.

DONEGAL; Dunkineely.—The Board of Guardians and Local Government Board have sanctioned the erection of two pumps in Dunkineely town. Forty per cent. of the total number of deaths presumably due to pulmonary affections.

DONEGAL; Laghy.—No vaccinations owing to pulmonary diseases and severity of the weather.

DUNFANAGHY; Gweedore.—There was an epidemic of measles in the district. There was also an isolated case of typhus fever, and two deaths registered, confined to one family.

DUNFANAGHY; Tory Island.—The disease, measles, is nearly cleared off the island. Four cases confined to one family. No other person affected.

GLENTIES; Ardara.—The long felt and admitted want of a sufficient and pure supply of water needs immediate attention, as the return of typhoid fever and other diseases so prevalent in this village and district last summer, and on many previous occasions is greatly apprehended. The manure heaps, cesspools, &c., at the backs of many of the houses, together with the absence of any adequate system of drainage from same are also subjects of continuous anxiety on the part of the more intelligent

section of the community. The streets of the village are often in a shocking condition in wet weather from not being kept regularly "scavenged," collections of mud and refuse not infrequently being collected before the fronts of houses for weeks.

GLENTIES; Dunglow.—Typhoid of a mild type appeared in two localities without any deaths resulting.

GLENTIES; Killybegs.—There were about 12 cases of erysipelas of the face, one death; no medical attendant.

INISHOWEN; Buncrana.—A large number of cases of bronchitis and pneumonia came under my notice during the past three months.

INISHOWEN; Carndonagh, W.—There were four deaths at the advanced ages of 100, 99, 94, and 84 years respectively.

LETTERKENNY; Churchhill.—The deaths registered were principally old people, of those the ages were, one at 80, two at 82, one at 83, two at 84, one at 89, one at 90, one at 95, two at 98, and one at 99 years.

LONDONDERRY; Burt.—Vaccination return larger than usual, owing to a number of defaulters having been vaccinated. A few cases of measles of a mild type have occurred.

LONDONDERRY; Killea.—Two deaths of very old people registered—ages stated to be 95 and 90 years respectively.

MILLFORD; Fanad.—There were four deaths from phthisis, three from scarlatina, and one from puerperal septicæmia, registered.

STRABANE; Raphoe.—District at present free from infectious diseases with exception of influenza.

STRANORLAR; Stranorlar, W.—The great ages of the deaths recorded are remarkable; of the 29 deaths, 22 are aged 60 and upwards—of these seven are over 70, seven over 80, and four over 90, one of the latter being 98 years.

Down County.

BANBRIDGE; Ballyward.—No epidemic disease prevailing, except whooping-cough which is beginning to decline.

BELFAST; Castlereagh, No. 1.—The chief cases of complaint are those in connection with the respiratory organs—old people and young children being the principal sufferers from the sudden changes of temperature.

DOWNPATRICK; Ballynahinch.—There have been some cases of scarlatina in Ballynahinch, from which there have been two deaths, also some isolated cases of measles in other parts of the district, attended with

two deaths. One family has suffered from typhoid fever, owing probably to the use of polluted water, which has now been discontinued.

DOWNPATRICK; Killyleagh.—The death rate is rather high, but of the 64 deaths registered, 29 have been 60 years and upwards. I have registered the death of a man aged 95 years.

KILKEEL; Kilkeel, No. 1.—Influenza is prevalent.

KILKEEL; Kilkeel, No. 2, W.—One woman died 100 years old. Typhus broke out, but now only one case; was brought from Cushendal, Co. Antrim, by a sheep-dealer.

LISBURN; Lisburn, part of.—See note under head of Antrim County.

LURGAN; Moira.—Although no death has occurred from zymotic disease, yet the death rate has been rather high. A few severe cases of influenza have appeared, but no deaths. One case of typhoid with very high temperature, 105 at times, I have yet on hands.

LURGAN; Waringstown.—One death from hydrophobia was registered on Coroner's certificate. The patient had been bitten twelve months before death by a rabid dog. I understand he received treatment immediately after the injury at the hands of a well-known Irish specialist—not qualified. He was not seen before death by any medical practitioner.

NEWRY; Rathfriland.—Two deaths from scarlatina in one house—no other cases in the district.

NEWTOWNARDS; Bangor.—Two deaths were registered of persons aged 90 and 95 years, respectively.

NEWTOWNARDS; Greyabbey.—Measles, mumps, influenza (catarrhal and gastric) prevailed during the quarter. Measles ceased early in February—type, mild, chiefly in Ballyhalbert and Kirkcubbin Divisions; mumps in Greyabbey, and Ballywalter particularly—ceased early in March, since when influenza has been more prevalent, and especially amongst children. One death from diphtheria, origin not ascertained; 4 deaths recorded as due to influenza; one from mumps in a boy aged 4 years, who was suffering for some time previously from albuminuria, certified. About one half number of deaths recorded were aged over 60 years.

NEWTOWNARDS; Kilmoed.—Measles of a mild type prevailed during first two months of quarter, also a few cases of influenza of a mild character.

NEWTOWNARDS; Newtownards, W.—Measles has been prevalent. I have had a few cases of scarlet fever. Influenza has reappeared; it is at present prevalent and of rather a severe type.

Fermanagh County.

BALLYSHANNON; *Belleek*.—Vaccination postponed on account of epidemic of mumps.

CLONES; *Newtownbutler, part of*.—There has been a good deal of scarlet fever about, so I didn't press the people to attend for vaccination during the past quarter.

CLONES; *Rosslea, part of*.—An epidemic of measles occurred during the quarter, but of such a mild type that few sought medical advice. The death of a man aged 100 years was registered; he enjoyed good health almost up to the time of his death. Vaccination is in a backward state owing partly to measles and partly to carelessness of parents.

ENISKILLEN; *Holywell, part of*.—See note under head of Cavan county.

IRVINESTOWN, *Irvinstown, No. 1, part of, W.*—One death registered at the age of 104 years.

LISNASKEA; *Lisnaskea, W.*—Majority of deaths were of persons aged 60 years and upwards.

Londonderry County.

BALLYMONEY; *Kilrea*.—One death from typhoid fever was registered and two other cases of the same disease in different parts of my district are at present convalescent.

COLERAINE; *Articlave*.—Influenza pretty general.

LONDONDERRY; *City of Derry, No. 1*.—Measles has been very prevalent.

LONDONDERRY; *City of Derry, No. 2*.—The death of a woman who had reached the age of 105 years was registered.

MAGHERAFELT; *Moneymore*.—One death from Scarlatina and one from typhus have been registered, the latter disease has died out, but there are still two cases of scarlatina which are being kept isolated; otherwise, with the exception of a few cases of mild influenza, the district is healthy.

Monaghan County.

CASTLEBLAYNEY; *Castleblayney W.*—Sporadic cases of measles, diphtheria, and influenza occurred during the quarter, and capillary bronchitis was common. Owing to these causes the number of children vaccinated was unusually small.

CLONES; *Newtownbutler, part of*.—See note under head of Fermanagh County.

CLONES; *Rosslea, part of*.—See note under head of Fermanagh County.

COOTEHILL; *Drum, part of*.—See note under head of Cavan County.

DUNDALK; *Louth, part of*.—See note under head of Louth county.

MONAGHAN; *Kilmore*.—A few cases of measles in one part of my district, mild in type. Virulent scarlatina, from which two deaths in one family occurred, is in another part of my district. I have closed the three schools in the neighbourhood.

Tyrone County.

CASTLEBERG; *Castlederg, W.*—One bad case of typhoid in hospital.

CLOGHER; *Fivemiletown*.—District healthy compared with corresponding quarter of last year; some few cases of influenza, but none were fatal.

COOKSTOWN; *Stewartstown*.—Influenza has again made its appearance, and there is also an epidemic of both scarlatina and measles, but almost entirely confined to young children.

DUNGANNON; *Benburb*.—Whooping-cough very prevalent, which accounts for so few vaccinations.

DUNGANNON; *Clonarddy*.—A wave of scarlatina passed over this district during the months of January and February with one death—now subsided. The district has been quite healthy during the month of March.

DUNGANNON; *Coalistand*.—Several cases of scarlatina of a malignant type have occurred, but fortunately the disease has not spread.

IRVINESTOWN; *Irvinstown, No. 1, part of*.—See note under head of Fermanagh county.

OMAGH; *Omagh, No. 1, W.*—There were a few cases of influenza during quarter, also a large number of sore throats of a diphtheritic nature.

STRABANE; *Newtownstewart*.—Severe epidemic of whooping-cough complicated with acute bronchitis. Five deaths in part of the district, which is in every other respect exceptionally healthy.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Ballinasloe, W.*—Some cases of mild influenza came under notice during March.

BALLINASLOE; *Kiltormer*.—The deaths were registered of three persons ages 80, 83, and 94 years respectively.

CLIFDEN; *Roundstone, No. 2*.—Among the deaths registered the combined ages of five amount to 411 years.

GALWAY; Oranmore.—Typhus fever broke out in a house in the southern part of the district. The woman affected was removed to hospital, where she died. One child died in the house. To prevent its extending, the clothes and bedclothes were burned, and disinfectants freely used. No other case occurred since. The district is now free from disease.

GLENNAMADDY; Dunmore.—Vaccination is not attended to as it ought to be.

GLENNAMADDY; Glennamaddy, W.—There were some cases of scarlatina, three of which proved fatal; also two cases of typhoid fever, one of which was fatal, and the other conveyed to fever ward, and is now quite convalescent.

GLENNAMADDY; Williamstown.—Scarlatina of a malignant type broke out in part of district during the early part of the quarter, but was confined to a very small area. It has now completely disappeared. Typhoid fever traceable to impure drinking water occurred in one family.

LOUGHREA; Athenry.—The district has been free from fever until the last fourteen days (minus of whooping-cough), when fever broke out in one family at Clough. The father, mother, and seven children were stricken down. The guardians promptly provided two nurses and all relief. I do not fear a spread of the disease.

LOUGHREA; Bullaun.—Among the deaths registered are four over 80 years of age, namely, one each at 80, 81, 85, and 97 years.

MOUNTBELLEW; Killeroran.—Children have been taken for vaccination with most creditable regularity.

TUAM; Abbey.—Sanitary arrangements require to be carried out in the village of Monivea. Vaccination is backward, but now that we have fine weather I am sure children will be brought in.

Leitrim County.

BAWNEBOY; Ballinamore.—A few cases of whooping-cough still continue.

MANORHAMILTON; Lurganboy.—An epidemic closely allied to influenza has been prevalent in the district during the last month of the quarter, the principal symptoms being chilliness, *malaise*, and muscular pains, lasting about a week, and unaccompanied by any pulmonary trouble.

MOHILL; Carrigallen.—Two families were affected with typhoid during the quarter, three members of one and four of the other suffering; all recovered. There were several cases of measles and of scarlatina. Two deaths occurred from the latter, of which one has not yet been registered.

Both epidemics are subsiding. Influenza has become prevalent during the month of March, and is likely to continue for some time.

MOHILL; Mohill, W.—Owing to the continuance of scarlatina parents would not bring their children to be vaccinated. However, now that the disease has subsided I expect to have a good average attendance for the quarter we have entered upon.

Mayo County.

BALLINA; Ballina, part of, W.—There has been a mild form of scarlatina and measles, which prevented parents of children taking them to be vaccinated, but I expect that vaccination will proceed rapidly now.

BALLINROBE; Hollymount.—Vaccination much below the average, owing to bronchial and throat affections being very prevalent among children.

CASTLEBAR; Balla.—Colds are very prevalent amongst children; they are not in a fit state to be vaccinated.

CASTLEREAGH; Ballaghaderreen, part of.—There have been many cases of influenza of a strange type during the last two months of the quarter, but none have proved fatal. Some cases of scarlatina have cropped up here and there in the district now and again.

CLAREMORRIS; Ballyhaunis.—Most of the deaths are attributable to lung disease, affecting children and aged persons.

KILLALA; Ballycastle.—There has been an epidemic of influenza of a mild form, but no deaths have been registered from it.

SWINEFORD; Lowpark.—Total neglect of vaccination, owing altogether to neglect of parents.

SWINEFORD; Swineford, W.—Influenza very prevalent. One death from it registered.

WESTPORT; Achill.—Influenza of a mild type at present prevails. Few children as usual presented for vaccination.

WESTPORT; Ballycroy.—The months of January and February, and the first week of March were very bad weather. There was such a bad winter cold, ending with influenza, that I thought it better to postpone vaccination. Some cases proved fatal from influenza, with other complications. They were four in number, aged 4 years, 2 years, 15 months, and 10 months.

WESTPORT; Newport.—An epidemic of scarlatina-simplex has interfered with primary vaccination.

Roscommon County.

BALLINASLOE; Creagh.—Vaccination in a backward state.

BOYLE; *Boyle, part of, W.*—Whooping-cough was very prevalent during the past quarter. There were a few cases of scarlatina.

CASTLEREAGH; *Ballaghaderreen, part of.*—See note under head of Mayo County.

ROSCOMMON; *Ballyleague.*—There has been one death registered from whooping-cough. The disease has disappeared.

STROKESTOWN; *Roosky.*—Scarlatina made its appearance during the past quarter. Two of the deaths are certified as having occurred from it. I believe the disease has disappeared for some weeks past. Seventeen of the deaths were of persons aged 60 years and upwards, and one, that of an old man age recorded as 96 years, which I am aware is quite true.

STROKESTOWN; *Strokestown, W.*—There were four deaths registered from phthisis.

Sligo County.

BALLINA; *Ballina, part of.*—See note under head of Mayo County.

BOYLE; *Boyle, part of.*—See note under head of Roscommon County.

DROMORE WEST; *Easky, W.*—There were some cases of scarlatina of a mild type, with two exceptions which proved fatal.

DROMORE WEST; *Skreen.*—The vaccination laws are very indifferently complied with.

SLIGO; *Ballymote.*—Bronchitis prevalent.

SLIGO; *Collooney.*—Three cases of enteric fever during quarter; no deaths. One death registered 100 years; another 88.

TOBERCURRY; *Tobercurry, W.*—There were a good many cases of typhus and typhoid during the past quarter, but there was only one death.

1893.]

Marriages:—JAN., FEB., MAR., 1893. Births & Deaths:—APR., MAY, JUNE, 1893.

*General Register Office, Charlemont House,
Dublin, 27th July, 1893.*

During the quarter ended 30th June last, there were registered in the 799 Registrars' Districts in Ireland 28,301 births—a number equal to an annual birth-rate of 24·5 in every 1,000 of the estimated population—and 20,306 deaths, representing an annual rate of 17·6 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 23,879 persons emigrated. A decrease of 15,884 would, therefore, appear to have taken place in the population during the quarter. The population, estimated to the middle of this year is 4,615,190.*

In England last quarter, the birth-rate represented was 31·7 in every 1,000 of the estimated population, and the death-rate 17·9 per 1,000.

The birth-rate in Ireland for the quarter is 0·1 under the average rate for the corresponding quarter of the last ten years, but 0·2 over the rate for the second quarter of 1892. The deaths are below those registered in the corresponding quarter of 1892 to the extent of 2,840; the death-rate is 2·4 below the rate for that quarter, and 1·8 below the average for the second quarter of the ten years 1883–92.

Compared with those for the corresponding quarter of 1892, the returns of pauperism, furnished by the Local Government Board, show a decrease of 212 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 2,181 or 3·6 per cent. in the average number of persons on out-door relief.

* See page 105.

Compared with the averages for the second quarter of the ten years 1883-92 the number of Workhouse inmates shows a decrease of 4,796 and the number of persons on out-door relief a decrease of 9,582.

The marriage-rate (5·8) for the first quarter of 1893 is equal to the average rate for the corresponding quarter of the ten years, 1883-92.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the quarter ended 31st March, 1893, and by the **Births** and **Deaths** registered in the Quarter ended 30th June, 1893.

MARRIAGES.

The marriages (6,725) registered in Ireland during the first quarter of 1893 are equal to an annual rate of 5·8 per 1,000 of the estimated population, being 0·4 under the rate for the corresponding quarter of last year, but equal to the average rate for the first quarter of the ten years 1883-92. Of the total marriages 5,237 were registered under the provisions of the 26 & 27 Vic., cap. 90, and 1,488 under the 7 & 8 Vic., cap. 81; the former number being equal to 6·02 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5·24 per 1,000 of the members of all other religious persuasions. Compared with the averages for the corresponding quarter of the last ten years, these rates show no appreciable difference. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while as regards other marriages, there is generally but little difference in the numbers registered in the several quarters.

* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891.

TABLE II.—Showing by Quarterly Periods, the number of **Marriages** registered in Ireland in the ten years 1883–92, and the average number for that period, distinguishing the number of Roman Catholic marriages registered under the 26 & 27 Vic., cap. 90, and of Protestant and other marriages under the 7 & 8 Vic., cap. 81; also the number registered during the first quarter of the year 1893:—

| 1893, | 6.0 | | | | | 5.2 | | | | | 5.8 | | | | | |

BIRTHS.

The number of births registered during the quarter ended 30th June last was 28,301—14,391 boys and 13,910 girls—being equal to an annual ratio of 1 in every 40.8, or 24.5 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1883–92 was 29,692, equivalent to an annual rate of 24.6 per 1,000 of the estimated mean population of those years. Thus the birth-rate was 0.1 under the average.

The respective birth-rates for the four provinces last quarter are—Leinster, 24.7 per 1,000 of the population, according to the Census of 1891; Munster, 23.5; Ulster, 25.3; and Connaught, 21.4.

The highest county birth-rate* is 30.6 for Antrim, and the lowest 18.3 for Monaghan. Of the intermediate rates the highest five are—Down, 30.2; Dublin, 29.5; Kerry, 26.6; Londonderry, 24.2; and Louth, 23.8; and the lowest five are—Fermanagh, 19.3; Kildare, 19.5; Roscommon, 19.7; Donegal, 20.1; and Meath, 20.1.

DEATHS.

The deaths registered in Ireland during the quarter ended 30th June last amounted to 20,306—10,153 males and 10,153 females—affording an annual ratio of 1 in every 56.8, or 17.6 per 1,000 of the estimated population, being 1.8 under the average rate for the corresponding quarter of the ten years 1883–92.

The death-rate in Leinster was 20.3 per 1,000 of the population according to the Census of 1891; in Munster, 16.2; in Ulster, 17.6; and in Connaught, 13.3.

* See note on foregoing page.

The county death-rates* range from 12·1 in Sligo, to 24·6 in Dublin. Between these rates the lowest five are—Leitrim, 12·9; Donegal, 13·1; Fermanagh, 13·1; Mayo, 13·1; and Galway, 13·2; and the highest five are—Antrim, 21·0; Wexford, 20·8; Carlow, 20·6; Waterford, 19·5; and Down, 19·4.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1883–92, and the average number for that period; also the number registered during the first and second quarters of the year 1893:—

| 1893. | 23·6 | 24·5 | | | | 19·3 | 17·6 | | | |

Ages.—Of the 20,306 deaths registered last quarter, 2,490, or 12·3 per cent., were of children under 1 year old; and 7,823, or 38·5 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 88·0 per 1,000 of the births registered. In the Province of Leinster the number of deaths of children under 1 year old equalled 13·1 per cent. of the total deaths registered therein; in Munster, 12·0 per cent.; in Ulster, 12·2 per cent.; and in Connaught, 10·9 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 36·9 per cent.; in Munster to 41·5 per cent.; in Ulster to 36·0 per cent.; and in Connaught to 44·1 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

The state of the Public Health in Ireland during last quarter, as measured by the Mortality Statistics, must be regarded as having been very satisfactory. The general death-rate shows a decline equivalent to 9 per cent. when compared with the average for the second quarter of the ten years 1883–92 and is lower than the rate for any of these periods. The zymotic death-rate, also, compares favourably with the average rate for the June quarter. There were a few severe local outbreaks of some diseases of the zymotic class, but that there was no extended prevalence of such diseases is attested by the low death-rate for the country at large, and by the fact that one-half of the total number of deaths from the principal diseases† in this class occurred within twelve of the 159 Unions or Superintendent Registrars' Districts into which Ireland is divided.

* See note on page 92.

† See note (†) on page 97.

Diseases.—The total number of deaths from the principal zymotic diseases* registered during last quarter is 1,262, equivalent to an annual rate of 1·2 per 1,000 living, being 0·3 over the rate for the preceding three months, but 0·2 under that for the June quarter of last year, and showing a decline of about 15 per cent. as compared with the average for the second quarter of the ten years 1883–92.

Smallpox.—No deaths from smallpox have been registered in Ireland since the last quarter of 1891. The Registrar of Newcastle District, Newcastle Union, in his Note on the health of his district during last quarter reports the occurrence of 3 cases of the disease, and the Registrar of Killala District, Killala Union, reports that there were 2 cases in his district.

Measles.—The deaths from measles registered during last quarter amount to 311, being 164 over the number for the preceding three months, but 10 below the average for the second quarter of the five years 1888–92, and 333, or more than fifty per cent. under the number for the second quarter of last year, when the disease proved very fatal in Dublin and Belfast. The provincial distribution of the deaths last quarter was: Leinster, 130; Munster, 71; Ulster, 104, and Connaught 6 only. Although the deaths from this cause during the quarter were very numerous, there are many localities which were altogether free from fatal cases of the disease, and 229 deaths or 74 per cent. of the total were furnished by 11 of the 159 Unions or Superintendent Registrars' Districts: these Unions are, Belfast, in which there were 74 deaths; Dublin South, 34 deaths; Dundalk, 17; Enniscorthy, 13; Listowel, 14; Londonderry, 10 (including 9 in Londonderry No. 2 District); Navan, 9; Newcastle, 9 (7 of which were in Broadford District); New Ross, 12; Waterford, 11; and Wexford 26, the number in the last-named Union being equal to an annual rate of 3 per 1,000 of the population at all ages.

Scarlatina.—The number of deaths from scarlatina registered is 97, being 4 over the number for the preceding three months, but 15 under that for the second quarter of last year, and 17 below the average for the second quarter of the five years 1888–92: 16 occurred in the province of Leinster; 5, only, in Munster, when during the preceding quarter there were but 3 fatal cases of the disease; 34 in Ulster; and 42 in Connaught. In 14 of the 32 counties no deaths from scarlatina were recorded, and 7 of the 159 Unions or Superintendent Registrars' Districts supply 53 deaths or 55 per cent. of the total number: these Unions and the respective numbers of deaths therein are as follow:—Armagh, 5; Belfast, 10; Castlebar, 5 (all in Castlebar No. 2 District); Castlereagh, 15; Claremorris, 6; Dublin South, 6; and Swineford 6, all of the last number occurring in Foxford District with a population of 6,096.

Typhus.—The mortality from typhus was below the average, the number of deaths being 73 or 11 less than in the preceding quarter, and 29 under the average for the second quarter of the last five years. The only Unions in which more than four deaths from typhus were registered are Belfast and Mountbellew, in the former of which there were 8 and in the latter 7. The total number for the province of Leinster is 14; for Munster 24; for Ulster 20, and for Connaught 15.

Whooping Cough.—Deaths from whooping-cough, which had risen from 137 for the fourth quarter of last year to 267 for the first three months of this year, were last quarter 268, but this number is 39 or 13 per cent. below the average for the corresponding quarter of the last five years. Of the 268 deaths, 105 occurred in Leinster, 44 in Munster, 104 in Ulster, and 15, only, in Connaught. There are 10 Unions in each of which 5 or more deaths from whooping-cough were registered, the total number for these Unions amounting to 187 or 70

* See note (†) on page 97.

per cent. of the gross number for Ireland. The Unions referred to include Ballyshannon, in which there were 24 deaths, equivalent to an annual rate of 4·1 per 1,000 of the population at all ages; Belfast with 42 deaths; Dublin North with 35 deaths; Dublin South with 24; New Ross with 26 deaths (22 of which were in the Urban Sanitary District of New Ross, a mortality representing an annual rate of 15 per 1,000 of the population); and Waterford where there were 13 deaths.

Diphtheria caused 83 deaths, being 11 over the average for the corresponding quarter of the last five years, but 9 under the number for the first quarter of this year. There are 4 Unions in each of which 5 or more deaths from this disease were registered, viz.:—Ballymena, where there were 11 deaths; Ballymoney, 6 deaths; Belfast, 9; and Londonderry, 5. The total number for the province of Leinster is 20; for Munster, 6; for Ulster, 56; and for Connaught, 1.

Simple continued and ill-defined Fever.—The number of deaths returned under this heading is 41, being 8 over that for the preceding quarter, but 22 or 35 per cent. under the average for the second quarter of the last five years; 8 (5 of which were in Dublin South Union), occurred in Leinster; 10 in Munster (including 5 in Cork Union); 12 in Ulster; and 11 in Connaught.

Enteric Fever.—The mortality from enteric fever shows a large decline as compared with the returns for the preceding quarter, and is also considerably below the average for the second quarter of the last five years, the number of deaths from this cause being 128 or 65 under the number for the quarter ended 31st March last, and 22, or 15 per cent. below the average for the second quarter of the five years 1888–92. Close on one-third of the total number of deaths from enteric fever occurred in the Dublin Registration District, where there were 40 fatal cases of the disease. Of the 88 deaths outside of the Dublin District, 14 occurred in Belfast Union, but in no other Union did the deaths amount to 5, and there are 104 Unions in which no deaths from the disease were recorded. The total number for the province of Leinster was 53; for Munster, 22; for Ulster, 44; and for Connaught, 9.

Diarrhoea caused 258 deaths, being 50, or 24 per cent. in excess of the average for the corresponding quarter of the last five years. The increase in the mortality from this cause occurred in the Dublin Registration District and the City of Belfast, in the former of which there were 46 deaths from diarrhoea, and in the latter 78, this number being equal to an annual rate of 1·2 per 1,000 of the population of the City. The total number of deaths from diarrhoea in Leinster was 71; in Munster, 37; in Ulster, 133; and in Connaught, 12.

Simple Cholera.—Three deaths from this disease were registered, one in each of the three provinces of Leinster, Munster, and Ulster.

Hydrophobia.—One death from hydrophobia was registered; it occurred in Munster.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in two districts, Chicken-pox in 4, measles in 70, scarlatina in 40, whooping-cough in 33, diphtheria in 12, fever in 39, (typhus 13, enteric 24, and simple continued fever 2), and influenza in 25.

Inquests.—There were 515 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 39 of the total deaths registered.

In Leinster there was 1 inquest to every 32 deaths registered, in Munster 1 to 45, in Ulster 1 to 40, and in Connaught 1 to 56.

Deaths in Public Institutions.—Of the 20,306 deaths registered during the quarter, 3,164, or 15·6 per cent. occurred in public institutions. In Leinster the percentage was 22·5, in Munster 18·2, in Ulster 9·3, and in Connaught 11·5.

The following table (TABLE IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1893, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population :—

| PERIOD. | Total Deaths registered. | Deaths from Principal Zymotic Diseases. | | | | | | | | | | | Percentage of Total Deaths. | Number in every 100,000 of the Population. |

URBAN SANITARY DISTRICTS.

Separate statistics for the Urban Sanitary Districts are given in Table V.

The death-rate for last quarter in these districts, which comprise a population of nearly one-fourth of the total of the country, was 23.0, and the birth-rate 30.8 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 15.5 and the birth-rate 22.0 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Sanitary Districts during the quarter was 2.3 per 1,000 of the population, according to the Census of 1891: in the remainder of the country the rate was 0.7 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1893, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—"The Dublin Registration District," which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the fifteen Urban Sanitary Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the thirteen weeks ending Saturday, 1st July, 1893.

‡ The rates for Belfast have been calculated on the population estimated in the middle of the year 1893.

VACCINATION.

According to the Returns of Vaccination received for the second quarter of the year 1893, there were 29,459 persons successfully vaccinated; in 3,046 cases the operation was postponed, and 38 children were reported as insusceptible of vaccination. The deaths of 1,467 unvaccinated children under 3 months old were registered during the quarter, making a total of 34,010 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th June last, was 23,879 (11,913 males and 11,966 females), being 5,673 less than in the corresponding quarter of 1892, and 13,733 under the average number for the second quarter of the ten years 1883-92.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June, in 1892 and 1893:—

| MONTHS. | NUMBER OF EMIGRANTS. | | | | | | | | |
|---------|----------------------|--------|-----------|----------|--------|-----------|--------|--------|-----------|
| | Males. | | | Females. | | | Total. | | |
| | 1892. | 1893. | Decrease. | 1892. | 1893. | Decrease. | 1892. | 1893. | Decrease. |
| April. | 6,431 | 5,383 | 1,048 | 6,009 | 5,381 | 628 | 12,440 | 10,764 | 1,676 |
| May. | 5,717 | 4,304 | 1,413 | 5,928 | 4,422 | 1,506 | 11,645 | 8,726 | 2,919 |
| June. | 2,686 | 2,226 | 460 | 2,781 | 2,163 | 618 | 5,467 | 4,389 | 1,078 |
| Total. | 14,834 | 11,913 | 2,921 | 14,718 | 11,966 | 2,752 | 29,552 | 23,879 | 5,673 |

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf last quarter was 6d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of 1892 the average price was 6½d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 6d. per cwt., against 15s. 5d. for the corresponding quarter of 1892. In the second quarter of 1883 the average price was 17s. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. 9d. to 4s. In the second quarter of 1892 the average prices were 1s. 10d. to 2s. 11d., and in the corresponding quarter of 1883 they were 5s. 4d. to 6s. 1d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 45s. to 61s. per cwt. In the corresponding quarter of 1892 the average prices were from 47s. 6d. to 61s., and in the second quarter of 1883 they were from 72s. 6d. to 81s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 17s. per ton.

The highest price of 2¾ per cent. Consols at the Dublin Stock Exchange for the quarter was £99¾, and the lowest £97¾. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which stood at 3½ per cent. at the close of the preceding quarter, was raised to 4 per cent. on 4th May, and to 4½ per cent. on 18th May, and reduced to 4 per cent. on 8th June, and to 3½ per cent. on 15th June.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1893 was 40,683, or 212 under the average for the corresponding period in 1892.

The average weekly number of persons receiving out-door relief during the quarter was 58,831, being 2,181 under the average for the second quarter of 1892.

Of the persons receiving in-door relief during the second quarter of 1893, an average number of 1,152 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1892 the average weekly number was 1,162.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1893, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

| PERIOD. | Average PRICES OF PROVISIONS. | | | | | | | | PAUPERISM. | |
|----------------------------------|-------------------------------|-----|--|---|--------|---|---------|-------------------------------|------------|---------|
| | BREAD (4lb. Loaf) | | OATMEAL (Corn Exchange), per Cwt. 1st quality. | POTATOES (at Potato Market), per Cwt. | | BEEF (at the Dublin Cattle Market), per Cwt. | | NUMBER OF PERSONS RELIEVED | | |

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

(c) Messrs. Manders and Co.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park,

* Latitude 53° 21' 44'·65" north; longitude 6° 21' 6'·35" west. Height above the sea 162·2 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

Dublin, during the second quarter of the years 1888-93, respectively, furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 104):—

The mean height of the barometer during the second quarter of 1893 was 30·077 inches, against an average of 29·921 inches for the corresponding quarter of the five years 1888-92; the highest reading (30·589 inches) was on the 8th April, at 9 A.M., wind E.N.E.; and the lowest (29·346 inches) on the 28th June, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 53·3°, against an average of 50·0° for the second quarter of the five years 1888-92. The maximum temperature was 76·4°, and the minimum 27·7°. The maximum heat in sun was 132·6°, and the minimum on the grass 19·0°.

Rain or snow fell on 28 days during the quarter. The rain-fall measured 4·930 inches, against an average of 5·977 inches for the second quarter of the five years 1888-92. The greatest monthly rain-fall was in May, when 2·145 inches were registered.

The wind blew on 30 days from E., on 29 days from W., on 10 days from S.E., on 5 days each from N., N.E., and N.W., on 4 days from S.W., on 1 day from S., and the air was calm on 2 days at 9 A.M.

April.—The mean height of the barometer during this month was 30·177 inches; the highest reading (30·589 inches) was on the 8th, at 9 A.M., wind E.N.E.; and the lowest (29·843 inches) on the 19th, at 9 A.M., wind S.E. The mean temperature of the air was 48·4°, the maximum registered was 66·9°, and the minimum 27·7°. The 20th was the warmest day, and the 14th the coldest night. The mean of the dry bulb was 48·3°, and of the wet bulb 45·7°. The maximum heat in sun was 123·4°, and the minimum on the grass 19·0°. The minimum on the grass was below 32° on 17 nights. The total amount of sunshine recorded was 235·8 hours, the greatest daily amount being 12·5 hours on the 25th. The maximum ozone was ·9, the minimum ·1, and the mean ·5. Rain or snow fell on 6 days. The rain-fall measured ·780 inch; the greatest amount in 24 hours was ·300 inch on the 16th.

May.—The mean height of the barometer during this month was 30·045 inches; the highest reading (30·459 inches) was on the 10th, at 9 A.M., wind E.; and the lowest (29·425 inches) on the 19th, at 9 P.M., air calm. The mean temperature of the air was 54·2°, the maximum registered was 71·4°, and the minimum 36·8°. The 11th was the warmest day, and the 10th the coldest night. The mean of the dry bulb was 54·1°, and of the wet bulb 51·2°. The maximum heat in sun was 128·4°, and the minimum on the grass 28·2°. The minimum on the grass was below 32° on 3 nights. The total amount of sunshine recorded was 174·9 hours, the greatest daily amount being 13·3 hours on the 9th. The maximum ozone was ·9, the minimum ·1, and the mean ·5. Rain fell on 10 days. The rain-fall measured 2·145 inches; the greatest amount in 24 hours was 1·030 inches on the 20th.

June.—The mean height of the barometer during this month was 30·009 inches; the highest reading (30·407 inches) was on the 7th, at 9 A.M., wind N.E.; and the lowest (29·346 inches) on the 28th, at 9 A.M., wind S.W. The mean temperature of the air was 57·3°, the maximum registered was 76·4°, and the minimum 39·0°. The 19th was the warmest day, and the 2nd the coldest night. The mean of the dry bulb was 58·4°, and of the wet bulb 55·0°. The maximum heat in sun was 132·6°, and the minimum on the grass 30·4°. The minimum on the grass was below 32° on 1 night. The total amount of sunshine recorded was 218·2 hours, the greatest daily amount being 14·2 hours on the 18th. The maximum ozone was 1·0, the minimum ·2, and the mean ·6. Rain fell on 12 days. The rain-fall measured 2·005 inches; the greatest amount in 24 hours was ·570 inch on the 26th.

* At Valencia cloud amount is observed at 10 a.m. and 10 p.m. each day, and rainfall at 10 a.m.

NOTE.—From the beginning of the year 1890 the mean pressures shown in these tables have been given therefore they are not directly comparable with each other. If it be desired for any purpose to reduce temperature) are as follows:—Valencia +·059; Killarney, +·102; Birr Castle, +·191; Dublin

mentioned Eight IRISH STATIONS, in connexion with the METEOROLOGICAL OFFICE, kindly furnished by the METEOROLOGICAL COUNCIL.

At this Station Greenwich mean time is kept, but at the other Stations Local time is observed, corrected for instrumental error, and reduced to 32° Faht. as before, but not reduced to mean sea level, and them to the normal, the approximate corrections for the purpose (varying within slight limits with the pressure and City), +.059, *Markree Castle*, +.141; *Armagh*, +.234; *Brookeborough*, +.283; *Londonderry*, +.090.

| | | | | | | | | 1893 | 4,615,190 | 2,279,169 | 2,336,021 |

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-93.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

MARRIAGES Registered during the Quarter ending 31st March, 1893, in the PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th June, 1893; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHOEA, and CHOLERA; also VIOLENT DEATHS,* INQUEST CASES, and DEATHS in PUBLIC INSTITUTIONS, Registered during the Quarter ending 30th June, 1893, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

| Provinces and Counties. | Area, in Statute Acres. | Popu- lation in 1891. | Marriages. | | Births. | | Deaths. | | The Deaths registered during the Quarter are stated by the Registrars to include | | | | | | | | | | | | | | Vaccination Return for the Quarter ending 30th June, 1893. | | | | | |
|-------------------------|-------------------------|-----------------------|---|---|---|---|-------------------------------|--------------------------------------|--|----------|-------------|---------|-----------------|-------------|--|----------------|------------|----------|---|--|--|-------------------------|--|----------------|----------------------------------|-------|--------|--------|
| | | | Averages in the Quarters ending 8 years, 1888-92. | Registered in the Quarter ending 30th June, 1893. | Averages in the Quarters ending 8 years, 1888-92. | Registered in the Quarter ending 30th June, 1893. | Children under 1 year of age. | Persons aged 60 years and up- wards. | Deaths from | | | | | | | | | | Number of Cases in which Vaccination was postponed. | Number of Persons inappreciable of Vaco- cination. | Number of Unvaccinated Children under 3 months old, whose deaths were registered during the quarter. | Total of the foregoing. | | | | | | |
| | | | | | | | | | Small-pox. | Measles. | Scarlatina. | Typhus. | Whooping-cough. | Diphtheria. | Simple continued and ill-defined fevers. | Enteric Fever. | Dysentery. | Cholera. | | | | | Violence.* | Inquest Cases. | Deaths in Public Insti- tutions. | | | |

**PROVINCE OF
MUNSTER.**

Clare.

[illegible]

Cork.

[illegible]

* Owing to alterations of the Boundaries of the Districts marked (*) on pages 110, 122, 124, 127, 162, 166, 167, 168, and 169, consequent on the re-distribution of the area comprised in the Superintendent Registrar District of Donaghmore, which ceased to exist on 1st January, 1887, the "averages" entered for them are only approximations.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES—continued.

| COUNTIES | Area, in Statute Acres. | Popu- lation in 1891. | Deaths. | | The Deaths registered during the Quarter are stated by the Registrars to include | | | | | | | | | | Vaccination Return for the Quarter ending 30th June, 1893. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

* The Registrars' Districts (799 in number) are Subdivisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on page 119 and 120 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 2nd April to 1st July, 1893. With the exception of 94 deaths of persons from localities outside the "Dublin Registration District," the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

The letter W denotes that the Registrar's District (or portion of a district) contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

The letter W denotes that the Registrar's District (or portion of a district) contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

ABSTRACT III.—REGISTRARS' DISTRICTS ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

I. PROVINCE OF LEINSTER—continued.

| Area, in Statute Acres. | | | Popu-lation in 1891. | | Deaths. | | The Deaths registered during the Quarter are stated by the Registrars to include | | | | | | | | | | | | | Vaccination Return for the Quarter ending 30th June, 1892. | | | | | | | | | | | | | | | | | | | |

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District or portion of District in the County.

I. PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Killegan, part of.*—Very virulent diphtheria, rapidly fatal. Infection appears to have lain dormant for over four months, and to have been traced to a relative who wore patients' clothes; at that time suffering herself from diphtheria in Dublin.

CARLOW; *Carlow, part of, W.*—The district has been in a fairly healthy condition during the quarter. Two deaths from influenza were registered. Diarrhoea has prevailed to a large extent during the past few weeks.

CARLOW; *Fennagh and Myshall.*—Measles prevalent.

CARLOW; *Leighlinbridge.*—Measles prevalent.

SHILLELAGH; *Coolkenna and Hacketstown, part of.*—With the exception of an epidemic of whooping-cough, the health of the district has been remarkably good during the quarter.

Dublin County.

BALROTHERY; *Swords.*—Measles was prevalent during the past three months, but did not in any instance prove fatal. The poorer class of people cannot be dissuaded of the impropriety of giving their children doses of stimulants during their illness from measles, and in many cases, consider it quite unnecessary to seek medical aid, in their belief that in alcohol (diluted) is centred the only remedy for treatment of measles. The number of vaccination cases is under average, owing to prevalence of measles.

NORTH DUBLIN; *Coolock and Drumcondra, No. 2.*—There has been an epidemic of typhoid fever at the Coastguard Station in Baldoyle, but as yet no deaths. The sewers are in an unsanitary state.

RATHDOWN; *Dundrum and Glencullen, No. 1.*—Influenza, mildest type, prevalent.

Kildare County.

ATHY; *Athy, W.*—The death of a man, aged 102 years, is registered this quarter.

ATHY; *Castledermot.*—With the exception of a couple of isolated cases of scarlatina, this district has been wholly free from epidemic disease during past quarter.

EDENDERRY; *Carbury.*—No vaccination owing to a great many cases of measles, all mild. District otherwise healthy.

NAAS; *Newbridge.*—There has been an outbreak of measles of a mild type during the quarter. The number of vaccinations was, on this account, small.

Kilkenny County.

CALLAN; *Callan, W.*—A few cases of scarlatina have lately appeared in the district.

CASTLECOMER; *Ballyragget.*—Scarlet fever (4 cases) appeared in the town of Ballyragget during the past quarter.

KILKENNY; *Tullaroan.*—Vaccination postponed during May and part of June, owing to the prevalence of scarlet fever, which was, however, of a mild type, there being no fatal cases. The sanitary condition of the district is fairly good, with the exception of Tullaroan village, the drainage of which is defective as regards several houses.

NEW ROSS; *Dysartmoon.*—The following ages are registered amongst deaths for past quarter—92, 92, 88, 88 years. District is healthy, but we have had a lot of measles. Consequently, vaccinations are not as high as they otherwise would have been.

THOMASTOWN; Inistioge.—There is an epidemic of measles in my district, nearly every child has had it. It is of a very mild type, and I am happy to say there has been no death. I closed four schools.

THOMASTOWN; Knocktopher. — There were seven cases of scarlatina during the quarter.

King's County.

EDENDERRY; Edenderry, W. — Some cases of mild form of measles.

EDENDERRY; Rhode.—An epidemic of measles; five cases of typhoid; several cases of English cholera; and a large number of persons suffering from diarrhoea.

PARSONSTOWN; Frankford.—Whooping-cough rather prevalent in district. All deaths over 60 years—two 80; two 82; one 84; one 78 years.

ROSCREA; Roscrea, No. 1, part of.—One case of hydrophobia occurred in County Tipperary which proved fatal on fifth day. The man was bitten on uncovered hand six weeks previously. The attack commenced with nervous depression and pain shooting up arm of bitten hand, and terminated in wild mania, with spasms and profuse salivation; water, cold air, or noise, produced respiratory spasm.

TULLAMORE; Tullamore, W.—Influenza of a mild type prevalent during first part of quarter. Whooping-cough at present general in town, district otherwise healthy.

Longford County.

GRANARD; Street, part of.—Tonsillitis in a severe form has been epidemic.

LONGFORD; Longford, W.—During the quarter eight cases of typhoid fever came under my own personal observation. The several patients were removed to the Workhouse Fever Hospital and there recovered. Two cases of scarlet fever were also removed from the district to the Fever Hospital with the same happy result. The Sanitary Authority are still using their best endeavours to improve the health of the town, and are at present getting the slaughter-houses closed, they being considered dangerous to the public health; an abattoir has been provided for the slaughtering of cattle, through the philanthropy of Lord Longford.

Louth County.

DROGHEDA; St. Mary's, part of. — Influenza still prevails in the district; six deaths from it have been registered during the past three months.

DROGHEDA; Termonfeckin.—Whooping-cough has been prevalent during the quarter.

DUNDALK; Barronstown, part of.—During the quarter measles followed by chicken-

pox prevailed amongst children, also whooping-cough; the death rate for quarter is much below the average, one of the entries is that of a man aged 105 years.

DUNDALK; Dundalk, W.—We have had a severe epidemic of measles, but disease has now almost disappeared. In view of the possibility of cholera visiting Ireland much sanitary work has been done during last three months. An intercepting hospital with complete outfit has been erected. The new sewerage system (commenced two years ago) is being completed. All unsanitary dwellings have been reported, and owners compelled to put them in as good order as possible, plenty of limewash being used on the smaller houses. A large number of common privies have been closed and water-closets erected instead. The water supply notwithstanding drought is abundant and shows no sign of failure.

DUNDALK; Louth, part of.—Measles has been prevalent in and around the town of Louth during past quarter, and many of the cases were complicated with acute bronchitis. One with severe diphtheritic croup (throat, larynx, and parts around were covered with membrane), a second with ordinary croup—both made a good recovery. The dwellings in which these complications occurred were filthy, foul smelling and badly ventilated; matters have been remedied since. It is my opinion that want of cleanliness, bad ventilation, etc., were the chief factors in causing those serious complications. One death registered from whooping-cough, a child 19 days. A second from supposed croup, a child seven years old. No medical attendant in those cases. A third from spasmodic croup and acute capillary bronchitis (certified), seven years old, in both these croup cases I visited the dwellings after being informed of the deaths and I found in and around a filthy condition, and bad ventilation. I attended at the end of this quarter one very severe case of acute and persistent diarrhoea (dysentery) from the effects of fruit.

DUNDALK; Ravensdale.—Measles very prevalent during the quarter, but no deaths. Health of district good.

Meath County.

DROGHEDA; St. Mary's, part of, W.—See note under head of Louth County.

DROGHEDA; Stamullen.—I have had several cases of influenza during the quarter; otherwise district healthy. Water supply and sanitary state fairly satisfactory.

DUNSHAUGHLIN; Ratoath, W.—Some cases of influenza with lung trouble. One death, man aged 72 years.

KELLS; Kilskeer.—Measles of a very mild type was prevalent in part of this district during the last quarter. In two or three cases only were there complications calling for medical treatment. No deaths.

NAVAN; *Painestown*.—The number of children vaccinated during quarter is much below the average, owing to the prevalence of measles. District is otherwise healthy.

TRIM; *Summerhill*.—Six cases of typhoid have occurred amongst one family; the origin supposed to be bad water. No deaths—although severe and prolonged.

Queen's County.

ABBEYLEIX; *Ballinakill*.—Two cases of scarlatina occurred in district, not proving fatal in either case.

ABBEYLEIX; *Castletown*.—Scarlet fever is prevalent in the district at present.

CARLOW; *Carlow*, part of.—See note under head of Carlow County.

ROSCREA; *Roscrea*, No. 1, part of.—See note under head of King's County.

Westmeath County.

BALLYMAHON; *Ballymore*.—During the quarter I registered the death of a woman, aged 105 years. She distinctly remembered some of the stirring scenes enacted in 1798. A case of measles occurred during the latter part of quarter in a child who was brought from Kilkenny—child died—death not yet registered.

DELVIN; *Delvin*, W.—The district is at present free from infectious or contagious diseases, and is generally healthy. Scarlatina was prevalent in April, and two cases of it proved fatal, owing to renal and pulmonary complications.

GRANARD; *Street*, part of.—See note under head of Longford County.

MULLINGAR; *Castletown Geoghegan*.—With the exception of an epidemic of measles, of a mild form, but complicated in a few cases with pneumonia, the district is free from zymotic disease. No death occurred from measles.

MULLINGAR; *Milltown*.—The births for the last quarter never were so few, being only 6. The deaths for last quarter were all very old, with the exception of three; ages 70, 81, 85, 76, 74, 70, 63, 70, 70, and 63 years.

MULLINGAR; *Mullingar*, W.—Health of this district fairly good. Some cases of measles.

Wexford County.

ENNISCORTHY; *Clonroche*.—Two deaths from influenza during the quarter.

ENNISCORTHY; *Enniscorthy*, No. 2, W.—A large number of cases of measles of a mild form, otherwise a remarkably healthy quarter.

GOREY; *Killenagh and Wells*.—There were about 17 cases of diphtheria, and a few cases of scarlet fever during the quarter. They have nearly disappeared.

NEW ROSS; *Fethard*, No. 1.—An epidemic of measles prevailed throughout the district for the past couple of months; two of the deaths registered as having been caused by the disease were uncertified. The presence of the epidemic interfered considerably with the number of children presented for vaccination.

NEW ROSS; *Fethard*, No. 2.—The epidemic of measles has almost disappeared. No case of diarrhoea or any choleraic affections reported throughout district, which is free from sickness in general, notwithstanding the violent heat.

WEXFORD; *Bannow*.—Measles and whooping-cough continue very prevalent.

WEXFORD; *Wexford*, W.—Measles was prevalent during April and May.

Wicklow County.

BALTINGLASS; *Kiltegan*, part of.—See note under head of Carlow County.

RATHDOWN; *Delgany*.—Deaths at advanced ages were respectively:—72, 64, 89, 76, 65, and 67 years. There were six cases of typhoid fever (private practice) in district during quarter. No deaths.

RATHDOWN; *Powerscourt*.—Three deaths registered; age, 80, 83, and 89 years.

RATHDRUM; *Arklow*.—The two cases of diphtheria were in the same family. The disease did not spread further.

RATHDRUM; *Newcastle*.—District free from epidemic disease at present. In the beginning of quarter there was one case of scarlet fever in a house with large family of children, but, owing to the precautions taken, it did not spread.

RATHDRUM; *Wicklow*.—Scarlatina has been prevalent during the quarter.

SHILLELAGH; *Coolkenna & Hacketstown*, part of.—See note under head of Carlow County.

II. PROVINCE OF MUNSTER.

Clare County.

CORROFIN; *Corrofin*, W.—Health of district good. There were three cases of diphtheria, two of which proved fatal, all in one family. I could discover no satisfactory cause for the outbreak, which fortunately did not spread.

ENNISTIMON; *Milltown Malbay*.—Whooping-cough and measles have now completely disappeared. There is not (as far as I know) a single case of any kind of contagious or infectious disease in district. The continued drought has been very much felt, still no kind of sickness has turned up. The water supply has been fairly abundant up to date.

KILRUSH; *Carrigaholt*.—Except a few cases of influenza, health of district good.

KILRUSH; Kilrush, W.—One death from typhus fever. The case was thoroughly isolated, and after death every precaution taken to prevent spread of disease.

Cork County.

BANTRY; Durrus and Kilcrohane.—Registered three deaths of persons between the ages of 70 and 80 years, and four deaths of persons aged 80 years and upwards.

CASTLETOWN; Kilcatherine.—Influenza has been prevalent during this quarter; and some deaths have been registered from it; it has interfered with vaccination.

CLONAKILTY; Timoleague.—In consequence of the existence of fever in the district no vaccinations have been performed during the past quarter; it has however now been commenced.

CORK; Cork, No. 3.—Sanitary arrangements of district very primitive. Typhus and typhoid fever very prevalent during the quarter.

KANTURK; Kanturk, W.—Measles very prevalent.

KANTURK; Newmarket.—Two children died probably from whooping-cough, and one probably from diphtheria. Neither had been seen by a medical man.

KILMALLOCK; Charleville, part of.—We had an epidemic of measles.

MACROOM; Macroom, W.—Whooping-cough has been very prevalent during last quarter, complicated in many cases with pneumonia. In other respects the district is very healthy.

MALLOW; Ballyclogh.—Measles prevalent during the quarter with chest affections in a great number of cases; otherwise district healthy. One case of typhoid fever with pneumonia recovered.

MALLOW; Kilshannig.—The death of a woman aged 103 is registered; her son who is 73 years, who registered the death, is sure that the age is correctly stated. The deaths of six persons are registered, the average age being 87 years.

MALLOW; Rahan.—There have been some cases of typhoid fever, chiefly amongst children.

MIDDLETON; Middleton, No. 1, W.—Ninety-six cases of defaulters under the Vaccination Acts were returned by me on 1st July to the Board of Guardians. I believe that if some prosecutions were instituted, parents would bring in their children much more readily for vaccination.

MIDDLETON; Walshtownmore, East.—Measles during the past quarter was very

prevalent in the eastern portion of the district, there was no fatal case.

MITCHELSTOWN; Kildorrery.—During the past month some cases of measles occurred. In May there were some cases of severe diarrhoea.

MITCHELSTOWN; Mitchelstown, part of, W.—Sanitary arrangements in the town not satisfactory. The district very healthy.

SKIBBEREEN; Tullagh.—District healthy, except that pertussis (whooping-cough) prevails in portion of it.

SKIBBEREEN; Unionhall.—Whooping-cough is very prevalent in the maritime portion of the district at present. The children, on that account, are not brought in for vaccination as plentifully as may be desired.

Kerry County.

CAHERSIVEEN; Glanbehy.—One death from whooping-cough and 2 from influenza were registered.

DINGLE; Anascaul.—There were 7 cases of enteric fever in the district during the quarter; in three of these cases pneumonia occurred as a complication. The sanitary condition of the district is improved.

DINGLE; Dingle, W.—The district has been very healthy for the last three months, with the exception of a few cases of influenza complicated with pneumonia.

DINGLE; Ventry.—Four deaths from influenza registered this quarter, and one from puerperal fever.

KILLARNEY; Coom.—Influenza prevalent during the quarter, one fatal case, not yet registered.

KILLARNEY; Killarney, No. 1, W.—Measles commencing to spread in urban portion of district.

KILLARNEY; Killarney, No. 2.—During the month of June, choleraic diarrhoea was very prevalent in the urban portion of the district; every class seemed to suffer equally, and I could not trace the cause in most of the cases. Measles of a mild type is now very prevalent.

LISTOWEL; Ballyduff.—There has been an epidemic of typhoid fever in part of the district during the past quarter, two deaths occurring, which have not yet been registered. The disease is now dying out, only one patient having it at the present time, and no fresh case has occurred for the past fortnight.

LISTOWEL; Ballyhorgan.—Increased attention paid to a supply of pure drinking water.

LISTOWEL; Ballylongford.—Measles has made its appearance. The epidemic being mild, but prevented a number of children from been vaccinated, who would otherwise have been brought in.

LISTOWEL; *Listowel, W.*—Vaccination was postponed during the past quarter, owing to the prevalence of rubella (measles) in the district.

LISTOWEL; *Tarbert, No. 1, part of.*—Vaccination had to be postponed, in consequence of the extreme heat.

TRALEE; *Ardfert.*—Several cases of influenza, with ulcerated throat, in commencement of the quarter; 12 cases of typhus fever at Kerryhead, during last month; no fresh cases for the last ten days. The water supply in Ardfert and O'Dorney, is very bad.

TRALEE; *Castlemaine.*—District healthy; sanitary condition fair. One case of typhus. The case was isolated, and the disease did not spread.

Limerick County.

CROOM; *Castletown.*—The fear of an epidemic of small-pox in this district has been more effectual than all the laws relating to vaccination in having children brought in to be vaccinated this quarter.

KILMALLOCK; *Bruff.*—Phlegmonous tonsillitis prevalent. Some cases of chicken pox and German measles.

KILMALLOCK; *Bruree.*—Had some cases of summer diarrhoea. Measles of a mild kind prevalent.

KILMALLOCK; *Charleville, part of.*—See note under head of Cork County.

KILMALLOCK; *Kilfinnane.*—The births include a case of triplets—three little girls weighing in all about 22 lbs. One died after ten days; the other two are well and strong.

KILMALLOCK; *Kilmallock, W.*—Measles prevalent in district during last month of quarter.

LIMERICK; *Caherconlish.*—An epidemic of measles occurred during the quarter, of a rather severe type. There were three cases of typhus, one of which I sent to hospital, the others doing well at home.

LIMERICK; *Limerick, No. 1.*—Measles and scarlet fever (both of mild type) have begun to appear.

LISTOWEL; *Tarbert, No. 1, part of.*—See note under head of Kerry County.

LISTOWEL; *Tarbert, No. 2.*—I have to report the appearance of measles and whooping-cough in the southern portion of the district. Whooping-cough caused 2 deaths, and measles 1. These diseases now appear to be on the decline.

MITCHELSTOWN; *Galbally.*—The sanitary arrangements in the villages of Galbally and Ballylanders not very efficient, but steps are being taken to remedy these defects. Measles has broken out in a part of the district, and there are different isolated cases of scarlatina. Both epidemics are of a mild type. There are two or three

cases of whooping-cough, and a few cases of ill-defined fever.

MITCHELSTOWN; *Mitchelstown, part of.*—See note under head of Cork County.

NEWCASTLE; *Ardagh.*—Measles prevalent in district of a mild type.

NEWCASTLE; *Newcastle, W.*—Have both measles and small-pox in district, many cases of former, only three of the latter. No death from either.

RATHKEALE; *Askeaton.*—Pertussis (whooping-cough) is appearing in the district.

RATHKEALE; *Rathkeale, No. 1, W.*—Whooping-cough and measles very prevalent.

RATHKEALE; *Rathkeale, No. 2.*—There was an outbreak of measles and pertussis (whooping-cough) during the last quarter of a mild type.

RATHKEALE; *Shanagolden.*—Whooping-cough of a mild type prevalent in district; no death therefrom.

TIPPERARY; *Grean, part of.*—During the quarter there have been several cases of measles, also some cases of chicken-pox, and a few cases of a mild form of scarlatina. In no instance have any of above cases proved fatal. The typhus fever case registered in this quarter occurred early in March last.

Tipperary County.

CASHEL; *Killenaule.*—The death of a man, whose age was stated to be 112 years, was registered. His memory was quite correct up to two years ago; he had perfect recollection of the great events of the early part of the present century. The deaths of a woman aged 90 years, two people over 80, and three over 70, were also registered.

CASHEL; *Kilpatrick.*—There are three cases of rheumatic fever under treatment, also three cases of dysentery, one of which is not in the district. I intend sending water for analysis. Some cases of enteritis which I attribute to eating unripe fruit and cold.

CLONMEL; *Clonmel, W.*—With the exception of a few cases of measles, the district is quite free from zymotic diseases.

PARSONSTOWN; *Riverstown.*—One case occurred like influenza.

ROSCREA; *Roscrea, No. 1, part of.*—See note under head of King's County.

THURLES; *Borrisoleigh.*—Some of the streets of Borrisoleigh are in a very unsanitary state.

THURLES; *Thurles, W.*—Two cases of typhus fever of a mild type treated during quarter.

TIPPERARY; *Grean, part of.*—See note under head of Limerick County.

Waterford County.

CLONMEL; *Ballymacarbray*.—A mild epidemic of measles is passing over the district.

DUNGARVAN; *Dungarvan, W.*—Vaccination short, due to epidemic of measles.

DUNGARVAN; *Ringville*.—The deaths of a man and wife, whose united ages reached 180 years, a rare instance of joint longevity, have been registered. They died within a few hours of each other.

DUNGARVAN; *Seskinan*.—Two cases of typhoid fever of a mild type during the quarter. Measles prevalent in the district.

DUNGARVAN; *Whitechurch*.—There were three cases of typhoid fever in district during the quarter.

KILMACHTHOMAS; *Kilmachthomas, W.*—Some cases of influenza of a mild form occurred, in a few instances complicated with pulmonary congestion. One death from measles, which I suspect was imported, as I have not heard of another case. Water supply, so frequently reported by me, still not restored to this village, and is exactly in the same state as when months ago I first called attention to it.

WATERFORD; *Waterford, No. 2.*—Measles very prevalent during quarter.

WATERFORD; *Woodstown*.—Measles prevalent during the quarter.

III. PROVINCE OF ULSTER.**Antrim County.**

ANTRIM; *Randalstown*.—Influenza has been prevalent during the quarter. Only one case terminated fatally, owing to heart complication.

BALLYCASTLE; *Croagh*.—The sanitary arrangements are fairly good. There were two deaths from typhoid fever at different parts of the district, and no connection whatever, and no spread of the disease.

BALLYMENA; *Glenuhirry*.—There has been an epidemic of measles in one part of the district, and whooping-cough in another, but no fatal cases.

BALLYMENA; *Toome*.—A few cases of influenza with chest complications occurred during the quarter.

BELFAST; *Belfast, No. 7*.—The death of a woman was registered during the quarter aged 100 years and 5 months.

LISBURN; *Glenavy*.—Two cases of diphtheria occurred in the houses in which some children were attacked during the first quarter of this year, showing the tenacity of the infection.

Armagh County.

ARMAGH; *Blackwatertown*.—Whooping-cough and measles have been prevalent. I have heard of some cases of scarlatina. There was one case of typhus.

ARMAGH; *Keady*.—There have been a few cases of scarlatina in the district, and also some of measles during the past quarter.

ARMAGH; *Markethill*.—Measles of a mild kind has been prevalent during the past quarter, otherwise district healthy.

ARMAGH; *Rich Hill*.—The district is in a fairly healthy condition. There have been several sanitary reports made, but the people happily are inclined themselves to fall in with any sanitary arrangements suggested.

CASTLEBLAYNEY; *Newtownhamilton, part of*.—Measles of a mild type has been prevalent during the latter part of the quarter. Two deaths from scarlet fever, which was pretty prevalent. During the late drought the inhabitants were very badly off for water, most of the wells and pumps having gone dry, and the supply depended almost entirely on private pumps and wells.

DUNDALK; *Barronstown, part of*.—See note under head of Louth county.

LURGAN; *Lurgan, No. 1, part of, W.*—An old woman died in the workhouse at the reputed age of 111 years.

NEWRY; *Forkill*.—Measles very prevalent.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—I have made (in conjunction with sub-sanitary officer) a house-to-house inspection of the town. We found the houses and yards fairly clean, with some few exceptions, and in these cases I forwarded reports to the Board of Guardians as the Sanitary Authority.

BAILIEBOROUGH; *Termon*.—There is a small outbreak of scarlet fever, six cases having come under my notice, and I think there is more about that has never been treated by any medical practitioner, and which the people are trying to conceal.

CAVAN; *Killeshandra*.—Two deaths were registered from enteric fever. Cases of typhus prevailed sporadically through the district. No deaths registered from it.

CAVAN; *Stradone*.—There have been a great many cases of measles, scarlatina, and chicken-pox in district last quarter, and which prevented children being brought out for vaccination, so that the number vaccinated is less this quarter than this time twelve months.

COOTEHILL; *Drum, part of*.—The health of the district during the period of this return has been on the whole fairly good. There have been no further cases of diphtheria in the district. The epidemic of measles has now disappeared.

ENNISKILLEN; *Holywell, part of*.—The sanitary condition of this district has been somewhat improved during the past quarter. I have had two cases of enteric fever, and

one case of typhus fever since my last return. Whooping-cough still exists in a portion of the district.

Donegal County.

BALLYSHANNON; *Ballintra*.—Whooping-cough has been very prevalent. Sanitary arrangements fairly good; water supply deficient, a matter frequently reported.

BALLYSHANNON; *Ballyshannon, W.*—Whooping-cough was prevalent, but diminishing.

DONEGAL; *Dunkineely*.—Whooping-cough caused one death. One case of typhoid fever in April with recovery. District in general healthy. The custom of keeping manure heaps and cesspools in immediate proximity to dwelling houses still exists, and notices to abate the nuisance have been served on the worst offenders. The erection of the Dunkineely pumps not yet completed, and before the late rains the water supply in wells was failing fast owing to the drought.

DUNFANAGHY; *Gweedore*.—The health of the district for the quarter has been good, except a few cases of typhoid fever affecting three families and about ten persons. They are all convalescent now except one. I attribute it to their using river water, as owing to the long drought all the springs were dried up.

GLENTIES; *Dunglow*.—One death from typhoid fever has been registered during the quarter. A considerable number of typhoid cases have been attended by the Medical Officer, but of a mild type; the disease has not yet disappeared.

INISHOWEN; *Moville*.—Amongst the deaths registered are seven persons over 80 years, including one (a woman) aged 101 years.

LETTERKENNY; *Letterkenny, W.*—Measles was epidemic in urban district during April.

MILLFORD; *Fanad*.—There were some cases of scarlatina in the district during the past quarter, but no deaths from it.

MILLFORD; *Rathmullan*.—Our water supply has kept good and abundant, notwithstanding the drought. The rainfall for quarter was only 4.91 inches, a trifle over what fell in the 28 days of February, viz., 4.61 inches.

STRABANE; *Raphoe*.—No infectious diseases prevail in this district at present, with the exception of a few cases of influenza.

Down County.

BANBRIDGE; *Ballyward*.—Measles and whooping-cough still linger in the south-west side of the district. Some patients having both diseases at the same time, only one death from measles.

BANBRIDGE; *Crossgar*.—Sanitary state of the district fairly good. There have been a few cases of whooping-cough—one death taking place owing to a lung complication.

BANBRIDGE; *Dromore*.—There is very great scarcity of water for both man and beast, but fortunately no epidemic affecting either.

BELFAST; *Castlereagh, No. 1*.—Not more than the ordinary cases to meet, with the exception of choleraic diarrhoea amongst children, a few scattered cases of measles and scarlatina, three cases of diphtheria—in appearance an epidemic.

BELFAST; *Castlereagh, No. 2*.—There has been an extensive epidemic of scarlatina in the district, but of a mild type.

DOWNPATRICK; *Ballynahinch*.—There have been a few cases of scarlatina in the Dunmore division of the district, but it has been of a mild type, and there has been no fatal case. In other respects the district is fairly healthy.

DOWNPATRICK; *Downpatrick W.*—Four deaths registered during quarter are attributed to influenza. Some of the primary vaccinations were of children born out of district, two were aged nine and seven years respectively.

DOWNPATRICK; *Portaferry*.—One death registered at the age of 96 years.

LISBURN; *Ballylesson*.—One case of scarlatina has occurred, probably introduced from a suburban school. No other infectious disorder prevails, and the means adopted for isolation of the scarlatina patient have, for so far, been successful.

LISBURN; *Saintfield*.—Diphtheria has occurred in one family towards the end of the quarter, from which two of the children have died, the deaths are not yet registered. I consider the disease was contracted by the first child in Belfast. All the other members are isolated as far as possible. Happily genuine or real diphtheria is hardly ever with us here.

LURGAN; *Lurgan, No. 1, part of*.—See note under the head of Armagh county.

LURGAN; *Moir*.—The case of diphtheria was quite sporadic, and the patient fifty-two years of age.

LURGAN; *Waringstown*.—Scarlet fever has appeared in the district in the month of May. The cases have been mild, and there has been no death.

NEWRY; *Donaghmore*.—Two deaths at 88, one at 86, one at 95, one at 75, and one at 73 years of age were registered.

NEWTOWNS; *Comber*.—Influenza still prevails, but in a very mild form, otherwise health of district very good.

NEWTOWNS; *Greyabbey*.—Measles very prevalent in April, May, and June in Ballyhalbert, Ballywalter, and part of Greyabbey divisions. No death recorded.

Influenza especially amongst children, but a considerable number of adults too, general throughout the district; a few sporadic cases of whooping-cough have lately appeared. Three deaths from debility after influenza, chiefly heart failure. Four deaths from heart disease during heat wave in June.

Fermanagh County.

BALLYSHANNON; *Belleek*.—Vaccinations were postponed on account of an epidemic of whooping-cough which prevailed throughout the entire district during the quarter.

CLONES; *Rosslea, part of*.—Owing to the prolonged drought there has been a considerable scarcity of drinking water in the district, many of the wells having completely dried up. A good many old-standing vaccination defaulters were successfully vaccinated or otherwise accounted for during the quarter.

ENNISKILLEN; *Holywell, part of*.—See note under head of Cavan county.

IRVINESTOWN, *Ederney*.—Sanitary arrangements of the district fairly good, except in Kesh.

Londonderry County.

BALLYMONEY; *Kilrea*.—District at present healthy. Diphtheria was prevalent in a townland of this district, and two deaths resulted therefrom, with recovery in all the other cases. Vaccinations were fewer owing to postponements from bronchial affections, &c.

LIMAVADY; *Dungiven*.—Three cases of measles in the district during the past quarter of a mild character, imported from the city of Derry. No other infectious disease that I am aware of.

LONDONDERRY; *Claudy*.—A few cases of scarlatina during the quarter, of a very mild type. One death registered at the age of 101 years.

MAGHERAFELT; *Moneymore*.—No epidemic of any kind at present. The scarlatina cases which were in the district at the end of last quarter have died out. We had one public school closed for a month which seemed to have a good effect.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—Whooping cough is at present very prevalent.

CARRICKMACROSS; *Donaghmoynce*.—One family attacked by measles owing to the father having been in a house so infected some distance from home. Disease confined to the one house in district. A few cases of croup, and two deaths therefrom in beginning of quarter.

CARRICKMACROSS; *Raferagh*.—Nine parents failed to return on eighth day after vaccination; it is high impossible to have them attend with their children.

CASTLEBLAYNEY; *Ballybay*.—Three cases of typhoid fever were attended to during the quarter, happily none ending fatally. A few mild cases of scarlatina were seen during the early part of May, which fortunately did not spread.

CASTLEBLAYNEY; *Castleblayney, W.*—Scarlatina and diphtheria attacked a large number of children and a few adults in the town during the quarter. From the latter disease two deaths occurred. The water supply has been favourably reported on by Dr. Cameron, and several sanitary improvements have been effected.

CASTLEBLAYNEY; *Newtownhamilton, part of*.—See note under head of Armagh county.

CLONES; *Rosslea, part of*.—See note under head of Fermanagh county.

COOTEHILL; *Drum, part of*.—See note under head of Cavan county.

DUNDALK; *Louth, part of*.—See note under head of Louth county.

MONAGHAN; *Kilmore*.—A few cases of measles early in the quarter, also two cases of enteric fever. Drinking water has become very scarce, owing to continued dry weather. District at present very healthy.

Tyrone County.

ARMAGH; *Caledon*.—Whooping-cough prevalent in district, during current quarter. As yet only one death having occurred (catarrhal pneumonia), measles also appeared, but was confined to one family. Sanitary arrangements of district much improved.

CASTLEBERG; *Castleberg, W.*—About two months ago a severe attack of English cholera spread over the town, and part of country, which was most infectious, and prostrated a great number—but no deaths.

CASTLEBERG; *Drumquin*.—Scarlatina rather prevalent in this district, and for this reason I put off vaccination.

CLOHER; *Fivemiletown*.—Weather has been very hot during the quarter, and dry, and should rain not come soon, we will have a water famine.

COOKSTOWN; *Cookstown, W.*—There has been an outbreak of measles this quarter in the district, but no deaths recorded.

COOKSTOWN; *Stewartstown*.—There were about forty cases of influenza, some ended fatally. There were also some cases of scarlatina.

DUNANNON; *Coal Island*.—The mortality in the district is low for the quarter, especially when considering that four of the deaths registered, were of persons under four months, and 6 of persons aged 80 years and upwards.

OMAGH; *Drumquin*.—Scarlatina prevalent. Few deaths from it.

OMAGH; *Omagh, No. 1, W.*—During the early part of quarter, a large number of persons suffered from ulcerated throats. The drought has been very great. The sanitary condition of the district has been particularly looked after, during the last three months, and is now very good.

STRABANE; *Newtownstewart*.—District at present healthy. Two deaths from whooping-cough in May.

STRABANE; *Plumb Bridge*.—Water supply very deficient.

IV. PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Roundstone, No. 2*.—More of the children would have been vaccinated only for some skin disease which many of them have.

GLENNAMADDY; *Glennamaddy, W.*—Scarlatina was very prevalent in the district, though no death from it has been registered this quarter. The sanitary condition of the district is somewhat neglected.

GLENNAMADDY; *Williamstown*.—Typhoid fever of a mild type broke out in two villages of district during quarter.

GORT; *Gort, W.*—Four cases of typhoid fever have occurred in one family in the district. In one, a girl of 14 years, there was a relapse three weeks after her discharge from hospital. She is now convalescent after three weeks treatment in hospital.

LOUGHREA; *Bullaun*.—One death registered of a man whose age was recorded as 91 years.

OUGHTERARD; *Cloonbur, No. 1*.—Influenza has been prevalent during quarter.

Leitrim County.

BAWNEBOY; *Ballinamore*.—Scarlatina broke out amongst a few families in the district, two deaths are registered from it. The epidemic has now totally disappeared.

MANORHAMILTON; *Lurganboy*.—Three cases of enteric fever occurred, all recovered.

MANORHAMILTON; *Manorhamilton, W.*—A few cases of scarlatina have occurred in the district, and in one part whooping-cough is prevalent.

MOHILL; *Carrigallen*.—Measles was very prevalent during the quarter, and

scarlatina to a less extent. Otherwise the district has been healthy.

MOHILL; *Rowan*.—Measles somewhat prevalent, but no death therefrom.

Mayo County.

CLAREMORRIS; *Ballindine*.—A few cases of scarlatina occurred during the quarter.

KILLALA; *Killala, W.*—Two cases of small-pox occurred in May. They were immediately removed to hospital and isolated. No other case has since appeared in the district.

SWINEFORD; *Lowpark*.—Vaccination still very much neglected.

WESTPORT; *Achill*.—Influenza, generally speaking of a mild type, has prevailed for the past month. A good many cases of vaccination are recorded for this quarter, as I have attended at the outlying villages for that purpose, but very few are still brought to the dispensary for that purpose.

WESTPORT; *Ballycroy*.—Having typhus fever in the district I did not bring children for vaccinations. They now promise to come in, as they were scared of fever. Condition of the district very good, but a lot of poor people on relief list and in great destitution.

Roscommon County.

BALLINASLOE; *Creagh*.—Vaccination in a backward state.

CASTLEREAGH; *Castleplunket*.—Sanitary state of district fairly good. Slight epidemic of pertussis (whooping-cough) during the months of April and May.

STROKESTOWN; *Strokestown, W.*—There was a slight outbreak of typhus fever towards the end of the quarter. There have been no deaths as yet arising from the epidemic.

Sligo County.

DROMORE WEST; *Castleconor*.—Vaccination bad this quarter owing to some few cases of scarlatina in a portion of the district.

DROMORE WEST; *Easky, W.*—A few cases of scarlatina in the beginning. No other special disease present.

SLIGO; *Collooney*.—Of the deaths registered, one was 92 years, another 87, another 84, two were registered at 79, and several over 70 years.

1893.]
3rd Quarter.

[No. 119.]

QUARTERLY RETURN
OF THE
MARRIAGES, BIRTHS, AND DEATHS
REGISTERED IN THE
PROVINCES, COUNTIES, POOR LAW UNIONS OR
SUPERINTENDENT REGISTRARS' DISTRICTS, AND
REGISTRARS' DISTRICTS IN IRELAND;

Price One Shilling.

Marriages:—APR., MAY, JUNE, 1893. **Births & Deaths:**—JULY, AUG., SEPT., 1893.

*General Register Office, Charlemont House,
Dublin, 25th October, 1893.*

During the quarter ended 30th September last, there were registered in the 801 Registrars' Districts in Ireland 26,095 births—a number equal to an annual birth-rate of 22·6 in every 1,000 of the estimated population—and 17,775 deaths, representing an annual rate of 15·4 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 10,522 persons emigrated. A decrease of 2,202 would, therefore, appear to have taken place in the population which is estimated to have been 4,615,190 in the middle of the year.*

In England last quarter, the birth-rate represented was 30·6 in every 1,000 of the estimated population, and the death-rate 19·1 per 1,000.

The birth-rate in Ireland for the quarter is 0·3 over the average rate for the corresponding quarter of the last ten years, and 0·7 over the rate for the third quarter of 1892. The deaths are above those registered in the corresponding quarter of 1892 to the extent of 608; the death-rate is 0·6 over the rate for that quarter, and also 0·6 over the average for the third quarter of the ten years 1883–92.

Compared with those for the corresponding quarter of 1892, the returns of pauperism, furnished by the Local Government Board, show an increase of 494 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,273 or 2·2 per cent. in the average number of persons on out-door relief.

* See page 193.

Compared with the averages for the third quarter of the ten years 1883-92 the number of Workhouse inmates shows a decrease of 2,757, and the number of persons on out-door relief a decrease of 4,664.

The marriage-rate (4·5) for the second quarter of 1893 is 0·6 over the average rate for the corresponding quarter of the ten years, 1883-92.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages registered** during the quarter ended 30th June, 1893, and by the **Births** and **Deaths registered** in the Quarter ended 30th September, 1893.

MARRIAGES.

The marriages (5,148) registered in Ireland during the second quarter of 1893 are equal to an annual rate of 4·5 per 1,000 of the estimated population, being 0·5 over the rate for the corresponding quarter of last year, and 0·6 above the average rate for the second quarter of the ten years 1883-92. Of the total marriages 3,562 were registered under the provisions of the 26 & 27 Vic., cap. 90, and 1,586 under the 7 & 8 Vic., cap. 81; the former number being equal to an annual rate of 4·09 per 1,000 of the estimated Roman Catholic population, and the latter to a rate of 5·59 per 1,000 of the members of all other religious persuasions. Compared with the averages for the corresponding quarter of the last ten years, the rate for Roman Catholic marriages shows an increase of 0·7, and that for all other marriages is equal to the average. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the *first* quarter, while as regards other marriages, there is generally but little difference in the numbers registered in the several quarters.

* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891.

TABLE II.—Showing by **Quarterly Periods**, the number of **Marriages** registered in Ireland in the ten years 1883–92, and the average number for that period, distinguishing the number of Roman Catholic marriages registered under the 26 & 27 Vic., cap. 90, and of Protestant and other marriages under the 7 & 8 Vic., cap. 81; also the number registered during the first and second quarters of the year 1893:—

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,095—13,382 boys and 12,713 girls—being equal to an annual ratio of 1 in every 44.2, or 22.6 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1883–92 was 26,939, equivalent to an annual rate of 22.3 per 1,000 of the estimated mean population of those years. Thus the birth-rate was 0.3 over the average.

The respective birth-rates for the four provinces last quarter are—Leinster, 22.3 per 1,000 of the population, according to the Census of 1891; Munster, 20.9; Ulster, 24.3; and Connaught, 19.4.

The highest county birth-rate* is 31.0 for Antrim, and the lowest 16.6 for Meath. Of the intermediate rates the highest five are—Down, 27.3; Dublin, 27.2; Londonderry, 23.8; Limerick, 22.8; and Armagh, 22.5; and the lowest five are—Westmeath, 16.8; Fermanagh, 17.8; Roscommon, 17.9; Sligo, 18.0; and Longford, 18.3.

DEATHS.

The deaths registered in Ireland during the quarter ended 30th September last amounted to 17,775—8,855 males and 8,920 females—affording an annual ratio of 1 in every 64.9, or 15.4 per 1,000 of the estimated population, being 0.6 over the average rate for the corresponding quarter of the ten years 1883–92.

The death-rate in Leinster was 17.6 per 1,000 of the population according to the Census of 1891; in Munster, 13.8; in Ulster, 16.2; and in Connaught, 10.8.

* See note on foregoing page.

The county death-rates* range from 9·8 in Sligo, to 24·6 in Dublin. Between these rates the lowest five are—Cavan, 10·1; Leitrim, 10·4; Mayo, 10·7; Donegal, 11·0; and Galway, 11·1; and the highest five are—Antrim, 21·7; Waterford, 18·4; Down, 18·0; Kilkenny, 16·5; and Armagh, 16·0.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1885–92, and the average number for that period; also the number registered during the first, second, and third quarters of the year 1893:—

| 1893, . . . | 23·6 | 24·5 | 22·6 | . | . | 19·8 | 17·6 | 15·4 | . | . |

Ages.—Of the 17,775 deaths registered last quarter, 3,034, or 17·1 per cent., were of children under 1 year old; and 6,282, or 35·3 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 116·3 per 1,000 of the births registered. In the Province of Leinster the number of deaths of children under 1 year old equalled 19·4 per cent. of the total deaths registered therein; in Munster, 15·1 per cent.; in Ulster, 17·6 per cent.; and in Connaught, 13·0 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 33·6 per cent.; in Munster to 37·4 per cent.; in Ulster to 32·1 per cent.; and in Connaught to 46·6 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

As already indicated, the mortality in Ireland during last quarter was somewhat in excess of the low average for the corresponding quarter of the last ten years, the annual rate represented by the deaths from all causes being 15·4 per 1,000 living against an average of 14·8: the zymotic death-rate was much above the average. The increase is in great measure due to the large mortality (chiefly among young children) from diarrhoea in Belfast and Dublin. Measles, whooping-cough, and enteric fever were prevalent in Belfast, and enteric fever in Dublin, and there are a few other districts in which these or other zymotic diseases caused a comparatively large number of deaths, but there was no widespread prevalence of any disease of the zymotic class.

* See note on page 180.

Diseases.—The deaths from the principal zymotic diseases* registered during last quarter amount to 2,134, a number equivalent to an annual rate of 1·8 per 1,000 living, being 0·7 over the rate for the preceding three months, 0·6 over that for the September quarter of last year, and showing an increase of about 43 per cent. as compared with the average for the third quarter of the ten years 1883–92.

Smallpox.—Cases of smallpox are reported from three districts, but no deaths from the disease were registered during the quarter, nor have any been recorded since the last quarter of 1891.

Measles.—The number of deaths from measles registered during the quarter is 243, being 68 under the number for the preceding three months, but 107 in excess of the average for the third quarter of the last ten years. One-fourth of the total number of deaths from measles occurred in Belfast Union or Superintendent Registrar's District, where there were 62 fatal cases of the disease; in Dublin South Union there were 19 deaths; in Kanturk Union 11 (including 8 in Newmarket District); in Kilkenny No. 2 District, 6 (being equal to an annual rate of 3·1 per 1,000 of the population); in Limerick Union, 10; in Nenagh Union, 7; and in the City of Waterford, 24, equivalent to an annual rate of 4·6 per 1,000 of the population. The total number for the Province of Leinster is 63, for Munster 94, for Ulster 84, and for Connaught 2.

Scarlatina.—The mortality from scarlatina was slightly below the average, the number of deaths registered being 87 against 97 for the preceding three months, and an average of 90 for the third quarter of the last five years. Of the 87 deaths 22 occurred in the Province of Leinster (including 11 in Kilkenny Union, of which 6 were in Kilkenny No. 2 District where there were also 6 deaths from measles); 11 in Munster, including 4 in Littleton District, Thurles Union; 42 in Ulster (including 12 in Belfast Union, 5 in Castleblayney Union, and 5 in Dungannon Union); and 12 in Connaught.

Typhus.—There were but 68 deaths from typhus registered, being 23 below the average for the corresponding quarter of the last five years, and 5 under the number for the quarter ended the 30th June last. Nine of the 68 deaths occurred in Leinster, 31 in Munster, 12 in Ulster, and 16 in Connaught. The highest number in any Union or Superintendent Registrar's District was 4, the number in the Unions of Tralee and Waterford respectively.

Whooping Cough was prevalent in a few localities, with the result that, although showing a slight decline as compared with the number for the preceding three months and with the average for the third quarter of the last five years, still the deaths from it were numerous, amounting as they did to 233, of which 159 were furnished by 11 of the 159 Unions. The 11 Unions are:—Dublin North, where there were 19 deaths; Dublin South, with 23 deaths; New Ross, 6 deaths; Rathdown, 7; Tullamore, 5; Millstreet, 5; Rathkeale, 5; Ballymena, 7; Belfast, 68 (equal to an annual rate of 1 per 1,000 of the population); Carrickmacross, 6; and Donegal, 8, of which 5 were in Laghy district. The total number for Leinster was 68, for Munster 34, Ulster 114, and Connaught 17.

Diphtheria caused 86 deaths against 83 for the preceding three months, and an average of 68 for the third quarter of the last five years. They were distributed through the provinces as follows:—

* See note on page 185.

Leinster, 23 ; Munster, 11 ; Ulster, 49 ; and Connaught 3, only. Nine occurred in Belfast Union ; 6 in Downpatrick Union ; 6 in Dublin South Union ; 5 in Lisburn Union ; 7 in Londonderry Union ; 4 in Warrenpoint District, Newry Union ; 6 in Newtownards Union ; and 5 in Dundrum and Glencullen No. 1 District, Rathdown Union.

Simple continued and ill-defined Fever.—There were only 25 deaths returned under this heading against an average of 66 for the corresponding quarter of the last five years—9 occurred in Leinster, 7 in Munster, 6 in Ulster, and 3 in Connaught.

Enteric Fever.—The deaths from enteric fever amount to 224, being 62, or 38 per cent., over the average for the corresponding quarter of the last five years, and 96 in excess of the number for the quarter ended the 30th June last. Of the 224 deaths 34 were in Belfast Union ; 44 in Dublin North Union ; 24 in Dublin South Union ; 7 (including 5 in Lowpark District) in Swineford Union, and 5 in the Union of Waterford ; so that more than one-half of the total number occurred in these 4 Unions, which are the only Unions in each of which 5 or more deaths from the disease were registered. The total number in the Province of Leinster was 90, in Munster 42, in Ulster 73, and in Connaught 19.

Diarrhoea.—There were 1,143 deaths from diarrhoea registered against an average of 469 for the third quarter of the last five years. The three Unions of Belfast, Dublin North, and Dublin South, containing about 14 per cent. of the population of the country, furnished 66 per cent. of the deaths from this cause, there having been in Belfast 429 fatal cases of the disease (equal to an annual rate of 6 per 1,000 inhabitants), in Dublin North 137, and in Dublin South 189. In 72 of the 159 Unions no deaths from diarrhoea were recorded. The total number in the Province of Leinster was 380 ; in Munster, 143 ; in Ulster, 601 ; and in Connaught 19, only.

Simple Cholera.—Three deaths in Leinster, 3 in Munster, and 19 in Ulster were ascribed to this disease.

Hydrophobia.—One death from hydrophobia was registered ; it occurred in Munster.

The Registrars, in their Notes, report the presence of the following diseases :—Small-pox in 3 districts, Chicken-pox in 2, measles in 63, scarlatina in 38, whooping-cough in 25, diphtheria in 9, fever in 47, (typhus 11, enteric 33, and simple continued fever 3), influenza in 12, and simple cholera and choleraic diarrhoea in 18.

Inquests.—There were 552 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 32 of the total deaths registered.

In Leinster there was 1 inquest to every 27 deaths registered, in Munster 1 to 32, in Ulster 1 to 37, and in Connaught 1 to 39.

Deaths in Public Institutions.—Of the 17,775 deaths registered during the quarter, 2,619, or 14·7 per cent. occurred in public institutions. In Leinster the percentage was 19·5, in Munster 19·6, in Ulster 9·1, and in Connaught 10·7.

The following table (TABLE IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1893, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population:—

| PERIOD. | Total Deaths registered. | Deaths from Principal Zymotic Diseases. | | | | | | | | | | | Percentage of Total Deaths. | Number in every 100,000 of the Population. |

URBAN SANITARY DISTRICTS.

Separate statistics for the Urban Sanitary Districts are given in Table V.

The death-rate for last quarter in these districts, which comprise a population of nearly one fourth of the total of the country, was 23.1, and the birth-rate 29.7 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 12.6 and the birth-rate 19.9 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Sanitary Districts during the quarter was 5.1 per 1,000 of the population, according to the census of 1891: in the remainder of the country the rate was 0.8 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1893, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—“The Dublin Registration District,” which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, Kilmalsham, Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the fifteen Urban Sanitary Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished the Registrars and relate to the thirteen weeks ending Saturday, 30th September, 1893.

‡ The rates for Belfast have been calculated on the population estimated in the middle of the year 1893.

VACCINATION.

According to the Returns of Vaccination received for the third quarter of the year 1893, there were 23,382 persons successfully vaccinated; in 2,609 cases the operation was postponed, and 51 children were reported as insusceptible of vaccination. The deaths of 1,606 unvaccinated children under 3 months old were registered during the quarter, making a total of 27,648 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th September last, was 10,522 (4,485 males and 6,037 females), being 103 more than in the corresponding quarter of 1892, but 5,905 under the average number for the third quarter of the ten years 1883-92.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September, in 1892 and 1893:—

| MONTHS. | NUMBER OF EMIGRANTS. | | | | | | | | | | | |
|--------------|----------------------|-------|------------|------------|----------|-------|------------|------------|--------|--------|------------|------------|
| | Males. | | | | Females. | | | | Total. | | | |

| July, . . . | 1,690 | 1,339 | — | 351 | 1,605 | 1,238 | — | 367 | 3,295 | 2,577 | — | 718 |
| August, . . | 1,946 | 1,607 | — | 339 | 2,398 | 2,011 | — | 387 | 4,344 | 3,618 | — | 726 |
| September, . | 1,168 | 1,539 | — | 371 | 1,612 | 2,788 | 1,176 | — | 2,780 | 4,327 | 1,547 | — |
| Total, . . | 4,804 | 4,485 | — | 319 | 5,615 | 6,037 | 422 | — | 10,419 | 10,522 | 103 | — |

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of 1892 the average price was $6d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $15s. 6d.$ per cwt., which was also the average price for the corresponding quarter of 1892. In the third quarter of 1883 the average price was $17s. 4d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $2s. 2d.$ to $3s. 3d.$ In the third quarter of 1892 the average prices were $2s. 7d.$ to $3s. 7d.$, and in the corresponding quarter of 1883 they were $3s. 4d.$ to $5s. 2d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $45s.$ to $60s.$ per cwt. In the corresponding quarter of 1892 the average prices were from $45s. 6d.$ to $57s. 6d.$, and in the third quarter of 1883 they were from $67s. 6d.$ to $78s.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from $17s.$ to $22s.$ per ton.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $\pounds 99\frac{3}{8}$, and the lowest $\pounds 97\frac{1}{8}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which stood at $3\frac{1}{2}$ per cent. at the close of the preceding quarter, was raised to 4 per cent. on 3rd August, to $4\frac{1}{2}$ per cent. on 10th August, and to 5 per cent. on 24th August, and reduced to $4\frac{1}{2}$ per cent. on 14th September, and to 4 per cent. on 21st September.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1893 was 39,721, or 494 over the average for the corresponding period in 1892.

The average weekly number of persons receiving out-door relief during the quarter was 56,383, being 1,273 under the average for the third quarter of 1892.

Of the persons receiving in-door relief during the third quarter of 1893, an average number of 1,142 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1892 the average weekly number was 1,107.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1893, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

| PERIOD. | Average PRICES OF PROVISIONS. | | | | | | | | PAUPERISM. | |

(a) Rolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

(c) Messrs. Manders and Co.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park,

* Latitude 53° 21' 44.65" north; longitude 6° 21' 6.35" west. Height above the sea 162.2 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

Dublin, during the third quarter of the years 1888-93, respectively, furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 192):—

The mean height of the barometer during the third quarter of 1893 was 29·907 inches, against an average of 29·928 inches for the corresponding quarter of the five years 1888-92; the highest reading (30·423 inches) was on the 29th August, at 9 A.M., wind N.E.; and the lowest (29·048 inches) on the 29th September, at 9 A.M., wind W.S.W.

The mean temperature of the air during the quarter was 58·1°, against an average of 55·9° for the third quarter of the five years 1888-92. The maximum temperature was 82·0°, and the minimum 32·9°. The maximum heat in sun was 133·5°, and the minimum on the grass 28·0°.

Rain fell on 57 days during the quarter. The rain-fall measured 6·280 inches, against an average of 8·576 inches for the third quarter of the five years 1888-92. The greatest monthly rain-fall was in July, when 2·920 inches were registered.

The wind blew on 42 days from W., on 12 days from N.W., on 9 days from E., on 6 days each from N., S., and S.W., on 5 days from S.E., on 3 days from N.E., and the air was calm on 3 days at 9 A.M.

July.—The mean height of the barometer during this month was 29·902 inches; the highest reading (30·233 inches) was on the 27th, at 9 P.M., air calm; and the lowest (29·451 inches) on the 19th, at 9 P.M., wind W. The mean temperature of the air was 59·7°, the maximum registered was 74·9°, and the minimum 44·6°. The 23rd was the warmest day, and the 27th the coldest night. The mean of the dry bulb was 59·4°, and of the wet bulb 56·0°. The maximum heat in sun was 133·5°, and the minimum on the grass was 36·2°. The total amount of sunshine recorded was 190·3 hours, the greatest daily amount being 13·8 hours on the 3rd. The maximum ozone was ·9, the minimum ·1, and the mean ·5. Rain fell on 22 days. The rain-fall measured 2·920 inches; the greatest amount in 24 hours was 1·120 inch on the 12th.

August.—The mean height of the barometer during this month was 29·971 inches; the highest reading (30·423 inches) was on the 29th, at 9 A.M., wind N.E.; and the lowest (29·297 inches) on the 21st, at 9 A.M., wind W.S.W. The mean temperature of the air was 60·8°, the maximum registered was 82·0°, and the minimum 39·3°. The 15th was the warmest day, and the 28th the coldest night. The mean of the dry bulb was 60·5°, and of the wet bulb 57·3°. The maximum heat in sun was 132·6°, and the minimum on the grass 33·0°. The total amount of sunshine recorded was 224·8 hours, the greatest daily amount being 13·3 hours on the 12th. The maximum ozone was 1·0, the minimum ·1, and the mean ·6. Rain fell on 18 days. The rain-fall measured 2·505 inches; the greatest amount in 24 hours was ·470 in. on the 18th.

September.—The mean height of the barometer during this month was 29·847 inches; the highest reading (30·356 inches) was on the 12th, at 9 A.M., air calm; and the lowest (29·048 inches) on the 29th, at 9 A.M., wind W.S.W. The mean temperature of the air was 53·8°, the maximum registered was 72·9°, and the minimum 32·9°. The 4th was the warmest day, and the 12th the coldest night. The mean of the dry bulb was 53·7°, and of the wet bulb 50·9°. The maximum heat in sun was 131·6°, and the minimum on the grass 28·0°. The minimum on the grass was below 32° on 6 nights. The total amount of sunshine recorded was 173·5 hours, the greatest daily amount being 11·5 hours on the 3rd and 11th respectively. The maximum ozone was 1·0, the minimum ·3, and the mean ·7. Rain fell on 17 days. The rain-fall measured ·855 inch, or ·970 inch below the average for September in the last five years; the greatest amount in 24 hours was ·125 inch on the 22nd.

| | | | | | | | | 1893 | 4,615,190 | 2,279,169 | 2,336,021 |

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-93.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

MARRIAGES Registered during the Quarter ending 30th June, 1893, in the PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th Sept., 1893; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHOEA, and CHOLERA; also VIOLET DEATHS,* INQUEST CASES, and DEATHS IN PUBLIC INSTITUTIONS, Registered during the Quarter ending 30th Sept., 1893, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

| Provinces and Counties. | Area, in Statute Acres. | Popu- lation in 1891. | Marriages. | | Births. | | Deaths. | | | | | | | | | | | | The Deaths registered during the Quarter are stated by the Registrars to include | | | | | | | | | | | | Vaccination Return for the Quarter ending 30th Sept., 1893. | | | | |
|-------------------------------|----------------------------------|-----------------------------|--|---|---|--|----------------------------------|--|------------|----------|-------------|---------|-----------------|-------------|---|----------------|------------|----------|--|----------------|-------------------------------------|-----|-------|--------|-------|----|-------|--------|--|--|--|---|--|--|-------------------------|
| | | | Averages in the Quarters ending 30th June, 1892. | Registered in the Quarter ending 30th June, 1893. | Averages in the Quarters ending 30th Sept., 1892. | Registered in the Quarter ending 30th Sept., 1893. | Deaths of | | | | | | | | | | | | Deaths from | | | | | | | | | | | | Number of successful primary Vaccinations. | Number of Cases in which Vaccination was postponed. | Number of Persons Inaccessible of Vac- cination. | Number of Unvacci- nated Children under 8 months old, whose deaths were registered during the Quarter. | Total of the foregoing. |
| | | | | | | | Children under 1 year of age. | Persons aged 60 years and up- wards. | Small-pox. | Measles. | Scarlatina. | Typhus. | Whooping-cough. | Diphtheria. | Simple continued and ill-defined Fever. | Enteric Fever. | Diarrhoea. | Cholera. | Violence.* | Inquest Cases. | Deaths in Public Insti- tutions. | | | | | | | | | | | | | | |
| IRELAND. | 20,327,947 | 4,704,750 | 4,985 | 5,148 | 26,576 | 26,095 | 17,624 | 17,775 | 3,031 | 6,282 | — | 243 | 87 | 68 | 233 | 86 | 25 | 224 | 1,143 | 25 | 297 | 552 | 2,619 | 23,382 | 2,609 | 51 | 1,006 | 37,648 | | | | | | | |

[illegible]

* The Registrars' Districts (801 in number) are Subdivisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 207 and 268 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 2nd July to 30th September, 1893. With the exception of 63 deaths of persons from localities outside the "Dublin Registration District," the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

The letter W denotes that the Registrar's District (or north of a district) contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

[illegible]

† See note (†), page 207.

ABSTRACT III.—REGISTRARS' DISTRICTS ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

I. PROVINCE OF LEINSTER—continued.

| No. | Registrars' Districts. | Area, in Statute Acres. | Popu- lation in 1891. | Births. | | Deaths. | | | | | | | | | | | | The Deaths registered during the Quarter are stated by the Registrars to include | | | | | | | | | | | | Vaccination Return for the Quarter ending 30th Sept., 1893. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District or portion of District in the County.

I. PROVINCE OF LEINSTER.

Carlow County.

CARLOW ; *Bagenalstown*.—The water supply most unsatisfactory and unsanitary.

CARLOW ; *Carlow, part of, W*.—The sanitary arrangements in this district are most excellent. The necessary precautionary measures have been taken in the event of an outbreak of cholera. Measles and scarlatina of a mild type prevailed. Diarrhoea also prevailed. No other zymotic disease excepting influenza.

CARLOW ; *Leighlinbridge*.—Measles prevalent. Stray cases of influenza and enteric fever.

ENNISCORTHY ; *Newtownbarry, part of*.—Measles very prevalent still in the district, but so far no child has died of the complaint. The district is otherwise healthy.

SHILLELAGH ; *Coolkenna and Hacketstown, part of*.—With the exception of one case of scarlet fever there has been no infectious disease in the district. Of the 15 deaths registered, 7 were those of persons 75 years old and upwards.

Dublin County.

BALROTHERY ; *Lusk*.—There have been 5 cases of typhoid fever during the quarter, and four cases of scarlatina.

BALROTHERY ; *Swords*.—Notwithstanding the continued drought the several wells afforded an ample supply of water.

CELBRIDGE ; *Lucan, part of*.—Colic and diarrhoea very prevalent during August and September ; also worms. This is to be attributed to the scarcity of water and the abundance of mushrooms, fruit, etc., etc.

DUBLIN, NORTH ; *Finglas and Glasnevin*.—In consequence of prevalence of diarrhoea amongst children I postponed a number of vaccinations.

DUBLIN, SOUTH ; *Palmerston*.—Of the deaths from diarrhoea, one was complicated with choleraic diarrhoea, and two with vomiting. I cannot too strongly recommend that the Kilmainham Township Commissioners should undertake the cleaning of the privies and ashpits. If they do this I believe it will lead to their being better constructed, the work better done, and an improvement in the health of the township.

RATHDOWN ; *Blackrock and Stillorgan, No. 2*.—The health of the district was good during the quarter, with the exception of a very mild form of scarlatina, all ended in recovery.

RATHDOWN ; *Dundrum and Glencullen, No. 1*.—Five deaths from diphtheria ; disease not prevalent.

Kildare County.

CELBRIDGE ; *Kilcock*.—The sanitary arrangements are perfect.

CELBRIDGE ; *Lucan, part of*.—See note under head of Dublin county.

EDENDERRY ; *Carbury*.—There was no vaccination till the end of quarter owing to measles. There were a few cases of scarlatina.

EDENDERRY ; *Rathangan, part of*.—Measles is very prevalent in this district, but of a mild type.

NAAS ; *Kildare*.—Diarrhoea was very prevalent, but no deaths occurred from it here.

NAAS ; *Newbridge*.—There has been during the past quarter an outbreak of choleraic diarrhoea, a few cases presenting very severe symptoms ; there were about fifty cases, all of which recovered. There was also an epidemic of measles of a mild type.

Kilkenny County.

CASTLECOMER; Ballyragget.—An epidemic of scarlet fever, mild form, has been prevalent during the quarter, but is now on the decline. One death occurred from the malignant form of scarlet fever in the first month. Three cases of typhoid appeared in the early part of the third month. There is at present no typhoid in the district.

CASTLECOMER; Castlecomer W.—Measles has been very prevalent in the district the last half of this quarter, up to the present there has been no fatal case.

KILKENNY; Gowran.—With the exception of a few cases of scarlet fever and measles, the health of the district has been good.

KILKENNY; Tullaroan.—Scarlet fever and measles being prevalent in the district, vaccination had to be postponed.

THOMASTOWN; Knocktopher.—There was one case of typhoid fever contracted in another county, and a few cases of scarlatina during the quarter.

URLINGFORD; Johnstown, part of.—During the past week or so influenza in a mild form has affected some people.

King's County.

EDENDERRY; Edenderry, W.—An epidemic of measles, but no death.

EDENDERRY; Rathangan, part of.—See note under head of Kildare Co.

EDENDERRY; Rhode.—A few cases of dysentery.

MOUNTMELICK; Clonygowan, part of.—One death registered at 94 years.

ROSCREA; Roscrea, No. 1, part of.—Gastro-enteritis was very prevalent, and accounted for five deaths in infants. In every case the child was bottle-fed, there being no unusual illness or mortality amongst those reared at the breast.

TULLAMORE; Philipstown.—Seven cases of diphtheria occurred during the quarter—three proved fatal—one case received no medical attendance, the disease having been mistaken for a cold by the friends. Two bad cases of diarrhoea occurred during September, attended by cramp in the legs and violent pain in the bowels—both got well under treatment. In both cases vomiting was a marked feature.

Longford County.

GRANARD; Scrabby, part of.—One case of mild typhoid fever, which ran its course in 15 days, and a few cases of diarrhoea were all that occurred during past quarter of any note.

GRANARD; Street, part of.—There have been some cases of measles in Edgeworthstown of a bad type, with grave chest complications.

LONGFORD; Killashee.—Measles has been very prevalent during this quarter.

LONGFORD; Longford, W.—Measles was very prevalent. Very few children who had not previously suffered from the disease escaped this time. The vaccinations are below average owing to prevalence of measles.

Louth County.

DUNDALK; Dundalk, W.—There were fifteen deaths from dysentery, the victims being principally very old people, and inmates of the workhouse. Diarrhoea was very prevalent during part of the quarter. The town, generally speaking, is in a very healthy condition at present.

DUNDALK; Louth, part of.—Diarrhoea was prevalent among children during past quarter, I believe due to errors in diet, and partaking freely of fruit. It was amenable to treatment. Jaundice also among several families of young children was very common. Croup also presented itself, one death registered; four days ill when medical aid was called in; all the cases occurred in swampy places (low-lying dwellings). One case of German measles (Rütheln) was attended by me at end of quarter.

Meath County.

NAVAN; Navan, W.—The water supply in most districts is very short. Diarrhoea of a very acute nature was prevalent, but there was no fatal case. One death from English cholera was registered.

NAVAN; Painestown.—The number vaccinated during the past quarter was above the average; owing to the prevalence of measles during the early summer the people postponed the vaccination of their children.

Queen's County.

ABBEYLEIX; Ballinakill.—The death of a man aged 97 years registered.

CARLOW; Carlow, part of.—See note under head of Carlow co.

MOUNTMELICK; Clonygowan, part of.—See note under head of King's co.

ROSCREA; Roscrea, No. 1, part of.—See note under head of King's co.

URLINGFORD; Johnstown, part of.—See note under head of Kilkenny county.

Westmeath County.

GRANARD; Street, part of.—See note under head of Longford county.

MULLINGAR; Castletown Geoghegan.—During the past quarter I attended many cases of severe diarrhoea, and in some cases it was complicated with retching. Although the cases were very severe, and patients weak, all recovered under proper treatment.

MULLINGAR; Mullingar, W.—Choleraic or summer diarrhoea of a severe but not

fatal type prevailed in this district to a large extent during the past quarter. The number of persons who received relief at the dispensary amounted to over 100.

Wexford County.

ENNISCORTHY; *Newtownbarry, part of*.—See note under head of Carlow County.

GOREY; *Gorey, W.*—An epidemic of measles prevailed in this district during the last two months; only two cases proved fatal from subsequent bronchitis. Amongst the poorer classes the disease was aggravated, in many instances, by the quantity of whiskey given, even to the youngest children.

NEW ROSS; *Fethard, No. 2.*—Four or five of the people who died reached almost the age of 90 years.

WEXFORD; *Bannow.*—Some whooping-cough still in district. A few cases of chicken pox.

WEXFORD; *Crossabeg.*—There have been two cases of scarlatina and one of typhoid fever during quarter, but at present the district is free from contagious or infectious diseases.

WEXFORD; *Wexford, W.*—The death of a woman whose age was stated to have been 103 years was registered during the quarter.

Wicklow County.

BALTINGLASS; *Dunlavin.*—District free from any contagious disease, except a few cases of typhus occurring in one family in August—one died.

RATHDOWN; *Delgany.*—Some cases of diarrhoea. Two cases of English cholera in private practice.

RATHDRUM; *Dunganstown.*—I had two cases of scarlet fever in the district during the quarter, but owing to sanitary precautions the disease did not spread.

RATHDRUM; *Wicklow.*—Scarlatina has been prevalent during quarter.

SHILLELAGH; *Coolkenna & Hacketstown, part of*.—See note under head of Carlow County.

II. PROVINCE OF MUNSTER.

Clare County.

CORROFIN; *Corrofin, W.*—Towards end of quarter there were several cases of choleraic diarrhoea of very severe character, two of which proved fatal, but are not yet registered. One of these was an old person.

ENNISTIMON; *Ennistimon W.*—Measles is now prevalent in the district, but no death has occurred up to the present. Also an outbreak of typhus occurred, from which two deaths resulted; the outbreak was due to overcrowding. The sanitary arrangements are satisfactory.

ENNISTIMON; *Roadford.*—A few cases of measles have appeared in the district.

KILRUSH; *Carrigaholt.*—Isolated cases of influenza still prevail. Otherwise health of district very good.

KILRUSH; *Craggaknock.*—The district has been free from epidemic of any kind during the past quarter, with the exception of a few cases of measles of a very mild type.

KILRUSH; *Kilrush, W.*—After a period of very exceptional health in this district, during the last month influenza again made its appearance, and at present extensively prevails.

SCARRIFF; *Annacarriga.*—Measles prevalent in the town; vaccinations therefore not so numerous.

TULLA; *Kilkishen.*—There were some cases of tonsillitis and English cholera in the district during the quarter.

Cork County.

BANDON; *Bandon, W.*—An extensive epidemic of typhoid fever occurred during the quarter the first case was imported from Cork, and the disease was subsequently spread by the milk. A few cases of influenza were seen during the last two or three weeks.

BANDON; *Murragh.*—One case of enteric fever in village of Enniskean which was contracted in Bandon—cured.

BANDON; *Templemartin.*—Typhoid fever very prevalent for the past three months.

BANTRY; *Durrus and Kilecrohane.*—Of the three deaths registered for the quarter one was 84 years.

BANTRY; *Glengarriff.*—I dread a visitation of anything like cholera or choleraic diarrhoea in this country owing to the fact that "the unsanitary condition of the village of Glengarriff," its defective sewerage, and deficient supply of pure drinking water remains unchanged.

CLONAKILTY; *Clonakilty W.*—Two deaths caused by lightning. No fever or other infectious disease except a few cases of influenza. The death from diarrhoea was that of an infant 5 weeks old.

CORK; *Ballincollig.*—Sanitary arrangements fair. A new water supply has been introduced, but no provision has been made to prevent its accumulating in the village, there being no proper drainage.

CORK; *Cork, No. 3.*—I beg to report that there are several public slaughter houses in the district which are kept in a very insanitary condition, and endanger the health of the district. I recommend that some of them be closed, and the others properly cleansed and white washed, and floors paved or cemented.

DUNMANWAY; *Dunmanway, W.*—One death from typhus fever registered from the workhouse.

KANTURK; *Boherboy*.—Measles and whooping-cough were prevalent during the quarter.

KANTURK; *Kanturk, W.*—Whooping-cough and measles have been very prevalent in the district during the last quarter.

MALLOW; *Ballyclogh*.—The district is fairly healthy with the exception of one townland where typhus fever has been occasionally for several months. I have one case at present under treatment, and one sent to hospital last week. Every precaution, both sanitary and disinfecting, has been carefully attended to. Measles very prevalent during first half of quarter.

MALLOW; *Doneraile*.—Eleven cases of typhoid fever, due to the water supply, which is obtained from wells on bank of river.

MITCHELSTOWN; *Kildorrery*.—One case of typhus fever sent to hospital. Measles prevalent at present in the district. Some cases of diphtheria turned up during the quarter.

MITCHELSTOWN; *Mitchelstown, part of, W.*—Some six or eight cases of typhus fever have occurred in the district. There is no fresh case at present.

SKIBBEREEN; *Dromdaleague*.—Vaccination was very low owing to fever in the district.

SKULL; *Goleen*.—I have to report that though there is a harbour in the district, which is the centre of an important fishing station (Crookhaven), yet no accommodation exists for any case of infectious disease.

Kerry County.

DINGLE; *Anascaul*.—The district is not in a good sanitary condition. The water supply in some places is bad. Typhoid fever was prevalent during the quarter.

KILLARNEY; *Coom*.—Measles prevalent during the quarter, of a mild type. Typhus fever occurred in one family, which fortunately did not spread as the house was completely isolated. Little vaccination performed on account of the foregoing causes.

KILLARNEY; *Killarney, No. 1, W.*—In consequence of an epidemic of measles, I performed very few vaccinations this quarter.

KILLARNEY; *Killorglin*.—Four cases of simple continued fever occurred in one family; there were a few cases of measles of a mild type. With these exceptions the district has been free from epidemic disease.

KILLARNEY; *Malahiffe*.—Measles prevalent.

LISTOWEL; *Tarbert, No. 1, part of*.—Whooping-cough and measles are now spreading through the district.

TRALEE; *Ardfert*.—Water supply in Ardfert and Odorney very bad, but the Vice-Guardians are taking steps to get good water in both places; the other sanitary arrangements are very good.

TRALEE; *Tralee, No. 2*.—The sanitary state of this district is comparatively good—there are none of the principal zymotic diseases prevalent in the district, with the exception of diarrhoea, which is prevalent chiefly among young children. There were also some cases of swine fever and whooping-cough during the quarter.

Limerick County.

KILMALLOCK; *Bruff*.—Scarlatina, rütheln, measles prevalent—diarrhoea of a mild type also.

KILMALLOCK; *Bruree*.—Measles prevalent, some cases being of a mild German nature. Had a few cases of autumnal diarrhoea.

KILMALLOCK; *Hospital*.—Measles prevalent, but only one death from same. One case of typhoid brought from America, or contracted during voyage—recovery.

KILMALLOCK; *Kilfinnane*.—Vaccination postponed generally on account of outbreak of measles, &c. There was no medical attendant on case of scarlet fever.

LIMERICK; *Annacotty*.—Measles prevalent during quarter, also some cases of typhoid fever.

LIMERICK; *Limerick, No. 1*.—Measles of a severe type still prevalent.

LIMERICK; *Clarina*.—Measles of a mild type prevalent.

LISTOWEL; *Tarbert, No. 1, part of*.—See note under head of Kerry County.

LISTOWEL; *Tarbert, No. 2, W.*—I was obliged to postpone vaccination in several cases owing to the presence of measles and whooping-cough, but am happy to report now (2nd Oct.) that these diseases have disappeared from district. There have been a few cases of summer diarrhoea also during the quarter just ended which caused three of the deaths registered, otherwise I am glad to be able to report favourably of the health of the district.

MITCHELSTOWN; *Galbally*.—The sanitary condition of the village of Galbally and Ballylanders is improving. A mild epidemic of measles prevailed during the quarter. Two deaths were registered in this quarter, one having attained the age of 85, and the other 82 years.

MITCHELSTOWN; *Mitchelstown, part of*.—See note under head of Cork County.

NEWCASTLE; *Ardagh*.—Measles and whooping-cough prevalent in the district during the past quarter, and in consequence of such children were not taken to the dispensaries to be vaccinated.

RATHKEALE; *Askeaton*.—During the past quarter there has been an epidemic of pertussis (whooping-cough) amongst the children of the district; it, complicated with pneumonia, has caused five deaths, two of these are not yet registered. Measles was

prevalent in the village; it, followed by pneumonia, caused one death, not yet registered; there have also been two cases of typhoid fever, which were removed to Union hospital, both recovered; and one case of typhus fever, which was also removed to Union hospital, and died.

RATHKEALE; Pallaskeyry.—Measles of a very mild type prevails in the district, from which there has been no death up to this.

RATHKEALE; Rathkeale, No. 1, W.—Measles very prevalent early in quarter, complicated with croup and pertussis (whooping-cough) of a very mild type. Several cases of choleraic diarrhoea, of which one was fatal. Great prostration and muscular cramps in those cases. Number of vaccinations very small owing to prevalence of measles and diarrhoea.

TIPPERARY; Cappagh, part of.—One death from typhoid fever was registered, and three other cases of the same disease in another part of the district were sent to hospital.

TIPPERARY; Grean, part of.—Measles still prevalent in the district.

Tipperary County.

CALLAN; Mullinahone.—One case of enteric fever, now convalescent. Four cases of small pox occurred in one family, of a confluent type—all sent to hospital and have done well—could not trace origin of infection first—have learned lately that it may have come from New York, where a member of the family died during the summer, and some wearing apparel belonging to her were sent home to her people here.

CASHEL; Cashel, W.—One of the deaths registered is that of a person whose age is stated to have been 102 years.

CASHEL; Kilpatrick.—Three cases of erysipelas occurred in the district during the quarter—two of the cellular variety now convalescent; one of the cutaneous variety under treatment. The water supply of Dundrum village is copious, as the pump is after being repaired. I intend sending water for analysis immediately.

CLOGHEEN; Ardfinnan.—An epidemic of measles very general throughout entire district. No deaths.

CLOGHEEN; Caher.—Typhoid fever is very prevalent in the district. The source of contagion in three cases could be traced to the using of milk got from a house in which five members of the family were ill with typhoid fever. The milk was supplied after repeated cautions not to do so.

CLONMEL; Clonmel, W.—The epidemic of measles has declined very much. It was fatal in a few cases owing to pulmonary complications.

NENAGH; Nenagh, W.—Measles prevails very extensively through district during the quarter and at present. There was also

one death from hydrophobia. Symptoms came in thirty days after being bitten. Death resulted four days later.

NENAGH; Portroe.—Health of district good with the exception of an epidemic of measles.

ROSCREA; Roscrea, No. 1, part of, W.—See note under head of King's county.

THURLES; Littleton.—Scarlatina was prevalent, with four deaths. But there is no case at present nor for the past fortnight in district.

TIPPERARY; Bansha.—The district is unusually healthy, with the exception of an outbreak of measles (or rather Rötheln) in the extreme western portion of the district. It is of a mild type. I have heard of no death.

TIPPERARY; Cappagh, part of.—See note under head of Limerick county.

TIPPERARY; Grean, part of.—See note under head of Limerick county.

URLINGFORD; Kilcooly.—The district was extremely healthy during the past quarter, with the exception of a few cases of fever (simple continued and typhoid), and sanitary arrangements are carefully carried out.

Waterford County.

CARRICK-ON-SUIR; Portlaw.—I have to report an outbreak of measles. No deaths.

DUNGARVAN; Ringville.—Two cases of enteric fever during the quarter—one a mild case, the other malignant, and terminated fatally on the seventeenth day.

KILMACTHOMAS; Kilmacthomas, W.—An outbreak of measles has occurred in the district during the quarter, and from which, unfortunately, my own wife and family have not been exempt. Fever has disappeared. At present the fever hospital is empty, and, with the exception of some cases of measles of a mild type, there is no zymotic disease.

LISMORE; Ballyduff.—The age of a man whose death was registered during the quarter was 102 years. His father lived to 105, his brother to 103, and his sisters to 103 and 104 years respectively.

WATERFORD; Kilmeadan.—An epidemic of measles of a mild description.

III. PROVINCE OF ULSTER.

Antrim County.!

ANTRIM; Templepatrick.—Diarrhoea was pretty common in the district during the quarter. There were also a considerable number of cases of English Cholera.

BALLYCASTLE; Cushendal.—Vaccination is in a rather backward state owing to the outbreak of cases of diphtheria and typhoid fever; neither disease is spreading.

BALLYMENA; Ahoghill.—Two samples of water are now in the hands of the County Analyst with a view to the improvement of the supply.

BALLYMENA; Ballymena W.—Whooping cough prevalent among children.

BALLYMENA; Broughshane.—Measles has been prevalent in some parts of district since early in August, but so far not of a virulent type, and no deaths. No other disease particularly noticeable except throat and tonsillar inflammations.

BALLYMENA; Clogh.—Some cases of scarlatina, but as all the cases are of a mild type there are no deaths.

BALLYMENA; Toome.—Scarlatina appeared in one house, two children attacked, one died. The disease did not spread. A few cases of influenza occurred during the quarter, also some cases of diarrhoea.

BALLYMONEY; Dervock.—Measles somewhat prevalent towards the end of the quarter, but of a mild type. A few cases of enteric fever occurred, two of which ended fatally.

BELFAST; Belfast, No. 1.—Diarrhoea prevalent for first two months of quarter.

BELFAST; Belfast, No. 5.—During the past three months diarrhoea has been very prevalent, and the mortality therefrom more especially among young children, has been exceptionally high. It is not so prevalent since the cold weather set in. Under the heading "cholera" the seven cases which are put down were registered as "English cholera" or "cholera infantum."

LARNE; Ballycarry.—During last two months water supply has been very scarce and impure, and there has been considerable amount of diarrhoea, in some cases very severe and choleraic in its character.

LARNE; Carrickfergus.—Diarrhoea has been prevalent during the quarter; of the nine deaths registered from it only two are certified; great prostration, vomiting, and cramps accompanying many of the cases; the disease is now beginning to disappear.

LISBURN; Glenavy.—Diarrhoea very prevalent, some of the cases having a choleraic type. Scarlatina was also present, but no tendency to spread.

LISBURN; Lisburn, part of, W.—There has been an epidemic of diarrhoea and choleraic diarrhoea, 21 deaths having occurred, but the worst appears to be over. Of the 32 deaths registered at 60 years and upwards there was one at each of the following ages:—80, 81, 83, 84, 86, and 90 years.

Armagh County.

ARMAGH; Blackwatertown.—There has been an epidemic of scarlatina (simple variety), only one death due to it has been registered, and this case was complicated with fracture of the skull.

ARMAGH; Markethill.—The district has been very healthy, with the exception of measles, which has been very prevalent over the whole district; five deaths were due to that disease; the cases are becoming less during the past fortnight.

CASTLEBLAYNEY; Newtownhamilton, part of.—There have been a good many cases of so-called English cholera. A few cases of measles of a mild form occurred during the latter part of the quarter.

LURGAN; Lurgan, No. 1, part of, W.—One death was registered from "cholera nostras"; the patient had been removed from the Moira district to the Union Infirmary and died shortly after admission. An old woman died in the workhouse at the advanced age of 99 years.

NEWRY; Meigh.—The district is free from infectious diseases of any kind, except some cases of whooping-cough, no deaths from which have occurred.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—There was one case of typhoid, which ended fatally some days after having been removed to hospital, but the death has not yet been registered. I ordered the house to be lime-washed and disinfected, and the disease did not spread. No other member of the family was attacked.

BAILIEBOROUGH; Shercock.—Death rate for quarter considerably lower than any quarter since my appointment as registrar (18 years), which I attribute to the unusually dry, mild season.

BAILIEBOROUGH; Termon.—Vaccination was postponed on account of the prevalence of scarlet fever.

BAWNEBOY; Ballyconnell, W.—A few slight cases of scarlatina are said to have occurred, but have not come under my notice.

CAVAN; Belturbet.—The district is now fairly healthy. Typhoid prevailed in the beginning of the quarter; one death was caused by it.

CAVAN; Killeshandra.—Several cases of catarrhal diarrhoea occurred during the quarter.

COOTEHILL; Drum, part of.—With the exception of a case of typhoid fever contracted in Belfast, the district has been very healthy. The case is now convalescent.

GRANARD; Scrabby, part of.—See note under head of Longford County.

OLDCASTLE; Ballyjamesduff.—Several persons have been prosecuted and fined for unsanitary premises. There has been no epidemic of infectious diseases.

Donegal County.

BALLYSHANNON; Ballintra.—Sanitary arrangements fairly good. Water supply almost none.

DONEGAL; Dunkineely.—District generally healthy. No diarrhoea—infantile or other. Epidemic of whooping-cough disappearing. One of the pumps for Dunkineely town is now in working order; the other is not yet completed.

DONEGAL; Laghy.—No vaccination this quarter owing to the prevalence of whooping-cough.

DUNFANAGHY; Crossroads.—Of the deaths of persons aged 60 years and upwards, five were 80 years of age and one 97.

GLENTIES; Dunglow.—Typhus fever appeared in two localities during the quarter in houses of father and daughters. Four cases came under my notice: two are recovering, one is quite well, and the other was removed to the Union hospital. District otherwise healthy.

INISHOWEN; Clonmany.—Sanitary arrangements much improved.

INISHOWEN; Moville.—No disease of an infectious nature, except a mild type of whooping-cough. Among the deaths of persons aged 60 years and upwards are, of males—two at 82; and of females—one at 70, one at 77, three at 80, one at 87, and one at 92 years.

LONDONDERRY; Burt.—The death of a woman aged 98 years was registered.

MILLFORD; Fanad.—There were two deaths from scarlatina and one from enteric fever registered during the quarter.

MILLFORD; Kilmacrenan and Millford, W.—Scarlatina and whooping-cough have been prevalent during past quarter.

MILLFORD; Rathmullan.—There were two cases of diphtheria, one of which proved fatal. There was also one fatal case of enteric fever in the country.

STRABANE; Raphoe.—Have had several cases of diphtheria.

Down County.

BANBRIDGE; Ballyward.—No zymotic disease epidemic at present. There were a few sporadic cases of scarlatina during the quarter.

BELFAST; Castlereagh, No. 1.—The district for the most part healthy and in fair sanitary condition, with the exception of one or two streets, which are now represented to the Sanitary Department. In the early part of the quarter diarrhoea was very prevalent chiefly amongst the children. Whooping-cough is somewhat on the increase. Zymotic diseases are few.

DOWNPATRICK; Downpatrick W.—The two deaths returned as from "diarrhoea" were registered as "infantile cholera." Three deaths attributed to influenza. Three

of the deaths from diphtheria occurred in Downpatrick from the 13th to the 23rd of September, and being children I advised the sanitary authority to recommend the closing of all public schools in town, which they did, and most of the managers complied.

DOWNPATRICK; Killyleagh.—I have seen fewer cases of English cholera this year than in previous years. There are some cases of whooping-cough, and I apprehend an epidemic of this disease.

KILKEEL; Rosstrevor.—The ages of persons aged 60 years and upwards were as follow:—65, 68, 73, 78, 80, 82, and 89 years.

LISBURN; Ballylesson.—The general health of the district has been pretty good, though some cases of enteric fever have occurred, and one of scarlatina in Newtownbreda. Diphtheria has also appeared in two distinct localities with fatal result in one case, also in Newtownbreda. Isolation and disinfection have been carefully attended to, apparently with good results. Water supply in many neighbourhoods scanty and decidedly bad.

LISBURN; Hillsborough.—Diarrhoea has been very prevalent during entire quarter.

LISBURN; Lisburn, part of.—See note under head of Antrim County.

LISBURN; Saintfield.—Diphtheria, to which I referred in my last quarterly return as having appeared in the district, has continued in several scattered cases during the past quarter. One family is at present suffering from it in a severe form. Three deaths are registered from it in the present return, two having taken place in the June and one in the past quarter. Whooping-cough prevails throughout the district and many adults suffer from it.

LURGAN; Lurgan, No. 1, part of.—See note under head of Armagh county.

LURGAN; Moira.—During the latter part of August an outbreak of diarrhoea with vomiting, sudden, violent, and short-lived, broke out, but subsided in a week or two. Recently there has been a recurrence.

NEWRY; Newry No. 2.—A few cases of severe diarrhoea.

NEWTOWNARDS; Comber.—Diarrhoea, sometimes very severe, has been very prevalent during last quarter, but not fatal except in children.

NEWTOWNARDS; Greyabbey.—In early part of the quarter measles prevailed in Greyabbey, Ballywalter, and Kirkcubbin divisions of the district, but especially in Greyabbey division. No epidemic in the district. Four cases of typhoid presented in Ballywalter, origin not clearly traceable, no death. A number of cases with influenza symptoms, accompanied in some cases with gastric pains of various degrees, common throughout the district, but less mentioned about last month, very few requiring medical treatment.

NEWTOWNARDS; *Kilmood*.—A few cases of influenza of a mild type.

NEWTOWNARDS; *Newtownards W.*—I have during the past three months treated a great number of persons ill with "English cholera." In some cases the symptoms were exceedingly alarming. During the past month I have seen a number of cases of "infantile diarrhoea," chiefly among children being "reared on the bottle." I believe that the cows having been fed on the abundant crop of clover aftergrass this year has something to do with producing the gastric disturbance.

Fermanagh County.

CLONES; *Rosslea, part of*.—The death of a man stated to be 100 years of age was registered. Diarrhoea has been rather prevalent.

ENNISKILLEN; *Enniskillen, W.*—I have had 37 cases of diarrhoea during the last quarter, nearly all being attributable to the injurious use of unripe fruit and vegetables. No fatal case.

Londonderry County.

LIMAVADY; *Ballykelly*.—Some cases of scarlatina in part of district during quarter, but disease was of a mild type, and no death was caused by it.

LONDONDERRY; *Claudy*.—Diphtheria occurred in one family, of whom three children died, the disease being complicated with laryngitis. One death from typhoid fever, of which there were a few isolated cases. Two deaths from croup. The district at present is entirely free from any disease of a contagious character.

LONDONDERRY; *City of Derry, No. 2*.—There were six cases of small-pox during the quarter, all of a mild type. The disease is now stamped out. There was one death of a woman whose age was stated to have been 105 years.

MAGHERAFELT; *Bellaghy*.—The majority of the deaths are those of aged people from 60 to 110 years.

MAGHERAFELT; *Draperstown*.—Scarlatina has ceased. There is one case of typhus fever which I am doing my best to isolate; infection caught in Belfast.

MAGHERAFELT; *Monymore*.—Measles of a severe type was prevalent in district during most of the quarter. We had to close a number of the day schools for several weeks in order to prevent its spread. The disease has much abated, and most of the schools are re-opened.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—Vaccination suspended during quarter, whooping-cough and scarlatina being prevalent.

CARRICKMACROSS; *Donaghmoyne*.—Whooping-cough prevalent. A number of children were attacked with croup, especially in July, and two deaths were reported as occurring from it.

CARRICKMACROSS; *Raferagh*.—Parents cannot be got to bring back their children on eighth day, and in numerous instances won't attend to have them vaccinated.

CASTLEBLAYNEY; *Ballybay*.—A number of children suffering from scarlatina anginosa were attended through the district. Some cases of measles and varicella (chicken-pox) have also been under treatment.

CASTLEBLAYNEY; *Castleblayney, W.*—Scarlatina, from which one death occurred, was epidemic in the town during July and August. At present there is only one case under observation. There were also several cases of measles and whooping-cough. Three deaths were caused by diarrhoea. The water supply was sufficient, and analyses show that it is of good quality.

CASTLEBLAYNEY; *Newtownhamilton, part of*.—See note under head of Armagh county.

CLOGHER; *Aughnacloy, part of*.—Owing to many cases of whooping-cough there has hardly been any vaccination during the quarter. The disease is not of a bad type, only one case proving fatal.

CLONES; *Rosslea, part of*.—See note under head of Fermanagh county.

COOTEHILL; *Drum, part of*.—See note under head of Cavan county.

DUNDALK; *Louth, part of*.—See note under head of Louth county.

MONAGHAN; *Kilmore*.—One school closed owing to outbreak of scarlatina. Measles prevalent in the district.

Tyrone County.

ARMAGH; *Caledon*.—There have been during the quarter a few sporadic cases of infantile diarrhoea, with one death. No other cases of diarrhoea came under my notice.

CASTLEBERG; *Killeter*.—Water supply now plentiful.

CLOGHER; *Aughnacloy, part of*.—See note under head of Monaghan county.

CLOGHER; *Fivemiletown*.—There was a tendency to diarrhoea, but no fatal cases occurred.

COOKSTOWN; *Cookstown, W.*—Two cases of small pox were admitted into the Fever Hospital from Stewartstown district. This district is very healthy.

COOKSTOWN; *Stewartstown*.—There are still some cases of scarlatina.

DUNGANNON; *Benburb*.—Scarlet fever prevalent during past month, but mild form of disease.

DUNGANNON; Clonavaddy.—A few cases of scarlatina at the beginning of the quarter, but no deaths. The closing of Inishmagh National School prevented, in a great measure, the spread of the contagion.

DUNGANNON; Coal Island.—Measles prevalent during the quarter, and a few mild cases of scarlatina have been under treatment. Some cases of diarrhoea have also occurred, with one death therefrom.

OMAGH; Gortin.—This village is exceedingly ill off at present for a proper water supply. It has been found quite impossible to keep the present supply free from dangerous pollutions.

OMAGH; Omagh, No. 1, W.—There was a large number of cases of a mild type of scarlatina during the quarter, but only one death.

STRABANE; Newtownstewart.—There was an epidemic of scarlet fever and three cases of enteric fever, no deaths.

STRABANE; Plumb Bridge.—No improvement whatever in the water supply of the village.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; Killaan.—This district almost free from disease for past quarter as well as the four preceding quarters, even advanced phthisical cases appearing to remain stationary, if not to improve.

BALLINASLOE; Kiltormer.—There were a few cases of typhoid fever but it has now abated. There was one death of a person aged 95 years.

CLIFDEN; Roundstone, No. 2.—Of the nine persons aged 60 years and upwards whose deaths were registered, six were 80 years of age, and one had reached the great age of 104 years.

GALWAY; Oranmore.—Of the deaths registered nine were of the respective ages of 60, 70, 74, 78, 80, 84, 86, 88, and 92 years.

LOUGHREA; Bullaun.—One death registered of a woman whose age was recorded as 95 years.

TUAM; Tuam, No. 2.—Whooping-cough has slightly showed itself amongst children.

Leitrim County.

MANORHAMILTON; Manorhamilton W.—Whooping-cough prevalent.

MOHILL; Carrigallen.—There have been two cases of typhoid, one recovered at home, the other was sent to hospital from same house which was afterwards disinfected. No other zymotic disease prevails in the district, the sanitary condition of which is fairly good.

MOHILL; Rinn.—There is a very widespread epidemic of measles in the district at present, generally of a mild type. Otherwise the health of the district is good.

Mayo County.

BELMULLET; Bangor.—Croup while it lasted was very severe, but only fatal in two cases.

SWINEFORD; Loupark.—Three deaths from a bad form of typhoid fever have taken place during the quarter. I believe it to have originated from bad drinking water. There is no case at present of the disease in the district. Vaccination very much neglected as usual.

SWINEFORD; Swineford, W.—Vaccination deficient.

WESTPORT; Ballycroy.—There were four deaths registered aged respectively 86, 88, 89, and 90 years. Vaccination postponed owing to my attending scarlet fever. There is a very bad form of tonsillitis attacking both young and old still in my district.

Roscommon County.

ATHLONE; Brideswell.—In consequence of whooping-cough being prevalent vaccination was postponed for a little time.

CASTLEREAGH; Castlereagh, W.—Two deaths of very old persons registered during quarter—one aged 91 years and the other 95 years.

STROKESTOWN; Strokestown, W.—Water supply has been unsatisfactory owing to some defects in the works. There was a slight epidemic of typhus during the quarter, but no deaths from same.

Sligo County.

DROMORE WEST; Easky, W.—No infectious disease prevalent except a few cases of scarlet fever.

SLIGO; Carney, No. 1.—Vaccination had to be postponed owing to a mild form of measles and mumps during the summer months.

SLIGO; Collooney.—Two cases enteric fever during quarter. Both recovered.

Marriages:—JULY, AUG., SEPT., 1893. **Births & Deaths:**—OCT., NOV., DEC., 1893.

*General Register Office, Charlemont House,
Dublin, 27th January, 1894.*

During the quarter ended 31st December last, there were registered in the 801 Registrars' Districts in Ireland 24,463 births—a number equal to an annual birth-rate of 21·2 in every 1,000 of the estimated population—and 21,960 deaths, representing an annual rate of 19·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,165 persons emigrated. A decrease of 1,662 would, therefore, appear to have taken place in the population during the quarter. The population estimated to the middle of the year 1893, was 4,615,190.*

In England last quarter, the birth-rate represented was 29·4 in every 1,000 of the estimated population, and the death-rate 20·1 per 1,000.

The birth-rate in Ireland for the quarter is 0·1 under the average rate for the corresponding quarter of the ten years 1883–92, but 0·8 over the rate for the fourth quarter of 1892. The deaths are above those registered in the corresponding quarter of 1892 to the extent of 2,917; the death-rate is 2·6 over the rate for that quarter, and also 2·4 over the average for the fourth quarter of the ten years 1883–92.

Compared with those for the corresponding quarter of 1892, the returns of pauperism, furnished by the Local Government Board, show an increase of 1,118 or 2·7 per cent. in the average number of Work-house inmates on Saturdays during the quarter, and a decrease of 206 in the average number of persons on out-door relief.

* See page 285.

Compared with the averages for the fourth quarter of the ten years 1883-92 the number of Workhouse inmates shows a decrease of 2,154 and the number of persons on out-door relief a decrease of 2,088

The marriage-rate (4·2) for the third quarter of 1893 is 0·4 over the average rate for the corresponding quarter of the ten years, 1883-92.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the quarter ended 30th September, 1893, and by the **Births** and **Deaths** registered in the Quarter ended 31st December, 1893.

MARRIAGES.

The marriages (4,841) registered in Ireland during the third quarter of 1893 are equal to an annual rate of 4·2 per 1,000 of the estimated population, being 0·1 over the rate for the corresponding quarter of 1892, and 0·4 above the average rate for the third quarter of the ten years 1883-92. Of the total marriages, 3,131 were registered under the provisions of the 26 & 27 Vic., cap. 90, and 1,710 under the 7 & 8 Vic., cap. 81; the former number being equal to an annual rate of 3·60 per 1,000 of the estimated Roman Catholic population, and the latter to a rate of 6·02 per 1,000 of the members of all other religious persuasions. Compared with the averages for the corresponding quarter of the ten years, 1883-92, the rate for Roman Catholic marriages shows an increase of 0·4, and that for all other marriages an increase of 0·1. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the *first* quarter, while as regards other marriages, there is generally but little difference in the numbers registered in the several quarters.

* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891.

TABLE II.—Showing by Quarterly Periods, the Marriages registered in Ireland in the ten years 1883–92, and the first three quarters of 1893,

BIRTHS.

The number of births registered during the quarter ended 31st December last was 24,463—12,609 boys and 11,854 girls—being equal to an annual ratio of 1 in every 47.2, or 21.2 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1883–92 was 25,670, equivalent to an annual rate of 21.3 per 1,000 of the estimated mean population of those years. Thus the birth-rate was 0.1 under the average.

The respective birth-rates for the four provinces last quarter are—Leinster, 20.8 per 1,000 of the population, according to the Census of 1891; Munster, 19.6; Ulster, 22.0; and Connaught, 20.0.

The highest county birth-rate* is 27.5 for Antrim, and the lowest 14.6 for Monaghan. Of the intermediate rates the highest five are—Down, 26.3; Dublin, 25.6; Mayo, 22.4; Armagh, 21.0; and Clare, 21.0; and the lowest five are—Meath, 16.3; Westmeath, 16.6; Cavan, 16.8; King's, 16.9, and Sligo, 17.0.

DEATHS.

The deaths registered in Ireland during the quarter ended 31st December last amounted to 21,960—10,738 males and 11,222 females—affording an annual ratio of 1 in every 52.5, or 19.0 per 1,000 of the estimated population, against an average rate of 16.6 per 1,000 for the corresponding quarter of the ten years 1883–92.

The death-rate in Leinster was 21.8 per 1,000 of the population according to the Census of 1891; in Munster, 18.7; in Ulster, 18.7; and in Connaught, 13.4.

The county death-rates* range from 10.1 in Sligo, to 27.2 in Carlow. Between these rates the lowest five are—Mayo, 12.3; Longford, 13.4; Leitrim, 13.6; Cavan, 14.0; and Donegal, 14.4; and the highest five are—Dublin, 25.4; Queen's, 25.0; Antrim, 24.2; Waterford, 24.0; and Wexford, 24.0.

* See note on foregoing page.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1883–92, and the average number for that period; also the number registered during each quarter of the year 1893 :—

| Average, 1883–92, | 24.1 | 24.6 | 22.3 | 21.3 | 23.1 | 22.3 | 19.4 | 14.8 | 16.6 | 18.2 |
| 1893, | 23.6 | 24.5 | 22.6 | 21.2 | 23.0 | 19.8 | 17.6 | 15.4 | 19.0 | 17.9 |

Ages.—Of the 21,960 deaths registered last quarter, 2,618, or 11.9 per cent., were of children under 1 year old; and 9,386, or 42.7 per cent., were of persons aged 60 years and upwards. The number in the latter group is much above the average. The deaths of infants under 1 year old are equal to 107.0 per 1,000 of the births registered. In the Province of Leinster the number of deaths of children under 1 year old equalled 11.9 per cent. of the total deaths registered therein; in Munster, 11.2 per cent.; in Ulster, 12.5 per cent.; and in Connaught, 11.7 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 40.8 per cent.; in Munster to 45.7 per cent.; in Ulster to 40.3 per cent.; and in Connaught to 48.9 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Compared with the average for the corresponding period in the preceding ten years, the death-rate for last quarter shows an increase equivalent to about 14.5 per cent., the rate being higher than that for any of those periods. Measles was prevalent in Belfast and Limerick; diphtheria proved very fatal in a few districts in Ulster, and whooping-cough and enteric fever were prevalent in Dublin and Belfast, with the result that notwithstanding a large decline in deaths from typhus and from simple continued fever, the aggregate number of deaths from what are known as the principal zymotic diseases* was slightly above the average for the December quarter, but it is clear from the Registrars' Notes on pages 350–62 that the excess in the general mortality is mainly due to the widespread prevalence of influenza and its pulmonary complications.

DISEASES.—The deaths from the principal zymotic diseases* registered during last quarter amount to 1,514, a number equivalent to an annual rate of 1.3 per 1,000 living, being 0.5 under the rate for the preceding three months, but 0.4 over the comparatively low rate for the fourth quarter of 1892, and 0.1 above the average rate for the fourth quarter of the ten years 1883–92.

* See note on page 273.

Smallpox.—No deaths from smallpox have been registered in Ireland since the last quarter of the year 1891. In the returns for the third quarter of 1893, cases of smallpox were reported from three districts, but the Registrars' Notes for last quarter do not contain any reference to the occurrence of any cases of the disease.

Measles.—Deaths from measles which after having risen from 147 in the first quarter of 1893 to 311 in the following three months, fell to 243 in the third quarter, rose again last quarter to 309 or more than thrice the average number (100) for the fourth quarter of the five years 1888–92. The 309 deaths were distributed through the Provinces as follows:—In Leinster 56, in Munster 110, in Ulster 133, and in Connaught 10. On this occasion, as in the preceding quarter, one-fourth of the deaths from measles occurred in Belfast Union or Superintendent Registrar's District, the number for last quarter being 79. In Limerick Union there were 35 fatal cases of the disease last quarter (a number equal to an annual rate of 2 per 1,000 of the population); in Dublin South Union, 23; in Nenagh Union, 14 (equivalent to an annual rate of 2 per 1,000 persons); and in Clones Union 10 (a number equal to an annual rate of 2·2 per 1,000). It will thus be observed that in the five Unions named 161 deaths from measles were recorded, being more than one-half of the number for the whole country. In Roosky District, Strokestown Union, with a population under 7,000, there were 7 deaths from this cause.

Scarlatina caused 143 deaths, being 56 over the number for the preceding three months, and 26 in excess of the average for the fourth quarter of the five years, 1888–92. There are six Unions in each of which 5 or more deaths from this disease were registered, viz.:—Belfast, 18 deaths; Castlebar, 6 (all in Balla District with a population under 10,000); Dublin South, 7; Kilkenny, 5; Lisburn, 5; and Westport, 6. The total number for the Province of Leinster is 49; for Munster, 11; for Ulster, 63; and for Connaught, 20.

Typhus.—The average number of deaths from typhus registered during the fourth quarter of the five years 1888–92 was 85, but during last quarter there were only 44 deaths, being the lowest quarterly number of which there is record. Of the 44 deaths 12 were in Leinster, 21 in Munster, 3 in Ulster, and 8 in Connaught. The highest number registered in any one Union is 4 the number for Cork Union, and of these 4 deaths, 3 were in the City of Cork. There were also 3 deaths from the disease in the Urban Sanitary District of Galway.

Whooping Cough.—Owing mainly to the prevalence of the disease in Belfast and the Dublin Registration District, the mortality from whooping-cough was above the average, the deaths amounting to 280 against 233 in the preceding three months, and an average of 255 for the fourth quarter of the five years 1888–92. Of the 280 deaths, 65 (equal to an annual rate of 1 per 1,000 living) occurred in the City of Belfast, where during the preceding quarter, also, the disease caused 65 deaths, and 62 in the Dublin Registration District, the mortality in the latter area being almost exclusively confined to the southern portion of the district. Outside of the Unions in which Belfast and the Dublin Registration District are situate, there are eleven Unions in each of which 5 or more deaths from whooping-cough were registered, including four in which the annual rate represented by the deaths from this cause was over 1 per 1,000 of the population, viz.:—Abbeyleix (1·5 per 1,000), Drogheda (1·1), Rathkeale (1·4), and Shillelagh (1·4). The total number for the Province of Leinster is 104, for Munster 37, for Ulster 119, and for Connaught 20.

Diphtheria was very fatal in a few localities during last quarter, and there are 7 Unions in each of which 5 or more deaths from this disease were registered, all of these being in the Province of Ulster, viz.:—Antrim Union where there were 6 deaths, Ballymena 6 (including 5—equal to an annual rate of 2·5 per 1,000 of the population—in Galgorm district); Belfast 14; Enniskillen 5; Londonderry 14 (12 of which—equal to an annual rate of 1·4 per 1,000 of the population in 1891—were in the Urban Sanitary District of Londonderry); Lurgan 8; and Strabane 16, the last number including 14 in Castlefinn District, where the deaths from this cause were equal to an annual rate of 9 per 1,000 of the population. In other parts of Ulster there were 25 deaths from diphtheria, the gross number for the Province being 94, while in the Province of Leinster there were only 12 fatal cases of the disease; in Munster 12; and in Connaught 14. The total number for Ireland (132) is the highest number for any quarter since the first quarter of 1888, when 138 deaths from this cause were registered, and is 46 over the number for the third quarter of 1893, and 37, or 39 per cent., in excess of the average for the fourth quarter of the five years 1888–92.

Simple continued and ill-defined Fever.—The number of deaths returned under this heading is 28, being 3 over the low number for the preceding three months, but 22 under the average for the fourth quarter of the five years, 1888–92. Eight of the 28 deaths occurred in the Province of Leinster, 9 in Munster; 9 (including 7 in Ballylesson district, Lisburn Union) in Ulster; and 2 in Connaught.

Enteric Fever caused 257 deaths, being 33 over the number for the preceding three months, 26 in excess of the average for the fourth quarter of the five years 1888–92, and the highest number in any quarter since the last quarter of 1889, when 306 deaths from this disease were registered. The deaths from enteric fever in the Dublin Registration District and the Union of Belfast form about one-half of the total number for Ireland, there having been in the former area 85 fatal cases of the disease and in the latter 42. The 130 deaths in other parts of the country comprise 7 (equal to an annual rate of 1·4 per 1,000 of the population) in Bandon Union; 7 in the Union of Cork; 7 (equivalent to an annual rate of 1·3 per 1,000) in Ennis Union; and 5 (equal to an annual rate of 1·3 per 1,000) in Lismore Union. The total number for the Province of Leinster is 105; for Munster 58; for Ulster 88; and for Connaught 6 only.

Diarrhœa.—The number of deaths ascribed to diarrhœa is 316 or 10 over the average for the corresponding quarter in the preceding five years. In Leinster there were 89 deaths from this cause (including 57 in the Dublin Registration District); in Munster 62; in Ulster 150, (58 of which were in the City of Belfast); and in Connaught 15.

Simple Cholera.—Three deaths in Leinster, 1 in Munster, and 1 in Ulster were ascribed to this disease.

Hydrophobia.—One death from hydrophobia was registered; it occurred in Munster.

The Registrars, in their Notes, report the presence of the following diseases:—Chicken-pox in 2 districts, measles in 81, scarlatina in 45, whooping-cough in 30, diphtheria in 9, fever in 30 (typhus 6, enteric 18, and simple continued fever 6), and influenza in 267.

Inquests.—There were 599 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 37 of the total deaths registered.

In Leinster there was 1 inquest to every 32 deaths registered, in Munster 1 to 54, in Ulster 1 to 32, and in Connaught 1 to 43.

Deaths in Public Institutions.—Of the 21,960 deaths registered 3,444, or 15·7 per cent. occurred in public institutions. In Leinster the percentage was 21·4, in Munster 20·2, in Ulster 9·4, and in Connaught 9·7.

following table (TABLE IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1893, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population :—

| PERIOD. | Total Deaths registered. | Deaths from Principal Zymotic Diseases. | | | | | | | | | | Total. | Percentage of Total Deaths. | Number in every 100,000 of the Population. |

URBAN SANITARY DISTRICTS.

Separate statistics for the Urban Sanitary Districts are given in Tables V. and VIII.

The death-rate for last quarter in these districts, which contain nearly one-fourth of the al population of the country, was 25·8, and the birth-rate 27·7 per 1,000 of the population, ording to the Census of 1891; in the remainder of the country the death-rate was 16·5 and the birth-rate 18·6 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Sanitary Districts during the quarter was 2·8 per 1,000 of the population, according to the usus of 1891: in the remainder of the country the rate was 0·8 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1893, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—"The Dublin Registration District," which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for of the fifteen Urban Sanitary Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the thirteen weeks ending Saturday, 30th December, 1893.

† See note (†) on preceding page.

† The rates for Belfast have been calculated on the population estimated in the middle of the year 1893.

VACCINATION.

According to the Returns of Vaccination received for the fourth quarter of the year 1893, there were 20,220 persons successfully vaccinated; in 3,418 cases the operation was postponed, and 28 children were reported as insusceptible of vaccination. The deaths of 1,575 unvaccinated children under 3 months old were registered during the quarter, making a total of 25,241 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st December last, was 4,165 (1,785 males and 2,380 females), being 403 less than in the corresponding quarter of 1892, and 4,261 under the average number for the fourth quarter of the ten years 1883-92.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December, in 1892 and 1893:—

| MONTHS. | NUMBER OF EMIGRANTS. | | | | | | | | | | | |
|-------------|----------------------|-------|-----------|-----------|----------|-------|-----------|-----------|--------|-------|-----------|-----------|
| | Males. | | | | Females. | | | | Total. | | | |
| | 1892. | 1893. | Increase. | Decrease. | 1892. | 1893. | Increase. | Decrease. | 1892. | 1893. | Increase. | Decrease. |
| October, . | 761 | 953 | 192 | — | 1,014 | 1,566 | 552 | — | 1,775 | 2,519 | 744 | — |
| November, . | 841 | 556 | — | 285 | 1,127 | 627 | — | 500 | 1,968 | 1,183 | — | 785 |
| December, . | 433 | 276 | — | 157 | 392 | 187 | — | 205 | 825 | 463 | — | 362 |
| Total, . | 2,035 | 1,785 | — | 250 | 2,533 | 2,380 | — | 153 | 4,568 | 4,165 | — | 403 |

PRICES AND PAUPERISM.

The price of Messrs. Boland's (Limited) 4-lb. loaf throughout last quarter was $5\frac{1}{2}d.$, which was also the price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of 1892 the average price was $6d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $15s. 3d.$ per cwt., which was also the average price for the corresponding quarter of 1892. In the fourth quarter of 1883 the average price was $17s. 6d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $2s. 2d.$ to $2s. 9d.$ In the fourth quarter of 1892 the average prices were $2s. 1d.$ to $2s. 6d.$, and in the corresponding quarter of 1883 they were $2s. 2d.$ to $3s.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $43s.$ to $55s.$ per cwt. In the corresponding quarter of 1892 the average prices were from $41s. 6d.$ to $51s.$, and in the fourth quarter of 1883 they were from $60s.$ to $71s. 6d.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from $21s.$ to $30s.$ per ton.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $\pounds 98\frac{3}{4}$, and the lowest $\pounds 97\frac{5}{8}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland remained during the quarter at 4 per cent. to which it had been reduced on the 21st September last.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1893 was 42,747, or 1,118 over the average for the corresponding period in 1892.

The average weekly number of persons receiving out-door relief during the quarter was 56,763, being 206 under the average for the fourth quarter of 1892.

Of the persons receiving in-door relief during the fourth quarter of 1893, an average number of 1,149 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1892 the average weekly number was 1,112.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1893, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

| PERIOD. | Average PRICES OF PROVISIONS. | | | | | | | | PAUPERISM. | |
|----------------------------------|-------------------------------|-------|--|---|--------|---|---------|--------|-------------------------------|-----------|

(a) Bolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ¼d. per 4lb. loaf lower.

(c) Messrs. Manders and Co.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the fourth quarter of the years 1888–93, respectively,

* Latitude 53° 21' 44.65" north; longitude 6° 21' 6.35" west. Height above the sea 162.2 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey. (See Table on page 284):—

The mean height of the barometer during the fourth quarter of 1893 was 29·933 inches, against an average of 29·894 inches for the corresponding quarter of the five years 1888–92; the highest reading (30·718 inches) was on the 30th December, at 9 A.M., air calm; and the lowest (28·583 inches) on the 13th December, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 44·0°, against an average of 43·9° for the fourth quarter of the five years 1888–92. The maximum temperature was 66·9°, and the minimum 23·4°. The maximum heat in sun was 111·9°, and the minimum on the grass 17·0°.

Rain or snow fell on 63 days during the quarter. The rain-fall measured 5·485 inches, being 2·444 inches under the average for the fourth quarter of the five years 1888–92. The greatest monthly rain-fall was in December, when 2·565 inches were registered.

The wind blew on 41 days from W., on 22 days from S.W., on 12 days from N., on 4 days from E., on 3 days from N.W., on 2 days each from N.E., S.E., and S., and the air was calm on 4 days at 9 A.M.

October.—The mean height of the barometer during this month was 29·860 inches; the highest reading (30·505 inches) was on the 23rd, at 9 A.M., wind W.; and the lowest (29·059 inches) on the 4th, at 9 P.M., wind W. The mean temperature of the air was 48·4°, the maximum registered was 66·9°, and the minimum 26·7°. The 21st was the warmest day, and the 31st the coldest night. The mean of the dry bulb was 48·0°, and of the wet bulb 45·6°. The maximum heat in sun was 111·9°, and the minimum on the grass was 19·7°. The minimum on the grass was below 32° on fourteen nights. The total amount of sunshine recorded was 114·8 hours, the greatest daily amount being 9·4 hours on the 5th. The maximum ozone was ·9, the minimum ·1, and the mean ·6. Rain or snow fell on 18 days. The rain-fall measured 1·190 inches; the greatest amount in 24 hours was ·280 inch on the 14th.

November.—The mean height of the barometer during this month was 30·071 inches; the highest reading (30·582 inches) was on the 21st, at 9 A.M., wind N.E.; and the lowest (28·873 inches) on the 16th, at 9 P.M., wind S.E. The mean temperature of the air was 42·0°, the maximum registered was 55·9°, and the minimum 23·4°. The 3rd was the warmest day, and the 7th the coldest night. The mean of the dry bulb was 42·3°, and of the wet bulb 40·4°. The maximum heat in sun was 92·0°, and the minimum on the grass 17·8°. The minimum on the grass was below 32° on 16 nights. The total amount of sunshine recorded was 51·6 hours, the greatest daily amount being 7·0 hours on the 5th. The maximum ozone was ·9, the minimum ·2, and the mean ·6. Rain or snow fell on 22 days. The rain-fall measured 1·730 inches; the greatest amount in 24 hours was ·460 in. on the 16th.

December.—The mean height of the barometer during this month was 29·882 inches; the highest reading (30·718 inches) was on the 30th, at 9 A.M., air calm; and the lowest (28·583 inches) on the 13th, at 9 A.M., wind S.W. The mean temperature of the air was 41·7°, the maximum registered was 56·8°, and the minimum 24·8°. The 15th was the warmest day, and the 2nd the coldest night. The mean of the dry bulb was 41·9°, and of the wet bulb 40·1°. The maximum heat in sun was 94·2°, and the minimum on the grass 17·0°. The minimum on the grass was below 32° on 19 nights. The total amount of sunshine recorded was 72·3 hours, the greatest daily amount being 6·8 hours on the 1st. The maximum ozone was ·9, the minimum ·1, and the mean ·6. Rain or snow fell on 23 days. The rain-fall measured 2·565 inches; the greatest amount in 24 hours was ·660 inch on the 24th.

* At Valencia cloud amount is observed at 10 a.m. and 10 p.m. each day, and rainfall at 10 a.m.

NOTE.—From the beginning of the year 1890 the mean pressures shown in these tables have been given therefore they are not directly comparable with each other. If it be desired for any purpose to reduce temperature) are as follow:—*Valencia* +·059; *Killarney*, +·102; *Birr Castle*, +·191; *Dublin*

mentioned Eight IRISH STATIONS, in connexion with the METEOROLOGICAL OFFICE, kindly furnished by the METEOROLOGICAL COUNCIL.

At this Station Greenwich mean time is kept, but at the other Stations Local time is observed, corrected for instrumental error, and reduced to 32° Faht. as before, but not reduced to mean sea level, and then to the normal, the approximate corrections for the purpose (varying within slight limits with the pressure and City). +.058, *Markree Castle*, +.141 ; *Armagh*, +.224 ; *Brookeborough*, +.283 ; *Londonderry*, +.090.

| | | | | | | | | 1893 | 4,615,190 | 2,279,169 | 2,336,021 |

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841.—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-93.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

MARRIAGES Registered during the Quarter ending 30th September, 1893, in the PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st December, 1893; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHŒA, and CHOLERA; also VIOLENT DEATHS,* INQUEST CASES, and DEATHS IN PUBLIC INSTITUTIONS, Registered during the Quarter ending 31st December, 1893, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

| Provinces and Counties | Area, in Statute Acres. | Popu- lation in 1891. | Marriages. | | Births. | | Deaths. | | The Deaths registered during the Quarter are stated by the Registrars to include | | | | | | | | | | | | | Vaccination Return for the Quarter ending 31st Dec., 1893. | | | | Total of the foregoing. | | |
|------------------------------|----------------------------------|-----------------------------|--|---|--|---|--|---|--|--|------------|----------|-------------|---------|-----------------|-------------|---|----------------|------------|----------|------------|---|---|---|--|-------------------------|-------|--------|
| | | | Averages in the Quarter ending 30th Sept., 1893. | Registered in the Quarter ending 31st Dec., 1893. | Averages in the Quarter ending 8 years, 1885-92. | Registered in the Quarter ending 31st Dec., 1893. | Averages in the Quarter ending 8 years, 1885-92. | Registered in the Quarter ending 31st Dec., 1893. | Deaths of | | | | | | | | | | | | | Number of successful primary Vaccinations. | Number of Cases in which Vaccination was postponed. | Number of Persons susceptible of Vac- cination. | Number of Unvacci- nated Children under 3 months old, whose deaths were registered during the Quarter. | | | |
| | | | | | | | | | Children under 1 year of age. | Persons aged 60 years and up- wards. | Small-pox. | Measles. | Scarlatina. | Typhus. | Whooping-cough. | Diphtheria. | Simple continued and ill-defined Fever. | Enteric Fever. | Diarrhoea. | Cholera. | Violence.* | | | | | | | |
| IRELAND. | 20,327,947 | 4,704,750 | 4,641 | 4,841 | 25,227 | 24,463 | 19,800 | 21,960 | 2,618 | 9,386 | - | 309 | 143 | 44 | 280 | 132 | 28 | 257 | 316 | 5 | 255 | 599 | 3,444 | 20,220 | 3,418 | 28 | 1,575 | 25,241 |

* The Registrars' Districts (801 in number) are Subdivisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions are identical with the Dispensary Districts of the same names formed under the Medical Charities Act.

The letter W denotes that the Registrar's District (or portion of a district) contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrar's Districts in italics. The letter W denotes that the Union Workhouse is situated in the District or portion of District in the County.

1. PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly, part of*.—Influenza prevalent during the quarter. Several cases of scarlatina also occurred.

CARLOW; *Borris*.—Influenza rather prevalent, and when complications occur, very fatal in elderly people.

CARLOW; *Carlow, part of, W*.—Influenza prevailed during the quarter; measles and a few cases of scarlatina also came under treatment.

CARLOW; *Leighlinbridge*.—A very widespread epidemic of influenza.

ENNISCORTHY; *Newtownbarry, part of*.—Scarlatina and measles have been very prevalent during the quarter, but so far only one death has been registered as due to scarlatina, and no fatal case of measles has been registered. In the latter part of the quarter influenza has been extremely prevalent, and with old people very fatal. Six deaths due to this cause have been registered.

Dublin County.

BALROTHERY; *Kilsallaghan*.—District healthy, with exception of a few cases of influenza.

BALROTHERY; *Lusk*.—Influenza prevalent during quarter.

BALROTHERY; *Swords*.—Influenza has been prevalent, without any fatal results, but leaving very general physical depression.

CELBRIDGE; *Rathcoole*.—Influenza and scarlet fever of mild type during quarter.

DUBLIN NORTH; *Blanchardstown and Castlemnock*.—Influenza has been most prevalent in the district, with a few cases of scarlatina of a mild form.

DUBLIN NORTH; *Clontarf and Howth*, No. 2.—Influenza very prevalent at present.

DUBLIN NORTH; *Coolock and Drumcondra*, No. 2.—There has been an epidemic of whooping-cough, but as yet no deaths have occurred. I had also one case of measles, the disease being probably contracted in the city. Influenza is rather prevalent just now.

DUBLIN SOUTH.—*Clondalkin*.—Measles, but of a mild type, rather prevalent.

DUBLIN SOUTH; *Tallaght*.—Vaccination postponed for last month owing to measles and influenza.

RATHDOWN; *Bray and Rathmichael*, No. 2, part of.—Influenza prevalent.

RATHDOWN; *Blackrock and Stillorgan*, No. 2.—There was a good deal of influenza during the quarter, but no fatal case reported.

RATHDOWN; *Dundrum and Glencullen*, No. 1.—Influenza very prevalent; some cases of pertussis (whooping-cough).

Kildare County.

ATHY; *Castledermot*.—There is a severe epidemic of both influenza, for the past two months, and rubella or measles for the past fortnight, generally through the whole district.

BALTINGLASS; *Rathvilly, part of*.—See note under head of Carlow County.

CELBRIDGE; *Kilcock*.—Influenza has been prevalent during past quarter; in one case it proved fatal. There were some cases of scarlatina from which one child, three years of age, died. The death of a man was registered who was within two months of 98 years of age, and of another 97 years of age.

EDENDERRY; *Carbury*.—Influenza and chest diseases very prevalent; also tonsillitis and external abscesses of throat. Measles, which had been prevalent, has disappeared. Only four deaths registered, the youngest being at 70 years of age.

NAAS; *Kildare*.—There were some cases of scarlatina and typhoid fever, but the persons recovered. Influenza is very prevalent.

NAAS; *Newbridge*.—Influenza has again been epidemic, but has been of a mild type.

Kilkenny County.

CALLAN; *Callan, W.*—Influenza has been very prevalent during the quarter. No other epidemic or infectious disease.

CASTLECOMER; *Ballyragget*.—Vaccination was postponed in fourteen cases, owing to prevalence of influenza and tonsillitis.

CASTLECOMER; *Castlecomer, W.*—Influenza of a very severe type has been very rife during the quarter. Measles and scarlatina are still prevalent, but only two deaths from each disease have occurred.

KILKENNY; *Gowran*.—Vaccination for the past two months has been *nil* in consequence of the prevalence of scarlet fever, measles, and influenza. The first two of these were spread to an enormous extent through the schools, the parents concealing and not reporting the disease, and sending children to school before they were sufficiently recovered.

NEW ROSS; *Dysartmoon*.—There has been a mild epidemic of scarlet fever.

THOMASTOWN; *Inistioge*.—One death registered of a female at 98 years, and one of a male at 90 years.

THOMASTOWN; *Knocktopher*.—The district was visited with a most virulent type of influenza during the quarter. The complications were very grave, including acute mania, broncho- and pleuro-pneumonia, and articular rheumatism. The disease claimed many victims among old people.

WATERFORD; *Kilmakoge*.—Owing to the prevalence of influenza there was no vaccination.

King's County.

MOUNTMELICK; *Clonygowan, part of*.—Influenza is epidemic, but not of as severe a character as when it last visited this district.

PARSONSTOWN; *Frankford*.—Epidemic influenza very prevalent in district. No deaths therefrom.

PARSONSTOWN; *Kinnitty*.—Influenza has been very prevalent during the quarter.

PARSONSTOWN; *Parsonstown, W.*—Universal influenza, and a large number of cases of measles.

ROSCREA; *Roscrea, No. 1, part of*.—Influenza and erysipelas being very prevalent, the vaccinations had to be almost suspended.

TULLAMORE; *Kilbeggan, part of*.—Influenza epidemic.

TULLAMORE; *Tullamore, W.*—Influenza has re-appeared since October in odd cases, but becoming more prevalent every day. Broncho-pneumonia, gastritis, and sore throat are usual complications.

Longford County.

BALLYMAHON; *Abbeyskrule*.—Measles and influenza prevalent, but no fatal case. The Guardians having taken legal proceedings against vaccination defaulters, the parents are now bringing in the children. Up to the present time the parents would bring the children at their own convenience.

GRANARD; *Scrabby, part of*.—At present there is a mild form of influenza epidemic in district. No deaths from it.

GRANARD; *Street, part of*.—Influenza has been epidemic for the past fortnight.

LONGFORD; *Killashee*.—Measles and influenza have been, and are still prevalent, but not fatal.

LONGFORD; *Longford, W.*—Influenza, of a mild type, is very prevalent at present. Scarlet fever occurred in two families. Vaccination is still very backward.

Louth County.

DROGHEDA; *St. Mary's, part of*.—Epidemic influenza was very prevalent during November and December, and was fatal in many cases. Measles and whooping-cough are also prevalent. The water supply of the town was very defective. It was turned on only for a short period (about half an hour) in the early morning for a considerable part of this quarter. The supply is better now, being turned on all day.

DROGHEDA; *Termonfeckin*.—Influenza has been widely epidemic during the quarter. One case of measles and three or four sporadic cases of scarlatina, of mild type, occurred during the final month of quarter. Owing to the unusual mildness of the season, the death-rate is low, as diseases of the respiratory organs, usually so fatal at this season to the aged and infirm, have been conspicuous by their absence.

DUNDALK; *Dundalk, W.*—There have been some cases of influenza for the past ten days, but as yet (2nd January) the disease is not prevalent.

Meath County.

ARDEE; *Drumcondra*.—Influenza again prevalent. Two deaths registered from that cause. In neither case was there any medical attendance.

DROGHEDA, *St. Mary's, part of, W.*—See note under head of Louth county.

DROGHEDA, *Slamullen*.—There has been an epidemic of influenza in the district during the past quarter, of a mild type. Otherwise the district has been healthy, with the exception of one case of typhus fever.

EDENDERRY; Ballybogan.—A good deal of influenza prevailed during the quarter.

KELLS; Moynalty, part of.—There were a great number of persons ill of influenza, and vaccination was postponed for a short time.

NAVAN; Navan, W.—Scarlatina, influenza, and whooping-cough have been epidemic during the quarter. The death of a woman, aged 105 years, was registered on authentic information. She retained her mental faculties to the end.

NAVAN; Painestown.—A mild form of influenza prevailed during the first half of the quarter.

OLDCASTLE; Oldcastle, W.—Influenza is very prevalent.

TRIM; Summerhill.—A few cases of scarlatina. Influenza very prevalent. Owing to these causes, vaccination has been postponed. The death of an old woman, at the age of 105 years, was registered.

Queen's County.

ABBEYLEIX; Ballinakill.—Influenza prevalent during quarter, but not proving fatal in any case. The death of a man was registered at the age of 95 years.

ABBEYLEIX; Castletown.—Influenza has been very prevalent for the last two weeks of the quarter, but is not fatal, if skillfully treated, except in the aged people.

CARLOW; Ballickmoyler.—Eight deaths of persons 80 years old and upwards, one of which was stated to be 100, were registered. Some cases of scarlatina at present, but no death from that disease registered.

CARLOW; Carlow, part of.—See note under head of Carlow county.

MOUNTMELICK; Clonygowan, part of.—See note under head of King's county.

MOUNTMELICK; Mountmellick, W.—Whooping-cough has been epidemic during quarter. Influenza for past six weeks has also been epidemic, and among old people chest complications (pneumonia and bronchitis) proved most fatal.

ROSCREA; Borris-in-Ossory.—The health of the district has been unsatisfactory for the past two months.

ROSCREA; Roscrea, No. 1, part of.—See note under head of King's county.

Westmeath County.

ATHLONE; Athlone, No. 1, W.—The death of a woman, whose age was stated to be 103 years, occurred in the workhouse. She retained her mental faculties unimpaired up to the very day of her death. Scarlatina, measles, and whooping-cough still prevail and vaccination is postponed in consequence.

BALLYMAHON; Ballymore.—A mild type of measles is prevalent.

GRANAID; Street, part of.—See note under head of Longford county.

MULLINGAR; Castletown Geoghegan.—In the case of a woman returned as aged 100 years, I made inquiries from relatives and inhabitants in neighbourhood, and all agree in saying she was the above age.?

MULLINGAR; Mullingar, W.—During the quarter children of tender years suffered to a very large extent from mumps, hence the small number vaccinated.

TULLAMORE; Kilbeggan, part of.—See note under head of King's county.

Wexford County.

ENNISCORTHY; Clonroche.—Small number of vaccinations due to prevalence of scarlatina and influenza. There were four deaths registered from the latter disease.

ENNISCORTHY; Ferns.—A mild form of scarlet fever is rather prevalent, and I was obliged to close a school and post office in consequence. A few cases of typhoid fever have occurred; also mumps.

ENNISCORTHY; Newtownbarry, part of.—See note under head of Carlow county.

GOREY; Coolgreany.—An epidemic of influenza occurred during quarter. One death registered 96 years of age.

NEW ROSS; Carrickbyrne.—A mild form of influenza prevalent.

NEW ROSS; Fethard, No. 1.—Influenza has been prevalent during November and December, and pneumonia has also been common. I saw one case of typhus fever which I had forthwith removed to the workhouse hospital. The water supply has been very deficient in several portions of the district; it is only within the last few days that the springs have shown a copious supply.

NEW ROSS; Fethard, No. 2.—Of ten deaths registered, five were at 70 years and upwards. A few isolated cases of influenza came under my notice.

WEXFORD; Bannow.—Influenza is very prevalent at present.

WEXFORD; Broadway.—During the quarter there has been an epidemic of chest affections, chiefly pneumonia; also some cases of influenza. There were three cases of enteric fever in one house, but there was no further spread of the disease, owing to sanitary precautions. One female died aged 102, one male aged 96, and three males aged 80 years respectively.

WEXFORD; Crossabeg.—Influenza and chest affections have been prevalent throughout the district during this quarter.

WEXFORD; Wexford, W.—Scarlatina and influenza are prevalent. The excessively high death-rate was caused by the severity of the weather during the past two months.

Wicklow County.

RATHDOWN; Bray and Rathmichael, No. 2, part of.—See note under head of Dublin county.

RATHDOWN; Delgany.—Deaths at advanced ages:—three at 80, and one at 84 years. Five cases of scarlatina, four of chicken-pox, seven of fever, three of diphtheria. One case of the last disease, a very bad one, recovered.

RATHDRUM; Newcastle.—There were three cases of scarlatina in one house, but, owing to sanitary precautions, it has not spread. Influenza has made its appearance again, but no deaths have been registered from it. The sanitary condition of the district is not what it should be.

RATHDRUM; Rathdrum, W.—There is a good deal of influenza in the district. There has been an outbreak of measles during the quarter, but it is now cleared off.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; Ballyvaghan, W.—One of the deaths recorded is that of a woman who reached the advanced age of 104 years.

CORROFIN; Corrofin, W.—With the exception of mild measles and influenza, the district was fairly healthy during the quarter. Influenza was almost universal, but not so defined in type as the great epidemic of a few years ago.

ENNIS; Ennis, No. 2.—Vaccination in great part postponed, due to prevalence of measles and influenza.

ENNIS; Newmarket.—A few cases of measles occurred in the first month of the quarter. Influenza prevailed during the whole period, with very serious consequences to those advanced in life, through lung complications.

ENNISTIMON; Ennistimon, W.—Vaccination had to be postponed, owing to the prevalence of measles. Influenza is now prevalent.

ENNISTIMON; Miltown Malbay.—I registered some deaths from croup, but I have very good reason to believe from what was afterwards drawn to my attention, that they were cases of diphtheria.

ENNISTIMON; Roadford.—Measles very prevalent during the quarter.

KILRUSH; Carrigaholt.—Cases of influenza, complicated with lung affections, are still prevalent.

KILRUSH; Kilkee.—Measles largely prevailed, also influenza.

KILRUSH; Kilrush, W.—Influenza extensively prevailed during the quarter, and four deaths from this cause are reported; otherwise the district was fairly healthy.

SCARRIFF; Annacarriga.—Measles very prevalent, but no deaths from it. Influenza also prevailed, but not of the same dangerous type as previously.

SCARRIFF; Feakle.—I am told influenza prevails, but I am not personally aware of it, as the people cure themselves.

TULLA; Tulla, W.—Measles was very prevalent in this district during the quarter, but as far as I know there was only one death. Influenza was also prevalent.

Cork County.

BANDON; Bandon, W.—Influenza prevalent during the quarter.

BANDON; Kilbrittain.—Vaccination very backward, owing to influenza being very prevalent.

BANTRY; Bantry, W.—Influenza prevails extensively in the district.

BANTRY; Durrus and Kilcrohane.—Influenza very prevalent. Vaccination backward on account of influenza.

CASTLETOWN; Kilcatherine.—Influenza becoming prevalent, a number of children being affected with it interferes very much with vaccination.

CLONAKILTY; Clonakilty, W.—Influenza rather prevalent, two deaths registered.

CORK; Ballincollig.—A severe epidemic of influenza, accompanied by lung affections, is passing over the district.

CORK; Carrigaline, No. 1.—One death from diphtheria during the quarter. The other cases of this disease which I saw were of a mild character. Some cases of influenza, in some instances complicated with bronchitis, but nothing to compare in numbers of cases attacked, or the violence of the disease, with the epidemic of the winter, 1890-91.

CORK; Carrigaline, No. 2.—Influenza and chest affections very prevalent during the latter portion of the quarter.

CORK; Carrignavar, No. 1.—Influenza was prevalent during the quarter; there was no death from this cause registered.

CORK; Cork, No. 1.—Eight deaths were registered from influenza for the quarter.

CORK; Cork, No. 5.—Measles, chicken-pox and mumps, also influenza, very prevalent during last quarter.

CORK; Dripsey.—There was an epidemic of measles amongst the children of district, and also an epidemic of influenza, from which there were no deaths.

CORK; Whitechurch.—Influenza was very prevalent during the past two months. I had no death due to the above cause.

DUNMANWAY; Dunmanway, W.—District healthy with the exception of some mild cases of influenza.

FERMOY; Fermoy, W.—Three deaths have been registered as due primarily to influenza. This disease has been very prevalent in the district for the past six weeks. The type, however, is milder than during former epidemics.

FERMOY; Rathcormack.—Colds and influenza prevalent. No fevers.

KANTURK; Kanturk, W.—I had to postpone vaccinations owing to epidemics of measles, whooping-cough, and influenza.

KILMALLOCK; Charleville, part of.—The district at present is healthy. We are just finished with an epidemic of influenza. I have thought it best not to call in the children for vaccination during the cold weather, and epidemic of influenza.

KINSALE; Ballyfeard.—Health of district rather bad. Erysipelas, influenza, complicated with chest affections, and in one case paralysis and diphtheritic tonsillitis, prevalent during quarter.

KINSALE; Ballymartle.—Three cases of enteric fever in one family, due to bad drinking water. Influenza a good deal over district.

MACROOM; Inchigeelagh.—The district was visited by a mild type of influenza; however there were no deaths caused by it, as far as I am aware, although several of almost every family in the district were attacked.

MACROOM; Macroom, W.—Vaccination was delayed in several cases, owing to the widespread prevalence of influenza.

MACROOM; Slieveveagh.—Influenza prevalent, and several deaths from complications.

MALLOW; Ballyclogh.—Influenza very prevalent in district during last half of quarter.

MALLOW; Buttevant.—Influenza prevails very extensively. In consequence I had to postpone vaccination for some time.

MALLOW; Rahan.—The district has been healthy during the past quarter, except a few cases of typhoid. There have been many cases of influenza complicated by bronchitis, all of which, with one exception, recovered.

MIDDLETON; Middleton, No. 2.—Influenza very prevalent in district during month of December; the febrile stage of the disease has been of shorter duration than during previous visitations, averaging about two days, and the severity and fatality of the disease have been less.

MIDDLETON; Walshtownmore, East.—Influenza was rather prevalent in the district during the month of December; up to this there has not been any fatal case.

MITCHELSTOWN; Kildorrery.—Measles prevailed during the months of October and November, but has now entirely disappeared. Influenza is prevalent amongst

the aged, and also young people, and is usually accompanied by some complication, such as bronchitis, pneumonia, laryngitis, quinsy, &c.

MITCHELSTOWN; Mitchelstown, part of, W.—Severe epidemics of measles, erysipelas, and influenza in district for past six weeks.

SKIBBEREEN; Dromdaleague.—Vaccination was very low, owing to prevalence of fever in the district

SKIBBEREEN; Union Hall.—Two-thirds of the population of my district are suffering from the prevailing influenza epidemic, which, however, is of a very mild type.

YOUGHAL; Templemichael, part of.—Health of district, with the exception of some cases of measles of a mild type, good.

Kerry County.

CAHERSIVEEN; Caher.—Influenza was very prevalent, but has now totally disappeared.

CAHERSIVEEN; Emlagh.—Influenza very prevalent during the quarter, but of a mild type. I am of opinion it was not so severe as in 1891, though some deaths have occurred from it amongst the very aged, all young people recovering as a rule.

CAHERSIVEEN; Glanbehy.—Seven died of influenza. There are a great many people laid up with that disease.

DINGLE; Anascaul.—Influenza prevalent during the quarter.

DINGLE; Castlegregory.—Vaccination was in a backward state during the last month of the past quarter, owing to the inclemency of the weather. I registered the death of a centenarian.

DINGLE; Dingle, W.—Up to the last fortnight the district was very healthy, but at present there is an epidemic of influenza, not of a severe type.

DINGLE; Ventry.—Two deaths from influenza. There is no epidemic, only some sporadic cases.

KENMARE; Kenmare W.—Whooping-cough at present prevalent in district.

KENMARE; Tuosist.—Owing to the prevalence of influenza and whooping-cough, I have thought it right to postpone vaccinations. I have not therefore vaccinated any since November 22nd, otherwise the vaccinations would have been up to the average.

KILLARNEY; Coom.—Influenza, measles, and whooping-cough prevalent throughout the district during the past quarter. A few old people died from influenza, whose deaths have not yet been registered. Vaccination interfered with owing to the above diseases.

KILLARNEY; Killarney, No. 1., W.—Influenza very prevalent and severe during end of October, November and December. No vaccinations in consequence.

KILLARNEY; Killarney No. 2.—I could not vaccinate, owing to the epidemic of influenza, which almost closed our schools.

KILLARNEY; Killorglin.—Influenza has been prevalent since November, and has, no doubt, influenced the death rate.

KILLARNEY; Molahiffe.—Vaccination had to be postponed, owing to the prevalence of measles and influenza. There has been one death registered at the age of 99 years.

LISTOWEL; Ballyduff.—There have been numerous cases of influenza in the district since December 1, complicated in many instances with bronchitis or broncho-pneumonia.

LISTOWEL; Ballylongford.—Vaccinations not up to the mark in consequence of severe weather.

LISTOWEL; Listowel, W.—One death from hydrophobia, the patient was bitten slightly on the side of the nose by a rabid terrier, on the 19th October, the symptoms developed on the 14th November, and he died in the hospital here on the 18th November.

LISTOWEL; Tarbert, No. 1, part of.—Whooping-cough prevalent.

TRALEE; Ardferit.—Several cases of influenza, with congestion of lungs, and ulcerated throat.

TRALEE; Castleisland.—A mild form of influenza prevailed during the last half of the quarter.

TRALEE; Castlemaine.—District generally healthy, with the exception of influenza, which prevails extensively.

TRALEE; Kilgobban.—One death is registered at the age of 104 years. From inquiries I have made, I believe the age stated is correct.

TRALEE; Tralee, No. 1, W.—Influenza prevalent at present, which prevents children from being brought in for vaccination.

TRALEE; Tralee, No. 2.—Influenza is prevalent, but there has been only one death registered from it.

Limerick County.

CROOM; Adare.—Epidemic measles very mild. No death from it.

CROOM; Castletown.—Several cases of enteric fever have occurred in the district during the quarter, though none proved fatal. The cause was apparently the scarcity of pure drinking water after such a dry summer.

CROOM; Croom, W.—Measles and influenza are very prevalent in the district, but no case has terminated fatally so far.

KILMALLOCK; Bruff.—Influenza prevalent, also pneumonia and bronchitis.

KILMALLOCK; Bruree.—Influenza prevalent.

KILMALLOCK; Charleville, part of.—See note under head of Cork county.

KILMALLOCK; Kilfinnane.—Vaccinations postponed on account of measles and influenza.

KILMALLOCK; Kilmallock, W.—Influenza very prevalent in district during quarter, developing symptoms of broncho-pneumonia in a large number of cases.

LIMERICK; Annacotty.—Influenza of a mild type prevalent.

LIMERICK; Limerick No. 1.—Owing to the prevalence of measles during the quarter, the number of vaccinations is much below the average.

LISTOWEL; Tarbert, No. 1, part of.—See note under head of Kerry county.

LISTOWEL; Tarbert, No. 2.—Whooping-cough and measles very rife in district. The former is responsible for two deaths, the latter for one. I was forced to abandon vaccinations of children owing to presence of foregoing diseases.

MITCHELSTOWN; Galbally.—Acute bronchitis and pneumonia prevalent. Three of the deaths registered in the quarter were between 90 and 95 years, and two between 80 and 85.

MITCHELSTOWN; Mitchelstown, part of.—See note under head of Cork county.

NEWCASTLE; Ardagh.—Whooping-cough in district during past quarter. Influenza at present in district, one death registered from same.

NEWCASTLE; Newcastle, W.—Influenza prevalent.

RATHKEALE; Askeaton.—Measles with whooping-cough has been very prevalent in this district during the past quarter. Measles followed by pneumonia caused one death, and whooping-cough with lung complications caused six deaths; the district is now free from these diseases. Influenza is appearing complicated with congestion of lungs; it has caused one death.

RATHKEALE; Rathkeale, No. 1, W.—Influenza complicated with bronchitis very prevalent.

TIPPERARY; Cappagh, part of.—Influenza and measles very prevalent.

TIPPERARY; Grean, part of.—During the last month of quarter influenza has been very prevalent.

Tipperary County.

BORRISOKANE; Borrisokane, W.—Influenza prevailed to a great extent during the quarter.

BORRISOKANE; Terryglass.—An epidemic of influenza prevailed during the month of

December, also a few cases of measles. The severity of the weather, as well as influenza prevented many children from being brought to be vaccinated.

CALLAN; *Mullinahone*.—There have been cases of various diseases, but no regular epidemic. Influenza is very rife; four cases of typhoid during quarter, all of which recovered; a few cases of scarlatina and measles, and a few bad cases of tonsillitis; a considerable number of cases of erysipelas, and four deaths occurred from puerperal peritonitis, probably due to these various infectious diseases being prevalent, especially erysipelas.

CASHEL; *Kilpatrick*.—Influenza prevalent, from which no death has yet occurred. Scabies prevented me from performing vaccination.

CLOGHEEN; *Caher*.—Measles and influenza were very prevalent in this district during the past quarter, otherwise it is in a very healthy state.

NENAGH; *Nenagh, W.*—Influenza was prevalent during the quarter, though not of a very severe type.

NENAGH; *Portroe*.—Measles prevalent, influenza also, but of a mild type.

NENAGH; *Toomyvara*.—An epidemic of influenza spread over the district, and was complicated with pulmonary diseases. Some old people died from pneumonia consequent on the epidemic.

PARSONSTOWN; *Riverstown*.—On account of measles and four cases of scarlatina, very little vaccination could be done.

ROSCREA; *Roscrea, No. 1, part of, W.*—See note under head of King's county.

THURLES; *Thurles, W.*—Scarlatina of a mild type prevalent during early part of quarter. Some cases of influenza treated during past month.

TIPPERARY; *Bansha*.—The number of vaccinations is unusually low, probably influenza and mild type of measles deterred parents from sending in their children.

TIPPERARY; *Cappagh, part of*.—See note under head of Limerick county.

TIPPERARY; *Emly*.—Vaccination was very backward during the quarter, owing to the very general prevalence of influenza.

TIPPERARY; *Grean, part of*.—See note under head of Limerick county.

TIPPERARY; *Tipperary, W.*—Children were not brought for vaccination, owing to the prevalence of the influenza epidemic during the past three months.

URLINGFORD; *Kilcooly*.—We have had a regular epidemic of influenza during the quarter.

Waterford County.

CARRICK-ON-SUIR; *Portlaoise*.—There has been a very severe epidemic of measles lasting into October and November, which was almost immediately followed by an epidemic of influenza. Influenza is subsiding.

CLONMEL; *Ballymacarbry*.—Four deaths from influenza. The ages of six deaths registered were as follows:—one man 80 years, and four women, one 85, one 80, one 75, and one 70 years.

DUNGARVAN; *Ringville*.—One case of mild enteric fever during the quarter. Influenza of the catarrhal and pulmonary form has been prevalent. Two deaths are due to it. Vaccination in arrear in consequence of it also.

DUNGARVAN; *Seskinan*.—Some few cases of influenza of a mild type during the early part of quarter.

DUNGARVAN; *Whitechurch*.—A severe epidemic of influenza has passed over, and measles is prevalent at present.

KILMATHOMAS; *Kilmathomas, W.*—Vaccination postponed generally, owing to whooping-cough, measles, and influenza, from some one or other of which scarcely any child in the district escaped.

LISMORE; *Ballyduff*.—Typhus fever and typhoid very prevalent in October and November; influenza in November and December.

LISMORE; *Cappoquin*.—There has been a considerable outbreak of influenza in the district during the quarter, and several deaths from the disease occurred. It has, however, nearly disappeared. One death from typhoid fever was registered.

LISMORE; *Lismore, W.*—Influenza prevalent in district during last month of quarter, with only one fatal case.

WATERFORD; *Kilmeadan*.—An epidemic of influenza of a severe type passed over the district during the quarter.

WATERFORD; *Waterford, No. 1, W.*—Six deaths attributed to influenza.

YOUGHAL; *Ardmore*.—Measles and influenza were prevalent in this district during past quarter.

YOUGHAL; *Clashmore*.—There were four cases of enteric fever amongst the inmates of one household; two cases in another; and one case each in four others; all in the same neighbourhood; with one death. By removal to hospital, where practicable, isolation and disinfection, the disease was confined to the single centre where it arose, and got under without further mishap. Influenza and measles are very generally prevalent.

YOUGHAL; *Templemichael, part of*.—See note under head of Cork county.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin*.—Influenza of a mild type has been prevalent.

ANTRIM; *Randalstown*.—Influenza has been very prevalent during the quarter, and three deaths have been caused by it owing

to lung complication. Two deaths caused by diphtheria were registered early in October. At present whooping-cough has appeared in a mild form.

ANTRIM; Templepatrick.—There has been a considerable number of cases of influenza during the last two months. Two deaths were registered from this disease in December.

BALLYCASTLE; Cushendal.—Influenza is prevalent.

BALLYMENA; Ballymena, W.—Measles epidemic, influenza prevalent, chest affections numerous.

BALLYMENA; Broughshane.—Catarrhal colds and sore throats prevalent. A few cases of scarlet fever treated, but it is not spreading, and there are no deaths.

BALLYMENA; Clogh.—Influenza has been very prevalent during last month. Owing to it and its complications, which were largely chest complaints, a large proportion of the deaths occurred among elderly people, while not a child below one year has died during the quarter. One death from enteric fever, one from diphtheria, two from scarlatina, but at present I know of no fresh cases in the district.

BALLYMENA; Galgorm.—Seven deaths from influenza registered.

BALLYMENA; Glenwhirry.—Among the deaths the following were registered: one each at 80, 87, and 89 years of age; three at 90, one at 92, and one at 93 years of age. Influenza has been very prevalent during the quarter, but only two fatal cases have occurred, in persons over 70 years of age.

BALLYMENA; Toome.—Influenza has been very prevalent during the quarter, causing six deaths, three being uncertified, and the other three, with grave pulmonary and cerebral complications, certified. Three of the deaths were of persons aged 80 years and upwards. The death rate in old persons is unusually high this quarter. With the above exception the district is fairly healthy.

BALLYMONEY; Castlequarter.—An epidemic of scarlet fever, in which all cases except one recovered.

BALLYMONEY; Derrock.—Influenza very prevalent during November and December. Under this heading there were a good many cases of bronchitis and pneumonia. Three persons suffered from this disease at the same time in the same family, all of whom died, but the deaths are not yet registered.

BALLYMONEY; Dirraw.—Catarrhal influenza prevalent. Complications in some cases, pneumonia and bronchitis; and in others, throat complications.

BELFAST; Belfast, No. 5.—Measles and influenza have been prevalent, and there has also been a considerable number of cases of typhoid fever and of scarlatina.

LARNE; Ballycarry.—Bronchial affections very prevalent. A few isolated cases of scarlet fever and measles have occurred during last half of quarter.

LARNE; Carrickfergus.—Influenza prevalent during quarter.

LISBURN; Glenavy.—This quarter has been particularly fatal to the aged and infirm. Two local outbreaks of scarlatina, which happily did not spread.

LISBURN; Lisburn, part of W.—Of thirty-one deaths of persons aged 60 years and upwards, fourteen were between 60 and 70 years, nine between 70 and 80, and eight between 80 and 90 years of age. Pertussis (whooping-cough) very prevalent, frequently with severe complications, but only one death has occurred, and scarlatina is I believe very prevalent, but only two deaths have occurred.

Armagh County.

ARMAGH; Armagh, W.—We have had a very extensive outbreak of influenza with four deaths. Scarlatina, measles, and whooping-cough have also been very prevalent, with but a slight mortality.

ARMAGH; Keady.—There is a very general epidemic of influenza, of a severe type in many cases, and frequently followed by lung affections.

ARMAGH; Markethill.—Measles was epidemic during the past two quarters, but has now died out. Influenza made its appearance in the district about the beginning of December. Whooping-cough has now appeared in the neighbourhood of Markethill.

CASTLEBLAYNEY; Newtownhamilton, part of.—Influenza and tonsillitis have been pretty prevalent for the last three weeks.

LURGAN; Lurgan, No. 1, part of, W.—Influenza has been very prevalent since the middle of October, and of a pretty severe type.

NEWRY; Mullaghglass.—During the last fortnight of the quarter there has been a good number of cases of influenza.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—Influenza and bronchial catarrh have been very prevalent.

BAILIEBOROUGH; Kingscourt.—Since the beginning of December influenza of a mild type has been prevalent.

BAILIEBOROUGH; Shercock.—Influenza prevalent for the past month.

BAWNBOY; Ballyconnell, W.—Several cases of influenza are now under treatment; hitherto no deaths have been registered from this cause. The cases are severe, but pulmonary complications are the exception.

BAWNBOY; *Newtownmore, part of.*—Influenza is very prevalent.

CAVAN; *Ballyhaise.*—Influenza prevalent.

ENNISKILLEN; *Holywell, part of.*—I am at present attending several cases of influenza. There is no other epidemic disease.

GRANARD; *Scrubby, part of.*—See note under head of Longford county.

KELLS; *Moynalty, part of.*—See note under head of Meath county.

OLDCASTLE; *Ballyjamesduff.*—Influenza of a mild type prevailed; no death occurred from it.

OLDCASTLE; *Virginia.*—Influenza was prevalent during the quarter. It was not of such a fatal type as in other years, fewer cases of lung complications accompanying it.

Donegal County.

BALLYSHANNON; *Ballintra.*—Sanitary arrangements unsatisfactory. Water supply almost none.

DONEGAL; *Donegal, W.*—Measles and influenza prevalent.

DONEGAL; *Dunkineely.*—Influenza very prevalent during the past month, and attended in numerous cases with bronchitis; no fatality as yet recorded.

DONEGAL; *Laghy.*—Only seven vaccinations owing to a severe epidemic of measles.

DUNFANAGHY; *Crossroads.*—Influenza prevalent; no deaths caused by it up to date.

DUNFANAGHY; *Dunfanaghy, W.*—There has been an epidemic of influenza of a mild type during the last month.

DUNFANAGHY; *Gweedore.*—A number of people suffering from pulmonary affections owing to the severity of the weather.

GLENTIES; *Currick.*—Whooping-cough and scarlet fever have taken effect in the district for the last quarter. It is to be feared that the influenza is making its appearance.

GLENTIES; *Dunglow, No. 1.*—There has been very little sickness until the last fortnight of the quarter, and since that influenza has been prevalent, but no deaths have occurred up to the present. The sanitary arrangements fairly good. There was one fatal case of typhoid fever. I took prompt measures to have it isolated, and to have the place afterwards disinfected. There has been no recurrence of the disease.

GLENTIES; *Dunglow, No. 2.*—Influenza is epidemic at present, and is of a severe type.

GLENTIES; *Glenties, W.*—Influenza and lung affections (congestion) are prevalent.

GLENTIES; *Killybegs.*—Influenza has been prevalent for the last fortnight of the quarter. No young persons died from the disease. Some old people died; no medical attendant, as they did not call for medical treatment.

INISHOWEN; *Carndonagh, W.*—There were five deaths registered at the following ages: one at 100, three at 93, and one at 90 years. On careful inquiry, I find the information given as to these remarkable cases of longevity is perfectly correct.

INISHOWEN; *Moville.*—Whooping-cough is prevalent, but as yet there has been only one death. Influenza pervades all parts of the district, but in the mountainous parts, owing to the severe cold, and the poverty of the people, pneumonia and pleurisy as complications render their convalescence extremely tedious.

LONDONDERRY; *Burt.*—Vaccination return smaller than usual, owing partly to a very wet season, and also to influenza.

LONDONDERRY; *Killea.*—Influenza prevalent during quarter. One death registered of a man whose age was stated to be 92 years.

MILLFORD; *Rathmullan.*—Scarlatina appeared during the first month of the quarter, causing two deaths. It did not spread, as precautions were taken to close the schools, &c. A case of enteric fever also occurred which proved fatal.

Down County.

BANBRIDGE; *Crossgar.*—A few cases of influenza of a mild type.

BELFAST; *Castlereagh, No. 4.*—During the last quarter measles has been prevalent, but at present the number of cases coming under my observation is greatly diminished.

DOWNPATRICK; *Ballymahinch.*—The district is fairly healthy: though there has been a considerable number of cases of influenza, the mortality from it has been inconsiderable, except in the cases of those of advanced life.

DOWNPATRICK; *Downpatrick, W.*—Three deaths attributed to influenza.

DOWNPATRICK; *Killyleagh.*—There is an epidemic of whooping-cough at present; two deaths from this disease. The water supply to the town of Killyleagh is insufficient in quantity, and bad in quality.

KILKEEL; *Kilkeel, No. 2, W.*—Influenza bad; water supply kept well up.

LISBURN; *Ballylesson.*—One death recorded as due to enteric fever, also one caused by diphtheria, which was introduced by some means into a district peculiarly

favourable to its extension. There is reason, however, to hope that the disease has now been stamped out, no case having occurred for a fortnight past. Influenza very prevalent.

LISBURN; Lisburn, part of.—See note under head of Antrim county.

LISBURN; Saintfield.—Whooping-cough is at present in the district, from which two deaths have been registered. Diphtheria (to which I referred in my last return), caused two deaths early in this quarter, and at present I have one case under treatment in which the disease is subsiding. I know of no other case in the district.

LURGAN; Lurgan, No. 1, part of.—See note under head of Armagh county.

LURGAN; Moira.—There is an epidemic of whooping-cough in the district. Influenza, which is very general, and pretty severe, caused two deaths. Scarlatina appeared simultaneously at the extreme limits of the district. It has not spread. It appeared in nearly the same places years ago, caused one death, and spread no further.

LURGAN; Waringstown.—Diphtheria was prevalent in one portion of the district during the months of October and November. There has been no new case since November 20th.

NEWRY; Newry, No. 2.—Influenza and measles, both of a mild type, have been prevalent during the month of December.

NEWRY; Rathfriland.—One death (the only case) from enteric fever.

NEWTOWNARDS; Comber.—There are a great number of cases of simple fever of enteric type in Comber at present, owing to bad sewerage arrangements; but the town is to be thoroughly sewered in the spring, which will be a great improvement from a sanitary point, as it is in a very bad state at present.

NEWTOWNARDS; Greyabbey.—Scarlatina in a mild form appeared in Kirkcubbin and adjoining townlands in the month of October. No death is recorded as due to it. All signs of it have now disappeared. Influenza has been prevalent throughout the district, especially in November and December. A type called influenza, but accompanied by no bronchial catarrh, has lately appeared; chill, sore throat, in some cases with, and in some without, a florid measly eruption, accompanied with severe headache generally, and sacral and lumbar pains hard to get clear of; also with neuralgia in various parts of the body, especially between shoulders and over chest. If seen early, the temperature is high, but soon falls to the normal. Fever of an infectious type presented itself in one family in Ballyhalbert division; not, however, in Ballyhalbert village. A compulsory order was obtained for the removal of the four persons infected. This village is deficient in water supply. The question has been considered by the Board of Guardians, but dismissed owing to expenses likely to be incurred.

NEWTOWNARDS; Kilmood.—A few mild cases of influenza.

NEWTOWNARDS; Newtownards, W.—During the past three months influenza has been prevalent. It is of a much milder type than formerly, and does not leave the patients in such a weak state: they recover from the attack much more quickly. I have had two cases of scarlet fever, but, so far, it fortunately has not spread. I hope to be able to keep these children from returning to school for some length of time. There is a good deal of whooping-cough among children. An epidemic of mumps is passing over the district now. I have seen several cases in grown-up persons. I have had quite a number of cases of idiopathic erysipelas during the quarter. At present I have seven cases under treatment. I am unable to account for its unusual prevalence.

Fermanagh County.

CLONES; Newtown Butler, part of.—Measles has been very prevalent, of a virulent type, accompanied in many cases by pneumonia or bronchitis.

CLONES; Rosslea, part of.—The death of a female whose age was stated to be 100 years was registered. I have met with a few cases of influenza, chiefly of the gastric type, but on the whole the health of the district has been good.

ENNISKILLEN; Florencecourt.—Epidemics of scarlatina, membranous croup and measles, have been prevalent during the quarter.

ENNISKILLEN; Holywell, part of.—See note under head of Cavan county.

ENNISKILLEN; Lisbellaw.—Measles of a mild type has been prevalent. The death of a man aged 104 years has been registered.

IRVINESTOWN; Ederney.—Measles is present, but in a mild form; so far no deaths having occurred.

LISNASKEA; Lisnaskea, W.—Influenza prevalent.

Londonderry County.

BALLYMONEY; Kilrea.—Influenza very prevalent throughout this district. One death registered at the age of 99 years, three at 84 years, and five ranging from 82 to 72 years.

COLERAINE; Articlave.—Influenza everywhere; mild.

COLERAINE; Coleraine, W.—Influenza prevalent during November and December, and much illness among infants.

LIMAVADY; Feeny.—Influenza has been very prevalent during December.

LIMAVADY; Limavady, W.—There have been a good many cases of influenza during the past month (December), but no death has been registered from that disease. There

has been a considerable amount of pulmonary ailments, perhaps owing to the weather.

LONDONDERRY; City of Derry, No. 1.—Except for a rather large number of cases of diphtheria the district has been exceedingly healthy. In the first three weeks of December I had about twenty cases of influenza.

LONDONDERRY; Glendernot, W.—The death-rate is exceptionally low considering the number of cases of influenza, many of a bad type. Five deaths from various causes at between 60 and 70 years of age; six between 70 and 80; six between 80 and 90, and one well authenticated case at 101 years.

MAGHERAFELT; Bellaghy.—The deaths registered are chiefly those of aged and infirm people over 60 years of age (in one case 100 years).

MAGHERAFELT; Magherafelt, W.—Epidemic catarrhal fever (influenza) with serious complications has been prevalent in this district during past quarter. Fever, scarlet fever, measles, diarrhoea, and whooping-cough have also appeared.

MAGHERAFELT; Moneymore.—Measles which was prevalent during last quarter seems to have died out, but we have some cases of severe whooping-cough. Influenza of a not very severe type is prevalent.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W.—Measles and influenza were both very prevalent during the quarter; one death from measles not yet registered. Influenza did not prove fatal in any case.

CARRICKMACROSS; Donaghmoyne.—Measles in one house in district.

CASTLEBLAYNEY; Ballybay.—Measles of severe type prevailed throughout the district, complicated with capillary bronchitis in a number of cases, and in one with diphtheria.

CASTLEBLAYNEY; Castleblayney, W.—Influenza of a severe type has made its annual re-appearance, being in several cases complicated with capillary bronchitis, pneumonia, or congestion of the lungs. Measles, scarlatina, and whooping-cough attacked numbers of children and adults. An unusual number of cases of erysipelas came under observation.

CASTLEBLAYNEY; Newtownhamilton, part of.—See note under head of Armagh county.

CLOGHER; Aughnacloy, part of.—One male died (co. Tyrone portion of district) aged 105 years. As far as I can find out this age is correct.

CLONES; Clones, W.—Measles of a very bad form, complicated with chest affections, has been very prevalent during the last

quarter in the urban sanitary district of Clones. Owing to the presence of infectious disease in the district very few children were vaccinated.

CLONES; Newtown Butler, part of.—See note under head of Fermanagh county.

CLONES; Rosslea, part of.—See note under head of Fermanagh county.

MONAGHAN; Castleshane.—Scarlet fever and measles pretty prevalent.

MONAGHAN; Glaslough.—One death registered aged 104 years. Influenza has again become epidemic, but there is an absence of other zymotic diseases.

MONAGHAN; Kilmore.—Measles very prevalent during first two months of quarter.

MONAGHAN; Monaghan, W.—A few odd cases of influenza, very mild in type, have occurred.

Tyrone County.

ARMAGH; Caledon.—There has been a severe epidemic of measles during the quarter; capillary bronchitis in many cases complicated the measles. Three deaths occurred, in two of which medical aid was too long delayed; in the other convulsions supervened. Influenza has been very prevalent accompanied by pulmonary affections. Three cases of scarlet fever (benign) appeared, for, so far, it has not spread beyond one house.

CASTLEBERG; Castleberg, W.—Influenza very prevalent, complicated with bronchitis.

CASTLEBERG; Killeter.—Influenza prevalent, but no fatal cases. Vaccination rather below the average.

CLOGHER; Aughnacloy, part of.—See note under head of Monaghan county.

CLOGHER; Fivemiletown.—The weather during the last month or so has been rather wet and cold, and a great many cases of catarrh have resulted, but not of a very severe character. The sanitary state of the town, although fairly good, could be improved, but such a desideratum is not easily accomplished.

COOKSTOWN; Cookstown, W.—Influenza is very prevalent; two deaths recorded from the disease.

COOKSTOWN; Pomeroy.—Influenza very prevalent at present. The sanitary state of district better than it has been for years. One death registered at the age of 105 years, but I cannot procure any documentary evidence to verify the fact.

COOKSTOWN; Stewartstown.—A severe epidemic of influenza, whole households being stricken down at a time. There is also an epidemic of measles.

DUNGANNON; Benburb.—Two deaths from croup.

DUNGANNON; Coal Island.—Measles and influenza very prevalent during past quarter, as also bronchial affections generally, increasing the number of deaths considerably, fifteen of the deaths registered being of persons from 72 to 98 years of age.

OMAGH; Drumquin.—District generally unhealthy. A great number of cases of influenza, colds, and chest affections, but no increase of the death-rate.

OMAGH; Fintona.—During the past month we have had an epidemic of catarrhal sore throat and pulmonary affections.

OMAGH; Omagh, No. 1, W.—There was during quarter an epidemic of scarlatina of a very mild type, only two deaths being reported from it. There were also, during December, a considerable number of cases of influenza, none of which presented any serious complication.

STRABANE; Newtownstewart.—Measles has been very prevalent in the district during last quarter. Four deaths have been registered during above period, owing to lung complications. There has been an epidemic of typhoid fever. Three cases began with a sharp attack of inflammation of the lungs; no deaths. Water supply very scanty during the summer months.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; Ballinasloe, W.—District healthy, notwithstanding the fact of the town being built on undrained and unsewered rabbit sand. Influenza has made its dread appearance, and has proved terribly fatal in the case of aged folks attacked. Gastric complications form a prominent feature in the symptoms.

BALLINASLOE; Killaun.—Influenza of a much more severe type than the epidemics we have had within the past four years, is ravaging this district at present. In many instances, whole families are prostrated by it simultaneously, so that, besides the ordinary sufferings incidental to the disease, patients of the poorer classes have to bear with insufficient attendance, and consequent privation and early exposure. Secondary chest affections are very numerous, and the debility following even an uncomplicated attack of influenza, is a marked feature of the present epidemic. Industry is almost paralyzed, and I fear serious distress will follow if the disease does not soon abate.

BALLINASLOE; Kiltormer.—Just now there is a wave of influenza passing over the district, and, owing to the inclemency of the weather, I am afraid a good many of the old people will succumb to it. One death of a person 80 years of age is recorded.

BALLINASLOE; Laurencetown.—There were several cases of measles, none of which were fatal. Of the deaths registered, four

were stated to be of the respective ages 93, 93, 90, and 83 years.

CLIFDEN; Inishbofin.—(One of the deaths was of a person aged 90 years; another of 80 years.

GALWAY; Galway, No. 3 (Arran).—Influenza has come again all over the district. In almost every house two or three inmates have the disease. So far, only two deaths recorded from it.

GALWAY; Oranmore.—Of the twenty-one deaths registered, eleven were of the respective ages of 93, 86, 85, 84, 83, 80, 76, two at 75 each, one each at 74 and 67 years. Influenza is prevalent through the district, but there has been no death therefrom.

GLENNAMADDY; Glennamaddy, W.—An epidemic of influenza made its appearance in the district during November and December, and is still prevailing, also some fever cases, which were treated in the Union Hospital.

GLENNAMADDY; Williamstown.—An epidemic of influenza prevailed generally through district during last month of quarter, but as far as I could ascertain, most of the cases were unaccompanied by complications of a serious character. The district has been otherwise in a fairly sanitary condition during quarter.

GORT; Gort, W.—Measles and influenza largely prevail throughout the district.

LOUGHREA; Athenry.—Four deaths were registered at the ages of 89, 88, 80, and 77 years respectively.

LOUGHREA; Bullaun.—An epidemic of influenza very general throughout entire district; of the deaths registered three were of the respective ages, one 82, and two 83 years.

LOUGHREA; Loughrea, W.—During the quarter influenza became epidemic, causing more deaths than the previous epidemic. In one family a child suffered from typhoid fever, and after six weeks two more of the children became ill of the same disease.

LOUGHREA; Woodford.—Although no death has been registered during this quarter from typhus, two have occurred in the course of a recent outbreak in the western portion of this district, which has now nearly subsided again, and the origin of which I have been unable to trace.

MOUNTBELLEW; Mountbellew, W.—Influenza, accompanied with chest and throat affections, was very prevalent; also whooping-cough.

OUGHTERARD; Cloonbur, No. 1.—Influenza prevalent, of a mild type.

TUAM; Abbey.—Influenza is very prevalent.

Leitrim County.

BAWNBOY; Newtowngore, part of.—See note under head of Cavan county.

MANORHAMILTON ; Lurganboy.—Influenza has again appeared in the district, complicated in a great many cases with pulmonary trouble; otherwise the health of the district is excellent.

MOHILL ; Carrigallen.—Influenza prevailed to a very great extent; commencing about the middle of November, very few families have escaped its visitation. The epidemic has been more severe than on former occasions. Chest affections were its chief development, pneumonia and bronchitis—to the first of which two deaths were due. Gastro-enteric symptoms resembling those of typhoid were also prominent.

Mayo County.

BALLINROBE ; Hollymount.—Severe epidemic of influenza.

BELMULLET ; Bangor.—District healthy, and in a sanitary state, with the exception of the village of Bangor, which is very filthy. Influenza has made its appearance, which in a few cases was complicated with pneumonia of a severe type.

BELMULLET ; Knocknalower.—One death from influenza during the quarter.

CASTLEREAGH ; Ballaghaderreen, part of.—The sanitary state of the district is much improved, but there is yet room for further amendment in that direction. For last couple of months the district has been invaded by typical influenza, with occasional pulmonary complications. Whooping-cough too, and scarlatina have shown themselves lately, not epidemically, but sporadically.

CLAREMORRIS ; Ballyhaunis.—Within the last fortnight influenza, usually complicated with broncho-pneumonia, has appeared, and caused some deaths amongst young children. In other respects the health of the district is good, and its sanitary condition much improved.

KILLALA ; Killala, W.—Influenza very prevalent.

SWINEFORD ; Kiltamagh.—Influenza has been rather prevalent this quarter.

SWINEFORD ; Loupark.—Vaccination continues much neglected.

SWINEFORD ; Swineford, W.—Influenza of a mild type prevalent.

WESTPORT ; Achill.—General sanitary state "very fair." A good many have been noticed to lime-wash lately. Typhus was brought from Scotland by parties returning from harvesting, but has been confined to the four houses in which the parties live; there has been one death from it, not yet registered. Influenza very prevalent for the past month. No children presented for vaccination, the two performed being done at their homes.

WESTPORT ; Ballycroy.—The district has been in a bad state from influenza, accompanied with bronchitis, pneumonia, and

great depression. I certainly consider there were scarcely forty in the district escaped the above. I had to cease vaccination, as the young members were in a bad state from cough influenza.

WESTPORT ; Newport.—Owing to the prevalence of scarlatina and measles in the district, there has been an almost complete suspension of vaccination this quarter.

Roscommon County.

BALLINASLOE ; Creagh.—The death of a man aged 93 years was registered during the quarter.

BOYLE ; Boyle, part of, W.—Influenza and bronchitis have been prevalent for the past month.

CASTLEREAGH ; Ballaghaderreen, part of.—See note under head of Mayo county.

CASTLEREAGH ; Castlereagh, W.—Some cases of influenza, with broncho-pneumonia. Diseases of the respiratory organs very prevalent.

ROSCOMMON ; Athleague.—See note under head of Galway county.

STROKES TOWN ; Elphin.—Influenza was very prevalent during the quarter. Of the deaths registered some were very old. One man 94 and another 87 years.

STROKES TOWN ; Roosky.—Measles has been very prevalent during this quarter. Scarcely any children who had not previously suffered from the disease escaped this time. I have three deaths whose ages are 90, 93, and 94 years respectively.

STROKES TOWN ; Strokestown, W.—There has been a great epidemic of influenza in the district during the quarter. Measles is now raging to an alarming extent.

Sligo County.

BOYLE ; Boyle, part of.—See note under head of Roscommon county.

DROMORE, WEST ; Castleconor.—Scarlatina has been rather prevalent during past quarter. I have made several reports, which have been acted upon, putting the sanitary state of the several houses in order.

DROMORE WEST ; Easky, W.—There are still a large number of vaccination defaulters. Parents dislike bringing out young children this severe weather.

SLIGO ; Ballymote.—Bronchitis and influenza prevalent.

SLIGO ; Carney, No. 2.—An epidemic of influenza is raging here at present of a severe type, but no death has occurred from that disease. Whooping-cough has been prevalent here, but no deaths.

SLIGO ; Sligo, No. 1, W.—The following deaths of aged people were registered—four at 70, two at 80, two at 90, and one at 101 years of age respectively.

TOBERCUNRY ; Tobercunry, W.—Out of the number of typhus cases occurring in this district, only one proved fatal.
